

# Complete Computing, Inc.

We have a simple philosophy. You first **learn** (acquire the knowledge), then **leverage** that knowledge by engaging in technical projects that hone your skills, *and then teach*.

Most training centers simply get it backwards. We have been serving the system builders, infrastructure specialists, consultants, and developers with this philosophy since 1982. In fact, we are the oldest and largest computer dealer, service center, technical support center, and training center in Arkansas.

You have a lot of choices out there today for your training needs – computer-based training (CBT), online training over the internet, video/DVD/CD, how-to books, and more. But nothing beats the hands-on, instructor-led training experience, and no one is better at that than our instructors at Complete Computing.

Complete Computing is proud to be a **Pearson VUE**, **Prometric**, and **Certiport** testing center. We have the ability to deliver more than 500 different exams from leading companies around the world.

*Please join us on **November 17<sup>th</sup>** to learn  
How to improve efficiency in your business, as well as  
Make yourself more marketable in the task force!*
