Impacts and Challenges of Our Current Environment

Being at home has helped
- Ran through the backlog, got back issues of journals up
- Redirected staff to work on repository issues at home, now can say “if you give me staff, we can get this done.”
- Uninterrupted time has been helpful

Challenges
- Can’t digitize print materials
- Technology problems – need to put materials on the same server, power issues

No budget concerns as of yet, because there is an increased emphasis on online. Print collections are more at risk, not services that make materials available online

Video streaming will be emphasized
- Interested in whether videos will be able to be locked down and password protected in Digital Commons
- Will vendors charge for increased storage space to handle streaming?
- Need to investigate prior speaker agreements and change future speaker agreements to allow for online streaming.
