The Practical Application of AI Across the Caribbean Business Landscape

Alexei Sleur

Senior Manager, Technology Consulting

EY Caribbean

Alexei Sleur is a Senior Manager in Technology Consulting at EY Caribbean with more than 19 years of professional experience in software engineering, technology consulting, IT strategy, and digital transformation. He leads the Artificial Intelligence Service within EY Caribbean's Consulting practice, supporting organizations in understanding and applying emerging technologies to address business challenges and drive transformation.

Alexei has played a leading role in the development of Curaçao's National Artificial Intelligence Strategy, contributing to its strategic vision, policy recommendations, governance framework, and implementation roadmap for responsible AI adoption across the public and private sectors.

Throughout his career, he has led complex technology and transformation initiatives across the Caribbean, working with governments, financial institutions, and other organizations on IT strategy, software implementation, solution architecture, and digital transformation. His experience includes engagements in Curaçao, Aruba, Sint Maarten, and Puerto Rico.

At the ISACA Curaçao Experience 2026, Alexei will present "The Practical Application of AI Across the Caribbean Business Landscape," bringing a Caribbean perspective to how organizations can move beyond AI experimentation toward practical adoption and business application.
