

# Painless Pocket Cards

## #1

Cut a 4-1/4"X5-1/2" piece of cardstock. Cut another piece of cardstock 3-1/2"X9-1/2" and fold in the middle. Cut a plain white piece of paper 3-1/4"X4-1/2" for writing sentiment on inside of card. Cut a piece of cardstock measuring between 3-3/4"X3-3/4" and 4-1/4"X5-1/2" in half along the diagonal (this will form your pocket). Cut a piece of patterned paper slightly smaller than your triangle and one 3-1/4"X4-1/2". Attach rectangular patterned paper to 3-1/2"X9-1/2" piece of cardstock (see blue rectangle for placement). Attach triangle patterned paper to triangle cardstock piece. Attach the completed triangle piece to the 4-1/4"X 5-1/2" piece of cardstock along the side and bottom edge only. Do not attach along the diagonal cut! Attach white piece of paper inside blue card.

Add decorations as desired and sentiment to inside of card. Insert card and other items inside pocket.

Card will fit into a standard A2 envelope (4-3/8"X5-3/4"). Be aware that adding bulky or heavy objects to the pocket may require a larger envelope and/or more postage if mailing!

## #2

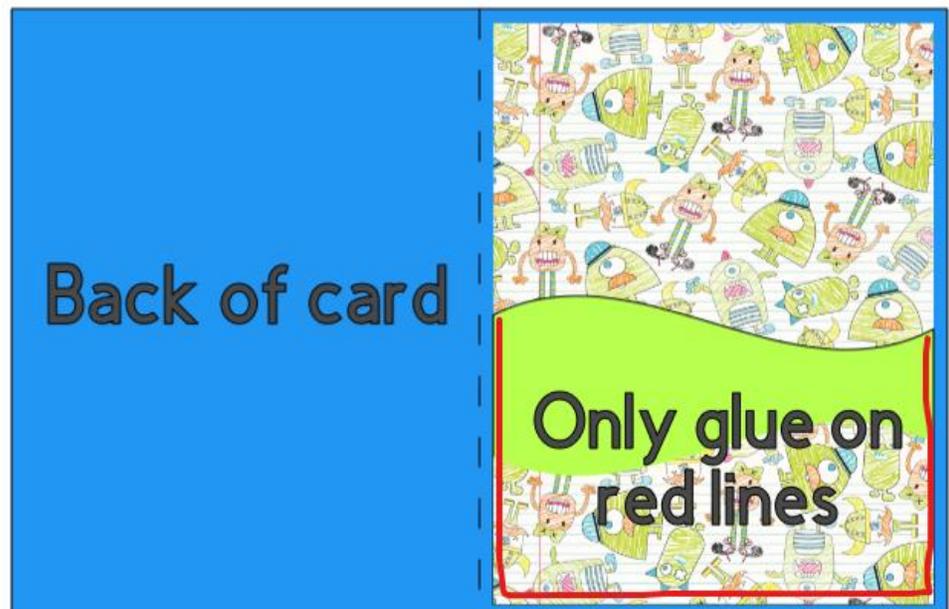

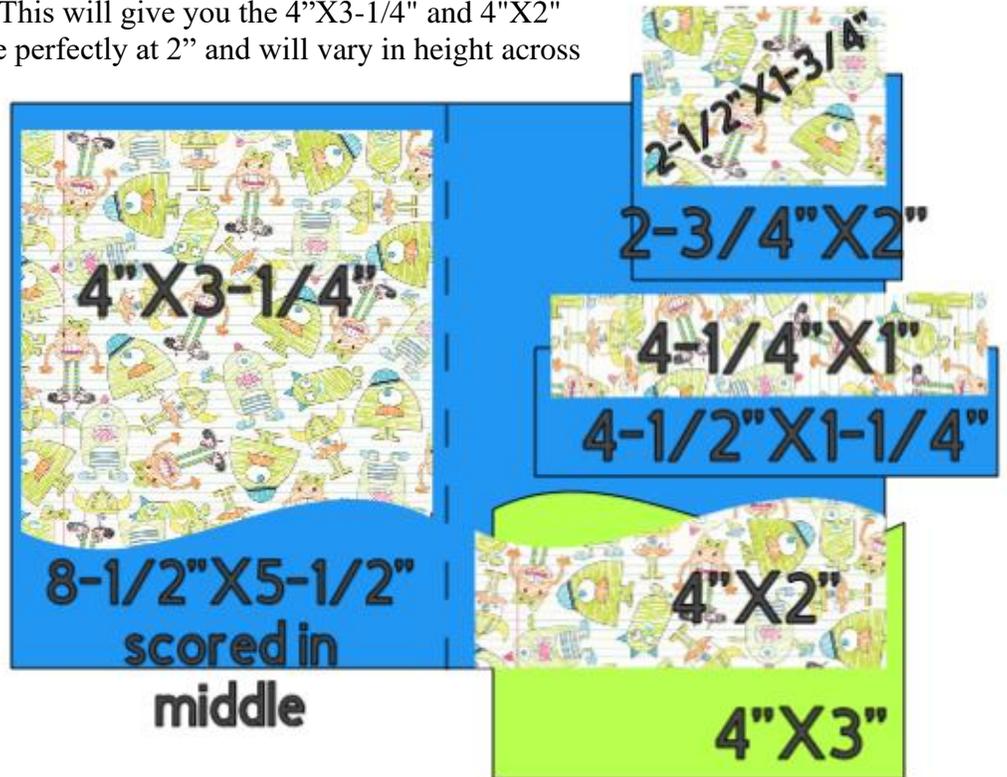

Cut the following pieces of cardstock: 8-1/2"X5-1/2", 2-3/4"X2", 4-1/2"X1-1/4" (optional for bookmark) and 4"X3". Cut the following pieces of patterned paper: 4"X5-1/4", 2-1/2"X1-3/4" and 4-1/4"X1" (optional for bookmark). Cut a wavy line through the 4"X5-1/4" patterned piece of paper at about 2" up the 5-1/4" side. This will give you the 4"X3-1/4" and 4"X2" pieces. It does not have to be perfectly at 2" and will vary in height across the piece since it's wavy.

