ASK THE EXPERTS
MAKE THE MOST OF YOUR POSTER

Scientific posters are a popular method of presenting research findings succinctly through a combination of text and graphics. Scientific posters are an essential part of PharmSci 360 and an opportunity to share your research and contribute to the body of pharmaceutical science. They are also a great way to find collaborators, attract recruiters, meet editors, and qualify for awards.

In this virtual session, poster experts will explain how you can create a great poster that gets noticed.

Learning Objectives: Discover the dos and don'ts of poster creation; Learn about presenting data in your abstracts; Review the timeline needed for poster creation.

Live, 1-hour Discussion Thread in the AAPS Community

March 20, 2023 | 11:00 am–12:00 pm ET

Email your questions before the event to axlers@aaps.org.

Click here to discover more about the poster process on the AAPS website.

Now Accepting Early Poster Abstract Submissions! Submission Deadline: May 3, 2023 at 5pm ET

MEET THE EXPERT PANELISTS

Zachary Greenberg

Zachary Greenberg is a Doctoral Student at the University of Florida, College of Pharmacy, Department of Pharmaceutics. His current research focus is centered at the interface of artificial intelligence and molecular engineering, specifically using composite extracellular vesicle systems to mechanistically understand and investigate Cancer Immunotherapy. He is a recipient of both the PharmSci 360 Best Poster Award and the PharmSci 360 Best Abstract Award in 2021 and 2022.

Yi-En Liao

Yi-En Liao is a Ph.D. student in Pharmaceutical Science at the University of North Carolina at Chapel Hill. Yi-En's research focuses on carbohydrate-based drug discovery, especially synthetic heparin-like compounds as potential anti-inflammatory treatments for sepsis. She is the member of AAPS and the awardee of the PharmSci 360 Best Abstract and Best Poster Awards in 2022.
