American Society of Naval Engineers

Also Sponsored by:

Royal Institute of Naval Architects

Institute of Marine Engineering
Science & Technology

April 3 - 5, 2012

Washington, DC

Keynote Speaker

Mr. James Cameron

Technical papers suitable for publication are invited on topics related to marine forensics investigations, their findings, processes, and results including:

- Historic shipwrecks, civilian or military losses due to foundering, war damage, allision, collision or any other means
- Investigations of damage to hull and machinery, failures due to accident, environmental loading, or other causes
- Diving in support of forensic investigations, including the use of ROVs, AUVs, manned submersibles, and other remote sensors
- Human factors associated with marine forensic losses
- Marine forensic operations related to aircraft loss investigations
- Designation as a forensic investigation site vs. historic grave site and associated human remains issues
- Underwater archaeology and associated investigations

Please Submit Abstracts and proposed papers to Ken Smith at kmsmith@csi-il.com

Abstracts due March 30, 2011. Drafts for peer review not later than November 30, 2011, Final papers including peer review comments due March 15, 2012
