A Deep Dive into Fibroblast in the TME
Wednesday, Sept. 4, 2024, 12–2 p.m. EDT

About the Webinar
This webinar will address the heterogeneity of fibroblasts within the tumor and the molecular mechanisms underlying their differentiation and function.

Current efforts to develop therapeutics that restore anti-cancer immunity by targeting T cell-excluding fibroblasts and their signaling pathways will also be discussed.

An interactive Q&A session will follow the topic overview, providing participants with the opportunity to ask in-depth questions of the faculty as well as offering a forum for networking and initiation of collaborations with others working in a similar field.

Special Offer:
At the time of registration, if you buy 4 webinars, you get the remaining 3 for free!

Moderators:
 Ellen Puré, PhD
University of Pennsylvania

Hélène Salmon, PhD
Institut Curie

Faculty:
 Akshay Krishnamurty, PhD
Genentech
