Avoiding Corporate Turnarounds, and the people who fix them

Jeff Sands – Dorset Partners LLC

Northeast Regional Conference

Sept. 19, 2023

Summary:

Quick Summary

- 1. Types of Turnaround
- 2. When help is needed
- 3. How to identify the solutions and the expertise
- 4. Strategy & Tactics of a turnaround
- 5. Shared sacrifices and teamwork
- 6. Deep dive into Cash Conversion Cycle and the Debt Stack

Types of Turnarounds:

Income Statement Turnarounds

An unprofitable business that is draining cash and retained earnings through ongoing operating losses.

- The business must become cash-based profitable within weeks
- With cash stability, the business must be made proforma accrual based profitable within months.
- There are 2 primary levers to accomplish this:
 - Increased gross profit margin dollars
 - Decreased SG&A costs

Balance Sheet Turnarounds

Perhaps a profitable business but one that is being drained through suffocating levels of debt service.

- Debt service must be reduced below the level of cash generation
- Debts can be Reprofiled (stretched out over longer amortization period) to protect cash flows
- Debts can Restructured (reduced principal, reduced interest, interest only, bifurcated into A & B notes with B suspended, longer amortization period, converted to equity, or PIK'd where interest is rolled into new debt, etc.)

What Forces a Turnaround:

Why hire a Turnaround Professional (CRO)?

- Reasons Broken Balance Sheet or Broken Income Statement
- Triggering Event such as; DSCR, Can't make payroll, Frozen supply chain
- Don't be Cleopatra, the Queen of Denial

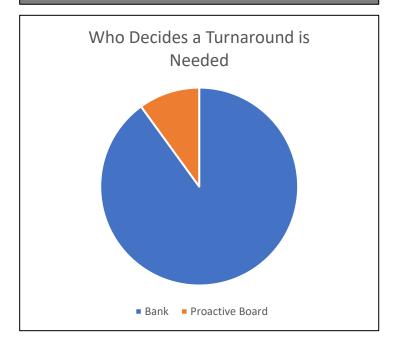

Who Initiates the hiring of a CRO

- Board / Management
- Court appointment
- Lender

Who does a typical turnaround professional work for?

- Fiduciary duty to shareholders
- Obligation to stakeholders

When a lender imposes a workout/ turnaround, the business is automatically on defense and no longer in control.

Debt Service Coverage Ratio:

The Debt Service Coverage Ratio usually pushes borrowers into a bank workout.

This is a trailing-12-month calculation so distress can be well entrenched by the time it is noticed.

The DSCR is calculated by taking net operating income and dividing it by total debt service (principal and interest).

Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Revenue	1,200	1,100	1,150	1,050	1,000	1,100	950	900	950	1,000	1,100	1,150	1,200	1,100	1,150	1,050	1,000	1,100

										Loa	an Covenant	1.25	1.25	1.25	1.25	1.25	1.25	1.25

Who Can Help:

Company is headed towards trouble. What are the options?

- DIY. (the person who got us into this mess will now get us out)
- CPA
- A consultant or CFO who says he did a turnaround once
- W2 CEO with multiple turnarounds
- CTP, Certified Turnaround Professional
 CIRA (certified insolvency & Restructuring Advisor)
 CFA (certified fraud advisor)

Role of the CRO - Guide not Hero

- Luke and Yoda
- Frodo and Gandalf
- Daniel and Mr. Miyagi

What are the skillsets?

- 50% Finance
- 50% Operations
- 50% Psychology
- 1. Financial analysis to work with lenders
- 2. Legal understanding to untangle debts and lawsuits
- 3. Leadership skills to rally the team
- 4. Management skills to keep everyone on track
- 5. Sales skills to get vendor support

Personality type best suited for turnaround work?

- Solution oriented
- Impatient and relentless
- Creative and orderly under pressure
- Attracted to challenge

Strategy of a Turnaround:

The following summary was presented to a recent client

Problems:

I will gently describe your situation as dire. You have orders but can't buy materials, dangerous debts are coming due and you've been draining retirement savings to fund payroll, even though you can't afford the materials to keep your customers supplied. Opportunities for growth and profitability are being missed because of these cash flow issues. The feeling of being in a death spiral is accurate.

