

A Practical Guide to Artificial Intelligence in Project Management and Project Controls

Artificial Intelligence has rapidly entered our lives, bringing with it promises to dramatically change the ways we work and play. But is it of any use in the world of Project Controls and Project Management? Let's look at several tools and practical methods being deployed in our field to try and answer that question!

Charles has over 17 years of experience in Estimating and Project Controls. He attended Georgia Southern University to pursue a BS in Mechanical Engineering Technology.

*Charles Immonen,
Project Controls
