Program Description

Pediatric Ophthalmology and Strabismus The Vision Center at Children's Hospital Los Angeles has established a one-year AUPO FCC compliant fellowship in pediatric ophthalmology and strabismus in association with the University of Southern California Eye Institute and Keck School of Medicine. An optional second year is offered. The fellowship is designed to provide an in-depth experience in the care and management of all aspects of pediatric ophthalmology including, but not limited to, strabismus, anterior segment disease, retinopathy of prematurity, neuro-ophthalmology, oculoplastics, and ocular oncology. The program is also designed to provide a broad research experience in pediatric ophthalmology and strabismus. The fellowship is a full-time commitment. Upon completion of the program, fellows will be adequately prepared for an academic career in pediatric ophthalmology. A stipend is provided. The fellow divides his/her time between the Los Angeles County + USC Medical Campus and Children's Hospital Los Angeles, with the majority of time spent at Children's Hospital. Fellowship applicants must have completed an accredited residency in ophthalmology, and they must be Board eligible in ophthalmology. A California medical license is required in order to begin the fellowship, and it is possible to apply for a California medical license online. To receive more information about the requirements necessary for obtaining a California medical license contact: The Medical Board of California 1426 Howe Avenue, Suite #54 Sacramento, CA 95825-3236 Phone: (916) 263-2499 www.medbd.ca.gov Additional requirements: Curriculum Vitae Medical Student Performance Evaluation (AKA-Dean's Letter) Medical School transcripts International Prospective Fellows: Preference is given to applicants who are committed to a career in academic medicine and can furnish proof of an academic appointment in their country following completion of the fellowship. Fellows from foreign countries must satisfy regulations required by the Medical Board of California.

Program Description

The Loma Linda University Eye Institute offers a fellowship opportunity for candidates interested in receiving training in the care of children with eye and vision problems as well as adults with strabismus. Through close daily interaction with faculty, the fellow will gain broad clinical training in the practice of pediatric ophthalmology, including the diagnosis and treatment of: •amblyopia, •strabismus, •pediatric glaucoma, •pediatric cataract surgery, •nasolacrimal duct procedures, •congenital ptosis, •retinopathy of prematurity, •and pediatric ocular trauma. In addition, fellows are involved in all aspects of the diagnosis and treatment of adults with strabismus. The pediatric ophthalmology fellow serves as the chief liaison for the pediatric ophthalmology consult service at Loma Linda University Children's Hospital and participates in ocular trauma call for the Loma Linda University Medical Center as well as the children's hospital. Fellows attend and participate in educational conferences such as departmental grand rounds, journal clubs and invited lectures as well as a monthly pediatric ophthalmology service conference. Numerous opportunities for teaching through lectures and direct interactions with ophthalmology residents, as well as for the pursuit of clinical research are available to our fellows. The LLU Pediatric Ophthalmology Fellowship is a one-year program approved by the AUPO Fellowship Compliance Committee. A full PGY-5 stipend, including benefits, is provided. Applicants must obtain an unrestricted California Medical License for billing and credentialing purposes. Applicants must register for the ophthalmology fellowship match online through SF Match. The deadline for completing the application process is October 30 of the year prior to the start of the fellowship.

Title_Position Residency coordinator

Program Director Euna Koo, MD

Chair Jeffrey Goldberg, MD, PhD

Training Sequence Clinical + Optional Research

Application Deadline 8/31/18

Years of Training 1

Interview Date 9/6/18 and 10/18/18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

Our goal is to train ophthalmologists who will be able to care for children with simple to complex ocular and visual disorders, to provide the knowledge and surgical skill to treat patients of all ages who present with complex strabismus, and to understand how to conduct research in a collaborative environment. Graduates of the fellowship will be well prepared to pursue an academic career or pursue a career dedicated to clinical excellence and lifelong teaching and learning. FACULTY: Deborah Alcorn MD is Co-Chief of Division of Ophthalmology at Lucile Packard Children's Hospital and Associate Professor of Ophthalmology. She completed a fellowship in Ocular Genetics with Irene Maumane and has special expertise in the diagnosis and treatment of children with genetic conditions with ophthalmic manifestations. Scott Lambert MD is Co-chief of Division of Ophthalmology at Lucile Packard Children's Hospital and Professor of Ophthalmology. As principal investigator of the Infant Aphakia Treatment Trial, he has extensive experience in the design and implantation of collaborative clinical trials and has extensive experience with PEDIG. Euna Koo MD Assistant Clinical Professor of Ophthalmology is the Fellowship Director. She received her fellowship at Boston Children's Hospital and has special interest in advanced surgical techniques for the treatment of strabismus Darius Moshfeghi MD Professor of Ophthalmology has additional fellowship training in pediatric vitreoretinal diseases and has pioneered the use of teleophthalmology to screen infants at risk for ROP. Shannon Beres MD is a board certified pediatric neurologist with additional fellowship training in both neuroophthalmology and pediatric neuroophthalmology Prithvi Mruthyunjaya MD Associate Professor of Ophthalmology is fellowship trained in vitreoretinal disorders and had additional fellowship training in Ocular oncology and has special interest in the multimodality treatment of Retinoblastoma PROGRAM The Fellow will see pediatric patients in the clinics of Lucile Packard Children's Hospital and will see adult strabismus patients at the Byers Eye Institute and Stanford University. Rotations will be arranged so that the Fellow has continuity in preoperative, intraoperative and postoperative treatment. The Fellow will have ample opportunity to gain experience treating the following conditions: Horizontal and vertical strabismus, Paralytic and restrictive strabismus, Transposition procedures, Use of Botox in Adults and Children, Amblyopia treatment, Infantile and pediatric cataracts treated by lensectomy, primary IOL secondary IOL, sutured IOL, intraoperative YAG laser, Genetic disorders, Craniofacial disorders, Infantile and juvenile glaucoma with experience in goniotomy, trabeculotomy (all types) setons, Congenital ptosis, Orbital dermoids, Nasolacrimal obstruction treated by probe, intubation and DCR, Limbal dermoid, Peters syndrome, Optical iridectomy, Pediatric, uveitis, ROP screening and treatment including laser and intravitreal anti VEGF therapy, External disease, CNS neoplasms affecting visual pathways, Congenital structural anomalies, Optic neuropathies, Retinal dystrophies and degenerations, Keratoconus, Refractive errors, Infectious retinitis . Unique opportunities offered to Fellow. 1. Research Opportunity – Stanford University is a major research university with strong programs in neuroscience, regenerative science and cancer biology. Fellows are encouraged and will be given opportunity to develop collaborative research projects with colleagues in all the clinical and Basic Science Departments. There are opportunities for the motivated fellow to initiate research

