

Objectives

- Discuss common concussion presentation
- Review the latest management recommendations for concussion
- Identify atypical presentations of concussion
- Understand the role of the neuropsychologist in management of concussion
- Identify spinal deformity and criteria for referral
- Understand the natural history of spinal deformity
- List three incontinence-associated dermatitis interventions
- Describe pediatric pressure ulcer principles
- State legal requirements the nurse practitioner must follow for reporting possible child sexual abuse
- Identify normal prepubertal female anatomy
- Describe the most important tool the clinician can use in forming a differential diagnosis and classification for syncope in children and adolescents
- Explain the pathophysiology of cardiac syncope in children and adolescents, and the clinical management approach
- Explain the connection between research and evidence-based practice
- Apply strategies to integrate research and evidence-based practice in advanced practice nursing

Please bring a new soft or hard cover children's book to donate, as part of NAPNAP-LA's community outreach program.
