Flowchart to Identify and Assess 2019 Novel Coronavirus

For the evaluation of patients who may be ill with or who may have been exposed to 2019 Novel Coronavirus (2019-nCoV)

A. Identify
   if in the past 14 days since first onset of symptoms a history of either
   Travel to China

   OR

   Close contact with a person known to have 2019-nCoV illness*

B. AND the person has
   Fever or symptoms of lower respiratory illness
   (e.g., cough or shortness of breath)

   if both exposure and illness are present

   Isolate
   - Place facemask on patient
   - Isolate the patient in a private room or a separate area
   - Wear appropriate personal protective equipment (PPE)

   Assess clinical status
   EXAM
   - Is fever present?
     - Subjective?
     - Measured? _____ °C/F
   - Is respiratory illness present?
     - Cough?
     - Shortness of breath?

   Inform
   - Immediately contact the Louisiana Office of Public Health (OPH) Infectious Disease Epidemiology Hotline (24/7) at 1-(800) 256-2748 if you suspect a patient with 2019-nCoV.

   If discharged to home

   Instruct patient
   As needed depending on severity of illness and health department consultation
   - Home care guidance
   - Home isolation guidance

   Advise patient
   If the patient develops new or worsening fever or respiratory illness
   - Call clinic to determine if reevaluation is needed
   - If reevaluation is needed call ahead and wear facemask

* Documentation of laboratory-confirmation of 2019-nCoV may not be possible for travelers or persons caring for patients in other countries. For more clarification on the definition for close contact see CDC’s Interim Guidance for Healthcare Professionals: www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html