Program Director Robert Enzenauer, MD, MPH

Chair Naresh Mandava, MD

Training Sequence Clinical + Research

Application Deadline 9/7/18

Years of Training 1

Interview Date 11/2/2018 and 11/5/2018

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

On behalf of our pediatric ophthalmology faculty, thank you for your interest in our pediatric ophthalmology and strabismus fellowship program. Our website contains the most up-to-date information we have, so that's the best place for you to check: www.eyeinstitute.org. You will find information about our faculty, new facility, and under Education, about our fellowship program in Pediatric Ophthalmology which complies with guidelines set forth by the Fellowship Compliance Committee of the AUPO and by the AAPO&S. This 12-month fellowship is approved for one person and takes place primarily (at least 50% of his/her time) at The Children's Hospital (TCH) with less intense experiences at Denver Health Medical Center (DHMC), the Veterans Administration Medical Center (VAMC), and the University of Colorado Hospital (UCH). The fellow will rotate through the services of Doctors Robert Enzenauer and Rebecca Braverman. Both doctors are fellowship trained pediatric ophthalmologists who are voting members of AAPO&S and meet the requirements for training guidelines for AAPO&S. The fellow will participate in the Pediatric and Motility clinics and surgery at TCH, DHMC, VAMC and the UCH. Research opportunities abound and each fellow is expected to complete one or more projects. Upon completion of the fellowship, the fellow will be eligible for membership in AAPO&S after two (2) years of clinical practice that consists of at least 75% pediatric ophthalmology and strabismus. The exposure to adult and pediatric motility and pediatric ophthalmic disorders within this busy university-based practice will fully prepare a fellow for the practice of pediatric ophthalmology. You must be able to be fully licensed in the state of Colorado to be considered for our fellowship programs including successful completion of all three steps of the USMLE. The website from the Colorado Board of Medical Examiners <http://www.dora.state.co.us/medical/index.htm> has detailed information about licensing requirements for the state of Colorado. The specific requirements for international medical graduates include, but are not limited to, graduation from a medical school approved by the Colorado Medical Board, 36 months of clinically-based postgraduate training in the United States or Canada, and one of the following: FLEX Exam (must also have passed the ECFMG exam), state written exam, or successful completion of all three steps of the USMLE. If accepted, candidates must also pass a criminal background investigation (criteria specified in University background investigation policies). The CU School of Medicine recognizes that residents enrolled in its programs are trainees, not employees. As such, all applicants also must be able to meet conditions of the institutional resident training agreement. Specifically, residents in our program must be a U.S. citizen, lawful permanent resident, refugee, asylee, or possess the appropriate documentation to allow the resident to legally train at the University of Colorado Denver School of Medicine. If, after reviewing these websites and requirements, you feel you qualify for our fellowship, please submit an application through the San Francisco Matching Program (<http://sfmatch.org>). We ask that you also submit a copy of your USMLE score report and a brief CV, preferably via email to ophthalmology.residency@ucdenver.edu. Our application deadline is August 31, 2014 for a July 1, 2015 fellowship start date. Good luck to you.