Solutions:

We need to unwind that death spiral. We need to get some breathing room from the creditors which provides time for us to bring in more capital. With more capital we can order parts and materials. With parts and materials, we can better utilize our labor and make shipments and build accounts receivable (AR). With AR we can borrow more to buy more materials and parts and ship more orders. Then the customers will replenish their orders and we will enter a virtuous cycle of cashflow and profitability. From that foundation we can take on new business and opportunities to grow the business and secure our earnings.

Program of Shared Sacrifices:

Turnarounds are Team Sports, and they only work if everyone plays their part

- Lenders need to keep lending and offer relief on debt payments
- Customers need to keep consuming while paying more and faster for the products
- Workers need to keep working harder and with more accountability
- Suppliers need to keep supplying, with better terms and lower prices

Our job is to get everyone to give more and work harder than they planned to, for the mutual benefit of all.

That's the only way it works

Tactics of a Turnaround:

Tactics:

- Attack the biggest flames first
- Find the holes in the bottom of the boat
- Working outward in concentric circles
- Get control of cash
- Get control of the accounting
- Control working capital
- Cut costs
- Raise Prices
- Boost Sales
- Drive efficiencies
- Look for fraud. Report and resolve any findings
- Find Sacrificial Lambs
- Stretch the limits of possibility

Status List Provided to Bank in Actual Recent Turnaround

#	Action	Status
1	Fire CEO, CFO, COO	Complete
2	Replace with global restructuring team	Complete
3	Cease all non-critical spending	Complete
4	Contact customers / seller note holders	Complete
5	Cease payments and begin negotiation of seller notes	Complete
6	Freeze all past due payables	Complete
7	Model proforma forecast 2019	Complete
8	Chairman, CEO or CRO to every facility	Complete
9	Cease IT projects and reduce IT spend	Complete
10	Replace overpriced attorneys	Complete
11	Replace overpriced IT consultants	Complete
12	Move HQ, sublease corporate clubhouse	Complete
13	Establish supply chain credit programs with vendors	In Process
14	Stop losses in factory #8 within 30 days	In Process
15	Stop losses in factory #7 within 30 days	In Process
16	Gain customer financial support for factory #6	in Process
17	Accelerate A/R collections to 10 days	In Process
18	Headcount reductions	In Process
19	Wage and benefit reductions	In Process
20	Eliminate 4/6 of senior management positions	In Process
21	Double size of the sales force	In Process

Back to Basics, the Foundational 'Physics' of Commerce:

Before we get started, let's step back and revisit the basics, the core foundational building blocks of commerce.

Cash Conversion Cycle

The time and duration that cash is moved off your balance sheet and on to the balance sheets of your customers and suppliers.

- The #1 tool in all business, especially startups and turnarounds
- The single greatest lever in all business
- Also, one of the most under-taught business concepts

Debt Stack

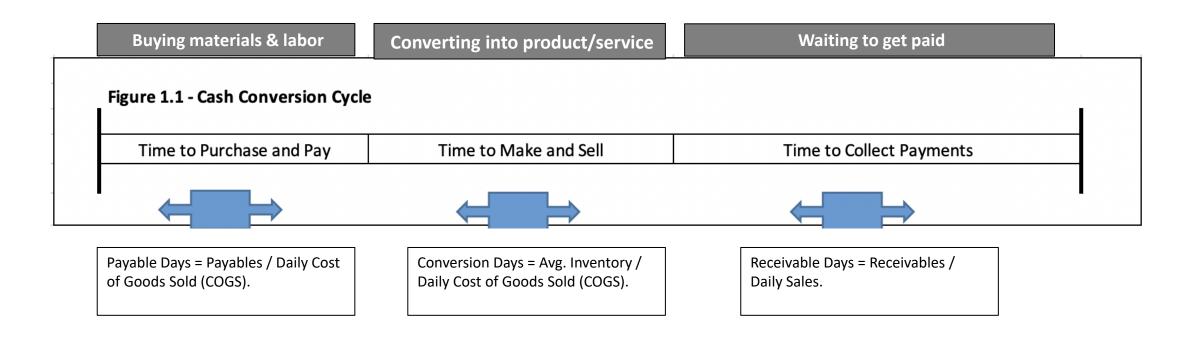

Perhaps older than money itself, the Debt Stack determines who owes whom, what, in what order, with what claims.

