A Deep Dive into Tertiary Lymphoid Aggregates
Wednesday, May 22, 2024, 12–2 p.m. EDT

About the Webinar
This webinar will investigate the mechanisms underlying tertiary lymphoid aggregate structure and function within the tumor, and how they translate to clinical benefits.

Ongoing therapeutic approaches to stimulate aggregate formation or activate B cells or other immune cells within the aggregates will also be discussed.

An interactive Q&A session will follow the topic overview, providing participants with the opportunity to ask in-depth questions of the faculty as well as offering a forum for networking and initiation of collaborations with others working in a similar field.

Special Offer:
At the time of registration, if you buy 4 webinars, you get the remaining 3 for free!

Moderators:
Wolf-Hervé Fridman, MD, PhD
Cordeliers Research Centre
James Mulé, PhD
Moffitt Cancer Center

Faculty:
Roger Li, MD
H Lee Moffitt Cancer Center
Janis Taube, MD, MSc
Johns Hopkins School of Medicine
Cornelia Trimble, MD
Johns Hopkins University