Title_Position Administrator

Program Director Marlet Bazemore, MD, MPH

Chair Mohamad Jaafar, MD

Training Sequence Clinical + Research

Application Deadline

Years of Training 1

Interview Date September 26 - October 24 - Nov 28

Positions Available Positions Available to Start in July, 2019 : 3

Program Description

Our program is the original Pediatric Ophthalmology training program, created by Dr. Marshall Parks after his work with the first ophthalmologist who dedicated his practice to children, Dr. Frank Costenbader, here in Washington, DC. We strive every day to continue their esteemed legacy of both outstanding patient care and the education of the next generation of pediatric ophthalmology leaders. Our fellows find that having three fellows working together constitutes a critical mass that provides for a wonderful mix of camaraderie and professional interaction, further enhancing their education as well as their overall experience. Each year, we offer three fellowship positions. Two positions are offered to US/Canadian graduates, and one is preferably offered to a qualified international candidate, committed to raising the standard of eye care for children in his or her home country. Washington, D.C is an exciting community in which to live and work, with many cultural and recreational opportunities. It is also an area rich with ophthalmic educational opportunities, which we incorporate into your fellowship experience. Besides the monthly Division of Ophthalmology Grand Rounds at Children's National, you will also attend both the monthly Walter Reed Pediatric Ophthalmology Conference, which has patients referred from around the world for evaluation and treatment, and the combined George Washington University/Uniformed Services University monthly Grand Rounds. The National Eye Institute, with their world class Uveitis and Genetics services, is available to us for consultation, meetings, and coordinated care of patients. Journal Clubs take advantage of internationally known guest speakers, who practice in Washington, D.C., Baltimore, Philadelphia, and throughout the country. Fellows participate in genetics, cornea, retina and plastics clinics that are run by fellowship-trained, nationally recognized experts in these fields. Additionally, fellows will have the opportunity to participate in our annual spring humanitarian trip to the Dominican Republic. As a graduate of the Children's National Fellowship, you will be eligible for membership in the Costenbader Society and will be able to attend the annual meeting as a fellow. This is an opportunity, in a less formal setting, to meet and discuss cases with today's leaders in pediatric ophthalmology. Costenbader Society membership is a unique opportunity treasured by former fellows, as part of the Parks and Costenbader legacy. In addition, you will attend the annual meeting of the American Association of Pediatric Ophthalmology and Strabismus (AAPOS), the Wills Pediatric Ophthalmology Day in Philadelphia, and a Board Review Course if desired. The Costenbader Society also makes available two unique educational experiences for our Fellows. Each year internationally recognized specialists visit our program as the Angeline Parks Visiting Professor and as the Distinguished Alumni Visiting Professor. These are excellent opportunities to spend two days (including a small private dinner) with leading figures in our profession. It is our goal to provide you a busy, rewarding year in which you will experience tremendous growth and satisfaction and that will leave you confident and prepared to handle all facets of ophthalmic care affecting children. Applicants are asked to submit a photograph.

Application Deadline 9/15/18
Interview Date TBA

Program Description

The fellowship in pediatric ophthalmology and strabismus is for one year. It is a comprehensive, clinically oriented fellowship with direct exposure to clinical material in the practice of the fellowship preceptors. The fellow participates with the faculty members in the evaluation and treatment of children with a wide variety of ocular pathology and adults with complex strabismus, including strabismus surgery with adjustable sutures. Approximately three days of the week are spent in clinic, with two days in the operating room. The fellow also participates in the screening and treatment of retinopathy of prematurity at the NICU at the Jackson Memorial Hospital with Dr. Audina Berrocal and in the pediatric glaucoma clinic with Dr. Peter Chang. In addition, the fellow observes exams under anesthesia of young children with retinoblastoma with Dr. William Harbour and electroretinograms under anesthesia with Dr. Byron Lam. Anterior segment surgery is performed primarily under the supervision of Dr. Peter Chang. The fellow's responsibilities include lecturing to ophthalmology residents approximately three times a year. In addition, the fellow participates at grand rounds approximately two times a year and organizes a pediatric journal club six times a year. The fellow also attends faculty lectures on pediatric ophthalmology and strabismus. Fellows are expected to participate in a research project and present their results at the resident's day meeting in June. They are also encouraged to submit their work to national meetings. Salary and benefits will be commensurate with the other fellowships offered through the Bascom Palmer Eye Institute. You must have a Florida state medical license before beginning your fellowship.

Application Deadline 12/7/18

Years of Training 1

Interview Date 10/26/18; 11/9/18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

Emory Eye Center offers a one year fellowship that is a comprehensive program in pediatric ophthalmology and strabismus designed to prepare the physician for a career in academic medicine or private practice. Fellows receive in depth exposure not only to common problems like amblyopia and strabismus, but also complex problems like tumors, complex anterior segment pathology, pediatric glaucoma, pediatric cataracts, ROP, pediatric oculoplastic disease and complex adult strabismus. The surgical volume is very high. The position is funded and offers benefits. Visit www.eyecenter.emory.edu for list of additional required documents. Additional Application Requirements The following documentation is required in addition to your C.A.S. application form. Documents must be sent electronically): • Current Photograph • Letter from chairman (if not included in your C.A.S. application) • Letter from residency director (if not included in your C.A.S. application) • Visit each subspecialty page listed above for fellowship description in the following areas: cornea, glaucoma, pediatrics, or retina. Start date will be July 7, 2016.

