Offering an Exceptional Faculty Career Opportunity

Senior Investigator

Rutgers School of Nursing invites applications and nominations for faculty who qualify as a Senior Investigator. With $736.8 million in annual research and development expenditures, Rutgers University is one of the nation’s top public universities. As a member of the Big Ten Academic Alliance, which annually conducts $10 billion in funded research, Rutgers is recognized worldwide for the quality and scope of its research and educational programs.

Senior Investigators at the School of Nursing will have opportunities to expand their substantive program of NIH-funded research through Rutgers’ 300-plus research centers and institutes. Rutgers’ large network of practice partners, and the School of Nursing’s federally qualified health center, provide access for clinically focused research.

Generous Start-Up Package. Protected Research Time. This exceptional opportunity as a Senior Investigator includes a generous start-up package to expand research activities, as well as protected time for research development. Teaching activities, as effort permits, will be focused on mentoring and educating our nursing PhD students.

Comprehensive Research Infrastructure. Senior Investigators can expect tremendous support from the School of Nursing’s research infrastructure. This includes in-house statisticians, editing services, a certified IRB navigator, expert research consultants, and pre- and post-award management and workshops.

Choice of Work Location. Competitive Benefits. Senior Investigators will have the choice of working in one of the School of Nursing’s three New Jersey locations: New Brunswick and Newark (both, a short train ride from New York City), and Blackwood (just outside of Philadelphia). Rank, tenure, and salary are competitive and based on experience and background.

Qualifications. Candidates must possess a research-focused doctoral degree in nursing or related field, an established program of NIH-funded research, and a substantial publication record in high-impact journals. Experience mentoring and/or teaching PhD students is preferred.
