Upon first enrollment in a California school district of a child at a California elementary school, and at least every third year thereafter until the child has completed the eighth grade, the child’s vision shall be appraised by the school nurse or other authorized person under Section 49452. This evaluation shall include tests for visual acuity and color vision; however, color vision shall be appraised once and only on male children, and the results of the appraisal shall be entered in the health record of the pupil. Color vision appraisal need not begin until the male pupil has reached the first grade. Gross external observation of the child’s eyes, visual performance, and perception shall be done by the school nurse and the classroom teacher. The evaluation may be waived, if the child’s parents so desire, by their presenting of a certificate from a physician and surgeon, a physician assistant practicing in compliance with Chapter 7.7 (commencing with Section 3500) of Division 2 of the Business and Professions Code, or an optometrist setting out the results of a determination of the child’s vision, including visual acuity and color vision.

The provisions of this section shall not apply to any child whose parents or guardian file with the principal of the school in which the child is enrolling, a statement in writing that they adhere to the faith or teachings of any well-recognized religious sect, denomination, or organization and in accordance with its creed, tenets, or principles depend for healing upon prayer in the practice of their religion.

(Amended by Stats. 2010, Ch. 512, Sec. 7. Effective January 1, 2011.)