Interview Date 10/8/18 and Alternate 11/2/18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

The Pediatric Ophthalmology and Strabismus Fellowship at the University of Iowa Department of Ophthalmology is part of a long tradition of educational excellence in ophthalmology. The fellowship program has been in existence for over 40 years. Our fellows actively participate along side faculty in all aspects of medical and surgical treatment of pediatric eye disease and adult strabismus. Our fellows take an active role in all teaching conferences and journal clubs. They also participate in department wide grand rounds, lectures and clinical conferences. They are active in clinical teaching of residents, medical students and orthoptic students. Our fellows participate in on-going clinical research or initiate their own research projects and present their research at local and national meetings. Thanks to generous support from the William E. Scott Professorship for Pediatric Ophthalmology Education, we hold monthly pediatric ophthalmology educational conferences. These conferences frequently include visiting professors in pediatric ophthalmology. Because fellows function as junior faculty, fellows are required to obtain a Permanent Iowa State Medical License. Foreign applicants need to be eligible for an H1B Visa or green-card if applicable. See: Iowa State Medical License <http://www.medicalboard.iowa.gov/> The University of Iowa Hospitals and Clinics are at the heart of Iowa City, a thriving Midwestern university town. Iowa City is routinely ranked as one of the safest, healthiest, most livable, most educated, and most economically viable cities in the country.

Program Description

The Pediatric Ophthalmology and Adult Strabismus Fellowship Program at the Illinois Eye and Ear Infirmary is a one-year clinical fellowship approved by the Association of University Professors of Ophthalmology (AUPO) Fellowship Compliance Committee and the American Association for Pediatric Ophthalmology and Strabismus (AAPOS). The fellowship is in the setting of a full service ophthalmology department with over 100 faculty members. The Section of Pediatric Ophthalmology and Strabismus at UIC is comprised of 6 full-time faculty members, 6 part-time faculty members and three orthoptists. The fellow will have extensive exposure to all aspects of pediatric ophthalmology and strabismus with emphasis in adult strabismus with advance surgical techniques, ophthalmic genetics and intraocular surgery. The fellowship will also provide broad exposure to pediatric cataract, pediatric glaucoma, oculoplastic surgery and evaluation and treatment of retinopathy of prematurity. There is also participation at the UIC Craniofacial Center, as well as in the neurofibromatosis and pediatric neuro-ophthalmology clinics. The fellow is expected to participate in the annual pediatric ophthalmology and strabismus course, be involved in resident and medical student education and coordinate journal clubs. Fellows are encouraged to participate in on-going research projects and/or initiate their own.

Training Sequence Clinical + Research

Application Deadline 9/16/18

Years of Training 1

Interview Date 11/12/18

Positions Available Positions Available to Start in July, 2019 : 2

Program Description

The clinical experience gained from our program includes broad exposure to every aspect of pediatric ophthalmology that would be expected at a leading children's hospital, including state-of-the-art pediatric cataract, glaucoma and oculoplastic surgeries, plus evaluation and treatment of complex adult strabismus. Fellows have access to advanced equipment including a RetCam and digital video for recording surgical cases. Our office includes a scanned medical record system so records are available securely online. The fellows interact closely with, and supervise, two residents: one rotating from Harvard Medical School (Massachusetts Eye and Ear Infirmary), the other from Boston Medical Center. Nights and weekends on call are shared with the rotating residents and supervised by faculty. Educational activities include regular conferences and special lectures, including invited speakers from national and international locales. Fellows are required to undertake a research project under the guidance of a faculty member, to present the results at a national meeting, and to submit a manuscript prior to completion of the fellowship year. Our former fellows include Mohammed Jaafar, MD, Chair of Ophthalmology at Washington Children's National Hospital, Washington D.C., Douglas Fredrick, MD, Clinical Professor at Stanford Children's Hospital, San Francisco, CA, Monte Mills, MD, Chair of Ophthalmology at Children's Hospital of Philadelphia, and Richard Levy, MD, head of Pediatric Ophthalmology at Cornell University. A full PGY-5 stipend, including benefits, is provided. Fellows are encouraged to defray the cost of the stipend through external support, such as a Heed Ophthalmic Foundation award, when possible. Applicants must obtain a full Massachusetts Medical license for billing and credentialing purposes. Our fellowship program is approved by the AUPO Fellowship Compliance Committee. Only graduates of AUPO-approved fellowships may apply for AAPOS (American Association for Pediatric Ophthalmology and Strabismus) membership after graduation.

Program Director Iason Mantagos, MD

Chair David Hunter, MD, PhD

Training Sequence Clinical + Research

Application Deadline 9/16/18

Years of Training 1

Interview Date 11/12/18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

The clinical experience gained from our program includes broad exposure to every aspect of pediatric ophthalmology that would be expected at a leading children's hospital, including state-of-the-art pediatric cataract, glaucoma and oculoplastic surgeries, plus evaluation and treatment of complex adult strabismus. Fellows have access to advanced equipment including a RetCam and digital video for recording surgical cases. Our office includes a scanned medical record system so records are available securely online. The fellows interact closely with, and supervise, two residents: one rotating from Harvard Medical School (Massachusetts Eye and Ear Infirmary), the other from Boston Medical Center. Nights and weekends on call are shared with the rotating residents and supervised by faculty. Educational activities include regular conferences and special lectures, including invited speakers from national and international locales. Fellows are required to undertake a research project under the guidance of a faculty member, to present the results at a national meeting, and to submit a manuscript prior to completion of the fellowship year. Our former fellows include Mohammed Jaafar, MD, Chair of Ophthalmology at Washington Children's National Hospital, Washington D.C., Douglas Fredrick, MD, Clinical Professor at Stanford Children's Hospital, San Francisco, CA, Monte Mills, MD, Chair of Ophthalmology at Children's Hospital of Philadelphia, and Richard Levy, MD, head of Pediatric Ophthalmology at Cornell University. A full PGY-5 stipend, including benefits, is provided. Fellows are encouraged to defray the cost of the stipend through external support, such as a Heed Ophthalmic Foundation award, when possible. Applicants must obtain a full Massachusetts Medical license for billing and credentialing purposes. Our fellowship program is approved by the AUPO Fellowship Compliance Committee. Training Sequence Clinical + Research

