

Climate Change and Ships: Increasing Energy Efficiency

a SNAME & Marine Board Symposium

FEBRUARY 16 & 17, 2010

The Society of Naval Architects & Marine Engineers

and

The Marine Board of the National Academies

are proud to present:

Climate Change and Ships: Increasing Energy Efficiency Symposium

February 16 & 17, 2010 • Linthicum, MD, USA

Global climate change and governmental responses to environmental concerns are significantly impacting all maritime industries. The Climate Change and Ships: Increasing Energy Efficiency Symposium will address several important aspects of these dynamics.

Three tracks are dedicated to the issues central to maritime industry response and adaptation to emerging environmental trends and regulation:

- Greenhouse gases and the Energy Efficiency Design Index
- Greenhouse gases and technical and operational measures to increase energy efficiency; and
- Maritime economics and market based mechanisms
