August 5, 2019

The Honorable Lauren Underwood
United States House of Representatives
1118 Longworth House Office Building
Washington, DC 20515

Dear Representative Underwood,

On behalf of the American Academy of Nursing (Academy), thank you for sponsoring the U.S. Border Patrol Medical Screening Standards Act (H.R. 3525). The Academy serves the public by advancing health policy, practice, and science through organizational excellence and effective nursing leadership. The Academy’s more than 2,600 Fellows are nursing’s most accomplished leaders in education, management, practice, research, and policy. The Academy applauds this legislation as it aligns with one of our central policy priorities, to advance health equity and champion wellness.

The Academy has been highly critical of the Administration’s policies at the United States’ southern border which have negatively impacted the health and safety of immigrants, asylum seekers, and refugees. As you know, many of those crossing the border are fleeing stressful and traumatic situations such as extreme poverty, gang warfare, and domestic violence. The detention of these individuals, after they have completed the harrowing journey to the United States, without a standardized medical screening is unacceptable. H.R. 3525 will ensure everyone entering this country has an efficient medical screening that includes documentation of medical complaints and concerns along with vital statistics. This will guarantee immigrants entering our country do not die in our care from preventable illnesses or conditions.

Again, the Academy thanks you for your introduction of the U.S. Border Patrol Medical Screening Standards Act and appreciates your commitment to ensuring the health and safety of those detained at the southern border. If the Academy can be of any assistance to you or your staff, please do not hesitate to contact the Academy’s Strategic Outreach Manager, Ellie Cook, at ecook@AANnet.org or at 202-777-1175.

Sincerely,

Karen Cox, PhD, RN, FACHE, FAAN
President