Application Deadline 9/25/18

Years of Training 1

Interview Date TBD

Positions Available Positions Available to Start in July, 2019 : 2

Program Description

Fellowship in Pediatric Ophthalmology and Adult Strabismus We strive to maintain the same enjoyable atmosphere in the fellowship that we experienced ourselves during a most productive time of our own careers. One-on-one contact with faculty - learning, operating, and teaching in the field of pediatric ophthalmology and strabismus – takes place within a full service ophthalmology department. The Wilmer Institute is directly connected to the Johns Hopkins Hospital [JHH] including the newly opened Charlotte Bloomberg Children's Hospital at JHH. We offer 1 or 2, full-time, one-year fellowship positions in Pediatric Ophthalmology and Adult Strabismus at The Krieger Children's Eye Center at the Wilmer Institute. We have trained over 50 fellows since 1979 from United States and abroad. They have come from a wide cross-section of residency programs, and a few have come from private practice to start a new career. About 40% are in private practice, with the other 60% in academic positions, including four full professors and five department chairs. With 4 full-time clinical faculty in our Center, 2 full-time Ph.D. investigators, and 3 orthoptists, we provide well-rounded exposure to both the clinical and academic sides of pediatric ophthalmology and strabismus. Dr. David Guyton, our Division Director from 1978 - 2011 and current fellowship director, has primary interests in strabismus, ophthalmic optics, and ophthalmic instrumentation (currently vision screening devices). Dr. Michael Repka, current Division Director, and with the Division since 1985, has broad interests in pediatric ophthalmology, clinical trials, and pediatric neuro-ophthalmology, as well as in strabismus, cataract, and retinopathy of prematurity. Dr. Hee-Jung Park joined our Center in 2009, following her fellowship at UCLA. Dr. Anya Trumler joined our faculty in 2011 with an interest in pediatric glaucoma. Time spent with Dr. Guyton will be mostly in strabismus, with a mix of pediatric and adult cases. The adult strabismus cases, comprising two-thirds of Dr. Guyton's practice, provide the fellow a unique opportunity to become familiar with more advanced diagnostic and treatment modalities in strabismus. Adult strabismus is more surgically oriented than pediatric ophthalmology, because of the fewer visits needed to manage amblyopia. Exposure to adult strabismus cases allows the fellow to become comfortable and familiar with surgical techniques needed for re-operations, as well as crucial diagnostic techniques when diplopia is present, such as the Lancaster red-green test. More subtle problems not always easily appreciated in children, such as those of torsional and vertical strabismus, are magnified in adults, and mastery of management techniques in such situations allows for optimal treatment to be applied to all age groups. Time spent with Dr. Repka will provide exposure to retinopathy of prematurity, pediatric neuro-ophthalmology, and other areas of pediatric ophthalmology including a large proportion of pediatric strabismus, ROP, and cataract. Time spent with Drs. Park and Trumler will be a blend of the experiences with Drs. Guyton and Repka. The fellow is involved in 5 to 8 surgical cases each week, taking the surgeon's role in about half of these. There is good experience in a wide variety of strabismus surgery, with heavy exposure to hang-back surgery, cyclovertical surgery, and adjustable sutures in both children and adults. In addition, experience is gained in congenital cataract surgery, nasolacrimal disorders, ROP screening and treatment and pediatric glaucoma. We are privileged to have our pediatric and adult facilities combined in a unified modern child-friendly Center providing excellent exposure to the wide variety of pediatric eye diseases as well as strabismus in adults. Consults are seen with the faculty throughout the Johns Hopkins Hospital

Interview Date October 24, November 2

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

This fellowship will expose you to the full spectrum of our specialty, including direct teaching by world class experts in adult and pediatric strabismus, pediatric anterior segment, pediatric neuro-ophthalmology, and pediatric glaucoma, as well as 24 other subspecialty ophthalmologists that comprise the Department of Ophthalmology. This one-year fellowship includes complex strabismus (superior oblique surgery, Faden procedures, transpositions, adjustable and non-adjustable techniques and Botox), ROP evaluation and treatment, amblyopia, pediatric glaucoma and cataracts, ptosis, nasolacrimal disorders and pediatric neuro-ophthalmologic conditions. This position is compensated at the PGY-5 level, with 15 days of vacation, no call, and paid conference time for up to 15 days during the academic year. The fellow's responsibilities will focus on surgery (> 500 year of our one fellow), pre- and postoperative evaluations, organizing bimonthly journal clubs, and presenting 2 grand rounds each year. Dedicated non-clinical research time is provided, with access to a vast range of topics in both clinical and laboratory science.

