

## Joint Statement in Support of COVID-19 Vaccine Mandates for All Workers in Health and Long-Term Care

*The American Academy of Nursing Joins Call to Require the Vaccine for Health Care Workers*

The American Academy of Nursing (Academy), along with over 50 other professional health care organizations, signed onto a joint statement (below) to require all health care and long-term care workers to receive the COVID-19 vaccine. The COVID-19 vaccine is our most effective tool in keeping patients and communities safe as mutated variants spread and vaccination rates slowly tick upward.

“The Academy remains focused on protecting our most vulnerable populations especially those who are immunocomprised, children, and other populations who are unable to get vaccinated,” said Academy President, Eileen M. Sullivan-Marx. “The joint statement we supported, along with leading professional health organizations, to require COVID-19 vaccines for all eligible nurses and health care providers is an effort to uphold our commitment to public health and lead a national charge to change the course of the pandemic. As nurses, it is our ethical obligation to protect ourselves so we can protect others. We have seen over the course of history that vaccines save lives and the current crisis is no different. We must invest in health and be central figures in dispelling misinformation and promoting science.”

### JOINT STATEMENT

**July 26, 2021 (Washington, DC)** - Due to the recent COVID-19 surge and the availability of safe and effective vaccines, our health care organizations and societies advocate that all health care and long-term care employers require their workers to receive the COVID-19 vaccine. This is the logical fulfillment of the ethical commitment of all health care workers to put patients as well as residents of long-term care facilities first and take all steps necessary to ensure their health and well-being.

Because of highly contagious variants, including the Delta variant, and significant numbers of unvaccinated people, COVID-19 cases, hospitalizations and deaths are once again rising throughout the United States.<sup>1</sup> Vaccination is the primary way to put the pandemic behind us and avoid the return of stringent public health measures.

Unfortunately, many health care and long-term care personnel remain unvaccinated. As we move towards full FDA approval of the currently available vaccines, all health care workers should get vaccinated for their own health, and to protect their colleagues, families, residents of long-term care facilities and patients. This is especially necessary to protect those who are vulnerable, including unvaccinated children and the immunocompromised. Indeed, this is why many health care and long-term care organizations already require vaccinations for influenza, hepatitis B, and pertussis.

***We call for all health care and long-term care employers to require their employees to be vaccinated against COVID-19.***

We stand with the growing number of experts and institutions that support the requirement for universal vaccination of health workers.<sup>2,3</sup> While we recognize some workers cannot be vaccinated because of identified medical reasons and should be exempted from a mandate, they constitute a small minority of all workers. Employers should consider any applicable state laws on a case-by-case basis.

Existing COVID-19 vaccine mandates have proven effective.<sup>4,5</sup> Simultaneously, we recognize the historical mistrust of health care institutions, including among many in our own health care workforce. We must continue to address workers' concerns, engage with marginalized populations, and work with trusted messengers to improve vaccine acceptance.

As the health care community leads the way in requiring vaccines for our employees, we hope all other employers across the country will follow our lead and implement effective policies to encourage vaccination. The health and safety of U.S. workers, families, communities, and the nation depends on it.

### **About the American Academy of Nursing**

The American Academy of Nursing serves the public by advancing health policy through the generation, synthesis, and dissemination of nursing knowledge. Academy Fellows are inducted into the organization for their extraordinary contributions to improve health locally and globally. With more than 2,900 Fellows, the Academy represents nursing's most accomplished leaders in policy, research, administration, practice, and academia.
