

Beyond Data Breach: Quantifying the Many Dimensions of Cyber Risk

Speaker: Paula Miller, SVP and West Zone Cyber Growth Leader, Marsh

This will be a joint session with the Oregon & SW Washington Association for Financial Professionals (AFP)

The NotPetya/WannaCry attacks of 2017 ushered in a new era of cyber risk in terms of the nature and scope of cyber events and the potential economic impact to affected organizations. These attacks created a new baseline for organizations in understanding, measuring, and managing cyber risk. In turn the insurance market has responded with broader coverage offerings and increased capacity, particularly for business interruption exposures. This discussion will examine the current and future landscape of cyber exposures and explain how risk quantification and management fits within an organization's cyber security strategy.

CEU's for Oregon and Washington are pending.

Date: Thursday, April 18, 2019

Time: 12:00 PM

Registration opens at 11:30 AM

Lunch & presentation begin at 12:00 PM