Interview Date 10/1/18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

The pediatric ophthalmology fellowship at Washington University School of Medicine Department of Ophthalmology and Visual Sciences is a one year program based at St. Louis Children's Hospital. The fellowship is fully accredited by the American Association for Pediatric Ophthalmology and Strabismus and by the AUPO Fellowship Compliance Committee. The Eye Center at Children's Hospital is a comprehensive pediatric medical and surgical eye unit. The surgical practices is high volume, providing a varied and extensive experience for fellows and residents in the following disorders: childhood and adult strabismus pediatric glaucoma developmental cataracts pediatric refractive surgery diseases of the lacrimal system retinopathy of prematurity retinoblastoma ptosis/oculoplastic/orbital disorders pediatric neuro-ophthalmic disorders pediatric eye trauma. The Eye Center also houses: an Infant Electrophysiology and Eye Movement Laboratory video and photography center. The Eye Center participates in the: Craniofacial Deformities Team Neurofibromatosis Team Downs Syndrome Clinic Cerebral Palsy Center. Attending ophthalmologists, optometrists, orthoptists, fellows, residents and medical students in the Eye Center meet in a weekly Pediatric Ophthalmology Conference. The session includes reviews of pertinent literature, case presentations, and oral quizzes. A combined Pediatric Ophthalmology/ Neuroradiology Conference convenes once a month to review imaging studies of the brain and orbit obtained from our Eye Center children. Department of Ophthalmology and Visual Sciences Grand Rounds are held weekly and include lectures from research faculty members, clinical faculty members, and case presentations. The Department of Ophthalmology also hosts a monthly journal club. Fellows in pediatric ophthalmology are encouraged to design, complete and present a clinical research project during their year at the Center, for presentation at the annual AAPOS meeting. Those who wish to complete a separate basic science/research fellowship will spend approximately 50% of time with clinical or surgical responsibilities, and 50% of time in the laboratory. Opportunities are available for laboratory studies of strabismus monkeys in the McDonnell Science Building. Clinical Fellows in pediatric ophthalmology who are graduates of residency programs in the United States or Canada receive a PGY 5 stipend per year, and must obtain a permanent license to practice medicine from the Missouri Board of Healing Arts. All International Medical Graduates must be certified by the Educational Commission for Foreign Medical Graduates (ECFMG) and provide evidence of having completed three (3) years postgraduate training in a program which is approved and accredited to teach post-graduate medical education by the Accreditation Council on Graduate Medical Education of the AMA in one (1) recognized specialty area of medicine. These requirements must be met before applying for the clinical fellowship position. Supplemental Materials to complete the application: a complete medical school transcript and a photo.

Program Description

Montefiore Medical Center is the premier hospital system in the Bronx. The Children's Hospital at Montefiore is an acclaimed, US News and World Report nationally ranked children's hospital providing health care for most of the pediatric population in the borough. In addition, patients from around the country and the world seek care at our institution. The Department of Ophthalmology and Visual Sciences at the Albert Einstein College of Medicine/Montefiore Medical Center is a fully staffed and equipped division that offers comprehensive eye care in all subspecialties with multiple practice sites, and sees over 100,000 visits a year. The Pediatric Ophthalmology division has 4 full time physicians, and a dedicated pediatric optometrist and technician who treat hundreds of patients a week with a wide variety of ophthalmic diseases and works closely with the other departmental divisions. In addition, there is an active consultation service with the Children's Hospital and many patients are managed in a multidisciplinary fashion with the vast subspecialty groups including craniofacial, genetics, neurology and hematology/oncology. The breadth and scope of disease entities and surgeries are unparalleled in the tri-state area. The pediatric ophthalmology fellow will have the opportunity to be trained in pediatric eye disease and its systemic correlations, pediatric glaucoma, cataract, and cornea, as well as the evaluation and management of pediatric and adult strabismus. There is an active ROP service that manages premature infants at two locations with a joint pediatrics and retina team, and the fellow will be an active participant in this area. The successful candidate will have a strong interest in comprehensive pediatric eye care, excellent surgical skills, and a commitment to caring for an underserved population. Fellows are entitled to apply for low cost housing located adjacent to the hospital where many of the housestaff and fellows reside. They are also provided with a stipend to cover three meals a day, free parking at all practice locations, and a meeting allowance for attendance at national conferences.

Training Sequence Clinical + Optional Research

Application Deadline 9/1/18

Years of Training 1

Interview Date 19-Oct-18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

This one year fellowship is offered to one individual per year. The training is overseen by five full-time pediatric ophthalmologists and provides extensive exposure to clinical and surgical aspects of pediatric ophthalmology and adult strabismus. Numerous national and international referrals span the spectrum of ocular diseases in children and ocular aspects of systemic, genetic and neurological disorders. The fellows perform ROP rounds and participate in a twice monthly retinal dystrophy clinic. The training is conducted mainly at the Cole Eye Institute which provides exposure and interactions to fellows and staff in other subspecialties. Fellows perform a large number of varied surgical cases including strabismus, cataracts, and oculoplastics. There are ample opportunities to expand the fellow's clinical research interests into other areas such as pediatric glaucoma, ocular and orbital oncology, pediatric neuro-ophthalmology, eye movement disorders and pediatric oculoplastics. One major clinical or basic science project is assigned to the fellow at the beginning of the academic year to be presented at AAPOS and at ARVO. Some of our fellows have taken on academic jobs at excellent university centers while others are in private practice.

