

## SOCIETY OF PETROLEUM ENGINEERS-NY&NE SECTION PRESENTS

# MEZZANINE AND THE FUTURE OF COMPUTING INTERFACES

Visit Oblong Industries at their Boston office for a tour of Mezzanine™, a next-generation collaboration technology used by major oil and gas companies to conduct more efficient, productive, and compelling meetings.

**JULY 28th, 3–6pm**

Oblong Industries  
285 Summer Street , Suite LL  
Boston MA 02210

Oblong was founded by TED presenter John Underkoffler, who envisioned the future of workplaces for films such as *Minority Report* and *Iron Man*. That sci-fi technology is now a reality in Mezzanine—a collaborative conference room solution that seamlessly blends physical and digital environments across distributed locations.

Mezzanine enables *always on* regional office connectivity to collaborate on:

- Exploration & Production
- Distribution
- Marketing
- Sustainability
- Safety & Compliance
- Emergency Preparation
- Partner Communication

**Food and refreshments will be served.**
