Approval of this CE activity refers to recognition of the educational activity only and does not imply ANCC Commission on Accreditation or PSNA approval or endorsement of any product

Learning objectives

1. Describe the history and development of safe patient handling in nursing and physical therapy.
2. State elements of successful safe patient handling programs and best practices.
3. List the most important types of equipment used for safe patient handling and their use in nursing and therapy.
4. Articulate the evidence base for safe patient handling practices.
5. Explain 5 trends and issues influencing the development of Inter-Professional Safe Patient and Mobility Standards.
6. Evaluate the benefits to patients that can be derived from safe patient handling programs.