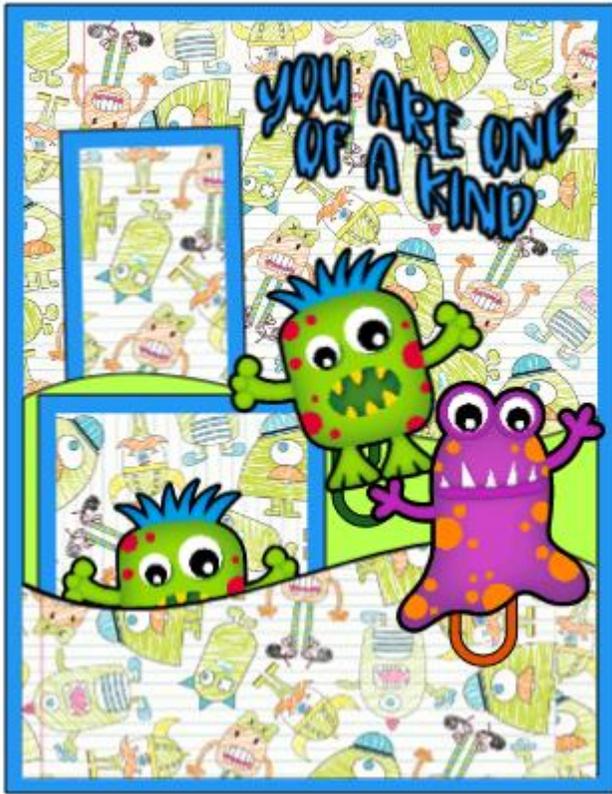

It does need to be 4" wide when finished. Cut a wavy line in the 4"X3" cardstock piece. Again, does not have to be perfect as long as it is 4" wide. The shorter pieces will form your pockets.

Attach the largest patterned piece to the front of your card so that it fits with a 1/8" space at the top and sides of the card. The wavy side is towards the bottom of the card. Next attach the 4"X3" piece of cardstock to the card with a 1/8" inch gap at the bottom and sides of the card. It should cover part of the already attached patterned piece. Only attach the sides and bottom edges of the cardstock piece since this will be one pocket.

Next attached the small wavy patterned piece aligning with the bottom and sides of the previous pocket. Only attach at the sides and bottom edges. This will be your smaller pocket.

Attached the 2-1/2"X1-3/4" patterned piece to the 2-3/4"X2" piece of cardstock. You can write on the back of this small card and place in smaller pocket. If making the bookmark, attach the 4-1/4"X1" patterned piece to the 4-1/2"X1-1/4" piece of cardstock. Let everything dry before inserting things in the pockets.

Add decorations as desired and sentiment to inside of card and back of small card. Insert gift cards, bookmark, small card, etc. inside pockets.

Card will fit into a standard A2 envelope (4-3/8"X5-3/4"). Be aware that adding bulky or heavy objects to the pockets may require a larger envelope and/or more postage if mailing!
