# ROAD SAFETY AUDITS

## ROAD SAFETY AUDITS

This workshop has been developed to explain the purpose and procedures followed in Road Safety Audits. The workshop works through the AustRoads Guidelines and discusses case studies of Audits already undertaken. Day and night audits of selected local projects are performed by delegates.

The Guidelines provide practitioners and decision makers with ways to formally address road safety issues before accidents occur. They are based on the latest information available and incorporate the combined experience of State road authorities throughout Australia, local government and Transit National.

### INVITATION TO ATTEND

This training program is designed for

- Design Engineers,
- NSW Police,
- Consultants,
- Road Safety Officers
- Construction Engineers,
- Maintenance Engineers,
- RTA personnel,

and any local government engineers and practitioners involved in the design, construction and maintenance of roads.

### Registration via IPWEA NSW website