- The very foundation of corporate finance and free markets
- The basis of all corporate law
- Perhaps the only authority that can 'out-rank' the IRS in collections

Cash Conversion Cycle - CCC:

The CCC is your cash-exposure window, the number of days that the working capital of your business is tied up funding the operations of that business. It's the time and money invested in turning iron ore into a new car rolling off the showroom floor. It is the time needed to sell your inventory plus the amount of time needed to collect receivables minus your vendor payment terms. Each of these factors are variable and as a CEO you can influence each to your advantage. If you can pay more slowly for expenses, it keeps cash on your balance sheet and off your suppliers. If you collect more quickly, it moves cash from your customer's balance sheet onto yours. When you need the cash more than them, you should "borrow" from them. The core of a turnaround is shifting your balance sheet to absorb the impacts of distress, then shifting back toward reinvestment and recovery, and managing the CCC is the quickest way to achieve that.

CCC – Processing Faster & Cheaper:

Conversion Days = Avg. Inventory / Daily Cost of Goods Sold (COGS).

Processing Faster from Order to Invoice

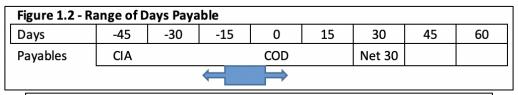

- Lean Processes
- Time Motion Studies
- Ounces to Grams
- Order Input
- Engineering
- Order Release
- Production and Delivery
- Shipping
- Invoicing
- Cost Cutting
- Workforce or Payroll Reductions

By Industry

- Manufacturer
- Restaurant
- Plumbing Contractor
- Oil Distributor
- Distributor
- Retailer

CCC - Paying Slower:

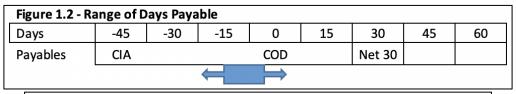

Payable Days = Payables / Daily Cost of Goods Sold (COGS).

Civil Moves to Pay Slower

Non-Civil Moves to Pay Slower

CCC - Paying Slower:

Payable Days = Payables / Daily Cost of Goods Sold (COGS).

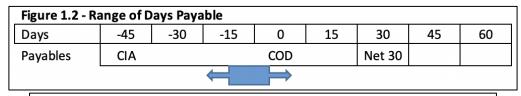

Civil Moves to Pay Slower

- Paying slower without asking
- Requesting extended payment terms
- Paying on credit card
- New tranche of debt like factoring, PO financing,
- Inventory on consignment and other exotic solutions
- Moving to a different vendor with longer payment terms
- Providing a note, guarantee, credit support or equity
- Inviting vendors into a debt reprofiling program to term out and stretch debt payments over a few years.

Non-Civil Moves to Pay Slower

CCC - Paying Slower:

Payable Days = Payables / Daily Cost of Goods Sold (COGS).

Civil Moves to Pay Slower

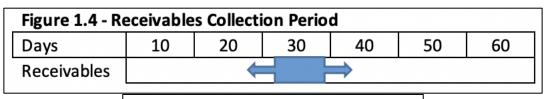

- Paying slower without asking
- Requesting extended payment terms
- Paying on credit card
- New tranche of debt like factoring, PO financing,
- Inventory on consignment and other exotic solutions
- Moving to a different vendor with longer payment terms
- Providing a note, guarantee, credit support or equity
- Inviting vendors into a debt reprofiling program to term out and stretch debt payments over a few years.

Non-Civil Moves to Pay Slower

- Declaring a workout to force vendors to term-out and stretch debt payments
- Inviting vendors into a debt restructuring program to haircut, term out and stretch debt payments over a few years.
- Lying, the check is in the mail
- So, sue me.
- Moving assets to become uncollectable. Borders on fraudulent conveyance.
- File bankruptcy
- International considerations

CCC – Collecting More & Faster:

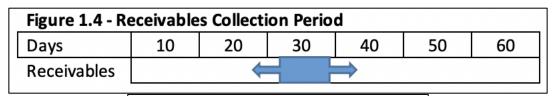

Receivable Days = Receivables / Daily Sales.