Application Deadline 10/5/18
Interview Date 11/8/18 & 11/9/18

Program Description

The Pediatric Ophthalmology Fellowship at Wills Eye Hospital, Thomas Jefferson University is one of the world's oldest. Our staff of 12 pediatric ophthalmologists will provide the fellow with a unique experience covering virtually every aspect of pediatric ophthalmology including pediatric and adult strabismus, ocular genetics, pediatric anterior segment, oculoplastics, retinoblastoma (with acclaimed ocular oncologists Drs. Shields) and retinopathy of prematurity. The fellow will be involved in all aspects of clinical and surgical care, as well as the extensive didactic programs and conferences available at Wills, electrophysiology, and journal clubs. The fellow will have the opportunity to participate in outreach programs to provide care to underserved children from low economic status. Fellows are offered a one week funded visit to a third world country on a surgery mission. Research supervision will be provided for projects that may include clinical studies, public health initiatives, bench laboratory work or animal studies. Our program accepts applications from U.S. or Canadian ophthalmology residency graduates as well as international candidates who have passed all three parts of USLME and also have ECFMG certification. Set in the midst of one of the largest ophthalmology residencies in the world, with over 200 staff ophthalmologists representing some of the most highly acclaimed names in ophthalmology, the fellowship provides access to enormous resources, state of the art clinical and surgical care, and a powerful educational experience.

Program Description

The Pediatric Ophthalmology and Adult Strabismus Fellowship at UT Southwestern Medical Center and Children's Health Children's Medical Center Dallas offers an outstanding opportunity for the highly qualified individual to obtain extensive, high-volume medical and surgical training in all aspects of pediatric ophthalmology and adult strabismus. This fellowship is developed to provide a comprehensive experience in treating a broad range of medical and surgical problems in strabismus, and children's eye diseases including: amblyopia and strabismus, pediatric neuro-ophthalmology, retinoblastoma, pediatric cataracts, pediatric glaucoma, retinopathy of prematurity and pediatric oculoplastics. Children's Health Children's Medical Center Dallas serves as the primary pediatric teaching facility at our institution. The ophthalmology service at Children's Health currently employs three full-time academic orthoptists, and several additional ancillary support staff. Approximately 20,000 office visits and 1,700 surgical procedures are provided by the ophthalmology service annually. The fellow is involved in all aspects of pediatric ophthalmology at Children's Health, including examination of patients in clinics, consults, surgery, and resident teaching. Exposure to adult strabismus evaluation and surgery is also an integral part of the fellowship at participating adult institutions, offices, and day-surgery facilities. The fellow works closely with the fellowship sponsors, David R. Weakley, Jr., M.D., and Serena Wang, M. D., as well as community pediatric ophthalmologists on the staff of Children's Health, including oculoplastics, neuro-ophthalmology, glaucoma, cornea and retina. Additionally, the fellow will work with full-time faculty in other ophthalmologic subspecialties at Children's Health in the clinics and operating rooms. Full-time and clinical faculty are actively involved in numerous ongoing clinical research studies. Candidates must be eligible to obtain a Texas State Medical License or Physician in Training (PIT) permit from the Texas Medical Board.

Interview Date 20-Oct-18

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

Pediatric Ophthalmology & Strabismus The John A. Moran Eye Center at the University of Utah offers a one-year Pediatric Ophthalmology & Strabismus Fellowship Program. We accept one new fellows each year and are currently accepting applications for 2019-2020 (application deadline is September 1, 2018). The position begins July 1, 2019 and continues through June 30, 2020. As with most ophthalmology fellowship programs, ours is not an approved PGY-5 ACGME position. It is however, affiliated with an ACGME accredited ophthalmology residency program and is AUPO compliant. The University provides Malpractice insurance as well as medical, dental, and other benefits. The Pediatric Ophthalmology & Strabismus division at The John A. Moran Eye Center offers an intensive one year clinical fellowship which provides comprehensive training in both the medical and surgical management of a wide variety of pediatric ophthalmology & strabismus conditions. In addition, the fellow will have an opportunity to participate in ongoing clinical trials, investigator sponsored studies and epidemiologic projects, and formulate study in an area of particular interest. Fellows can therefore expect to see conditions in the vision development of infancy and childhood, neonatal ophthalmology including retinopathy of prematurity, genetics, electro diagnostic testing, ocular manifestations, pediatric ocular trauma to name just a few. If selected for this position:

- You must attend a scheduled orientation where we will explain in detail all benefits of the program as well as departmental policies and procedures and requirements.
- You will be required to obtain a Utah Physicians License, a Utah Controlled Substance License, and a fee exempt DEA license. You will also be required to obtain privileges with the University Hospital, Primary Children's Medical Center, and Veterans Affairs Medical Center. We will work closely with you to meet these requirements. You will be expected to take faculty call for the VAMC thus privileges will have to be obtained there as well. The VAMC can ONLY hire US Citizens. You will work with our distinguished pediatric staff, Robert O. Hoffman, MD, Professor; David C. Dries, MD, Associate Professor; Marielle (Mimi) P. Young, MD, Assistant Professor; Leah A. Owen, MD, PhD, Assistant Professor, Griffin J. Jardine, MD, Assistant Professor & Julia Byrd, MD, Assistant Professor. Application deadline is September 1, 2018. Interviews will be conducted Saturday, October 20, 2018 at the Moran Eye Center only!

