The annual survey of graduate programs at U.S. universities and colleges was conducted in the spring of 2016 to compile a list of theses and dissertations completed in 2015 in family and consumer sciences areas of interest. For the survey, requests for the titles and authors were sent via email to institutions three times within a seven-week period. Thirty-five colleges and universities responded to the survey. A total of 310 theses and 174 dissertations were reported. A report of those submissions, by subject category, author, title, and name of student’s advisor (if given), is provided.