Civil Moves for Collecting More & Faster

Non-Civil Moves for Collecting More & Faster

CCC – Collecting More & Faster:

Receivable Days = Receivables / Daily Sales.

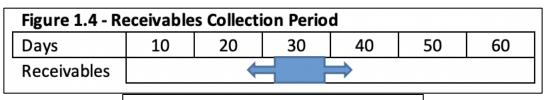

Civil Moves for Collecting More & Faster

- Ask nicely
- Change credit terms
- Offer payment terms like 2% discount for payments within 10 days
- Accept credit card payments
- Improve collection practices
- Chase old A/R with collectors and an extra effort
- Increase prices
- Increase fees

Non-Civil Moves for Collecting More & Faster

CCC – Collecting More & Faster:

Receivable Days = Receivables / Daily Sales.

Civil Moves for Collecting More & Faster

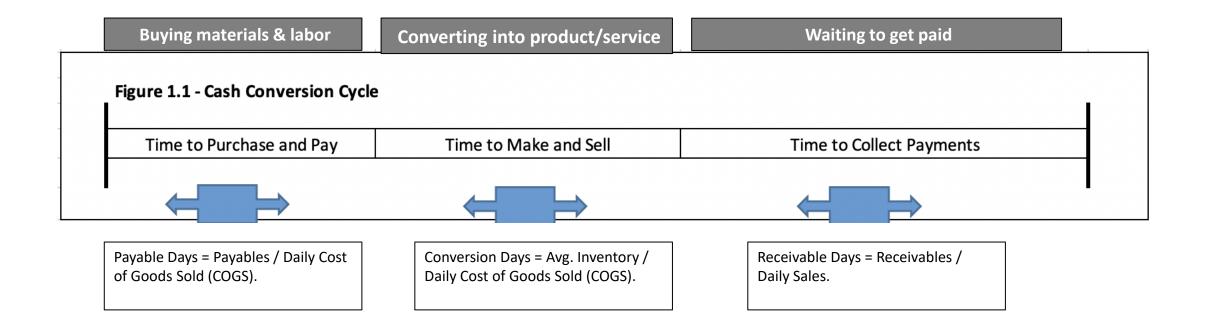

- Ask nicely
- Change credit terms
- Offer payment terms like 2% discount for payments within 10 days
- Accept credit card payments
- Improve collection practices
- Chase old A/R with collectors and an extra effort
- Increase prices
- Increase fees

Non-Civil Moves for Collecting More & Faster

- Increase prices retroactively, with charm
- Increase prices retroactively through force
 - Risk, recent case
- Cease shipments and declare all payables due immediately
- Stealing, 97 candies in a bag of 100
- International considerations

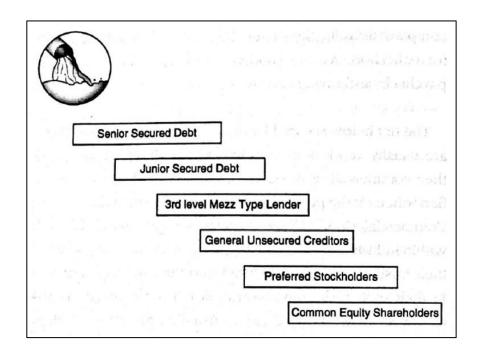

CCC Recap:

The Absolute Priority of Debt Rule

The underlying principle dictating the order of claims by which recoveries are distributed to creditors. The Bankruptcy Code mandates compliance to the strict hierarchy of claim payouts for the "fair and equitable" distribution of recovery proceeds.

Simple Example

Creditor

1st National Bank Trade Payables

Very simple. Perhaps a rental property or just a well-run business.

Normal Example

Creditor

1st National Bank - LOC

1st National Bank - Term Note

1st National Bank - Mortgage

Vehicle Lease

Trade Payables

Shareholder Loans

More typical of an industrial park type business with the assets/collateral to afford a revolving line credit, a term note or a mortgage.

A dog's breakfast of a debt stack from a current client.

Debt service is 70% of revenues!

FUBAR Example