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

The Pediatric Ophthalmology and Strabismus fellowship at Seattle Children's Hospital/University of Washington offers a unique opportunity to engage in the full spectrum of medical and surgical treatment of eye disorders in childhood. The Ophthalmology Clinics at Seattle Children's Hospital provide standard eye examinations for children with straightforward eye problems as well as consultations for children with highly complex ocular and medical issues. In addition, the fellow will participate in the wide range of surgical procedures that comprise pediatric ophthalmology and adult strabismus, including simple and complex strabismus, pediatric cataract and glaucoma surgery, nasolacrimal and pediatric oculoplastic procedures, and surveillance and treatment of retinoblastoma and retinopathy of prematurity. The fellow will also have the opportunity to interact with expert vision scientists in the Seattle Children's visual sensory and oculomotor laboratories, participating in behavioral testing, visual evoked potentials, electroretinograms, and formal eye movement studies. Participation in new or ongoing research projects and journal clubs will also be encouraged. Frequently Asked Questions: 1) May I send additional documentation or letters of reference directly to you, as a supplement to those requested by SF Match? Due to the high volume of applicants, we ask that you do not send the program supplemental materials. The program will directly request more information if needed. 2) Do you accept IMG applications? Yes we do, however please note there are eligibility requirements that must be fulfilled by the start of your appointment. Graduates of foreign medical schools must be H-1B eligible before we are able to consider your application. This includes passing USMLE steps 1-3 prior to applying. In rare circumstances, and only with advanced approval of H-1B sponsorship by the GME Office and ISO, will prospective trainees be considered for sponsorship on an H-1B visa. Requests for H-1B visa sponsorship must be approved by the GME Office and ISO prior to ranking an applicant in a national matching program or extending an offer for appointment to an applicant. IMGs who are permanent U.S. residents should refer to the UW Eligibility and Selection Policy here: <http://uwmedicine.washington.edu/Education/Graduate-Medical-Education/Policies-Procedures/Documents/Eligibility%20and%20Selection%20Policy%20FINAL.pdf>

Positions Available Positions Available to Start in July, 2019 : 1

Program Description

This one year fellowship is offered in the Pediatric Ophthalmology section of the Department of Ophthalmology at the Medical College of Wisconsin (MCW). The clinical and surgical fellowship provides an intensive and broad-based clinical experience with the goal of training the fellow to be equipped to be a pediatric ophthalmologist in an academic or private practice environment. Our clinic is based at the Children's Hospital of Wisconsin which is one of the busiest pediatric hospitals in the country. It is a Level 1 Trauma Center and houses 13 inpatient units including a 70 bed Level IV neonatal intensive care unit (NICU). Our pediatric ophthalmology department consists of four full-time pediatric ophthalmology faculty, one pediatric optometrist and three orthoptists. Our team is energetic, engaging and committed to teaching and patient care. The team takes active roles in basic science and clinical research. We also participate in the Pediatric Eye Disease Investigative Group (PEDIG). Our fellow will have the opportunity to participate in these activities. Our fellow will receive a well-rounded experience. Our collaboration with multiple metropolitan area hospitals gives our fellowship program an advantage as we are able to provide our fellow with a very diverse population of patients with a vast variety of eye anomalies, genetic disorders, strabismic disorders, retinopathy of prematurity (ROP), eyelid and tear duct disorders, corneal anomalies and congenital cataracts. We provide care to over 8,000 patients annually in our clinics as well as performing more than 300 inpatient consults. We cover 5 area hospitals to provide high quality ROP care to their NICUs. We perform more than 300 outpatient surgeries each year in addition to inpatient surgeries including laser surgery and Avastin for ROP. We collaborate with our ophthalmology colleagues at the MCW Eye Institute to provide retina, glaucoma, neuro-ophthalmology and oculoplastics care for children. Milwaukee is a wonderful community that has the advantages of an urban, metropolitan city on the shore of Lake Michigan. Milwaukee is the largest city in Wisconsin and the 28th largest nationwide. Milwaukee has a population of nearly 600,000 people and an area covering nearly 96 square miles. The four-county metro Milwaukee area has a population of 1.6 million. Milwaukee has affordable housing of all types, excellent public and parochial schools and minimal traffic. Neighborhoods are known for their variety and character. Milwaukee offers a variety of theater, sports and entertainment venues which include the Marcus Center for the Performing Arts, the Milwaukee Rep Theater, the Milwaukee Art Museum, Public Museum, Harley Davidson Museum, Discovery World and our world class Milwaukee County Zoo. We are home to the Milwaukee Brewers and the Milwaukee Bucks and the World's Largest Music Festival-Summerfest!
