CALL FOR PRESENTATIONS

The International District Energy Association (IDEA) is pleased to offer the Call for Presentations for our 2020 Campus Energy Conference “Envisioning Our Future” to take place in Denver, CO, February 10-14, 2020.

College and university campuses around the globe are leaders in education, research and innovation, often serving as vital economic engines supporting thousands of valuable jobs and services across a local region. An evolution is underway to renew, decarbonize and strengthen these important community assets.

District Energy/CHP systems form the backbone of efficient, resilient and sustainable energy infrastructure for campuses, healthcare, research centers, airports and military bases. Aggregating the thermal and electricity needs of dozens or even hundreds of buildings creates economies of scale that enable investment in highly efficient, sustainable and resilient energy infrastructure. College and university campuses have emerged as global leaders in the operation and optimization of world-class district energy systems.

Underpinning the historical operational success of district energy systems is continuous improvement in systems design and optimization, innovations in control technologies, and robust peer exchange sharing proven solutions. Renewal of energy assets will involve new financing strategies and innovative public private partnerships. For over 30 years, the annual IDEA Campus Energy Conference has earned a reputation for excellent technical content, valuable peer exchange, and open constructive dialogue with business partners in a relaxed, collegial atmosphere.

Please make plans to join us at the IDEA 2020 CampusEnergy Conference in Denver as we envision a new energy future. Submit an abstract for consideration today!

ABSTRACT SUBMISSION and DEADLINE:
Visit www.districtenergy.org/conferences for a link to submit your abstract and bio by Friday, Aug. 16, 2019.
