AAPS Receives Award for Best Pharmaceutical Sciences Organisation

Global Health & Pharma release Biotechnology Awards

ARLINGTON, Mar. 22, 2019 — The American Association of Pharmaceutical Scientists (AAPS) was recently awarded “Best Pharmaceutical Sciences Organisation 2019 - North America” as part of the Biotechnology Awards by Global Health & Pharma (GHP) Magazine.

The Biotechnology Awards honors individuals and organizations active within the biotechnology sector, including chemists, clinicians, researchers, manufacturers, consultants, engineers, and those providing peripherals and specialist services. Awards are given to those who show evidence of extensive expertise and skills, dedication to customer service, and client satisfaction with an ongoing commitment to excellence and innovation.

AAPS is committed to advancing global health through research and innovation, and biotechnology is integral in our mission. According to the 2018 AAPS Salary Survey, 17% of AAPS members who work in industry work in either biopharmaceutics/pharmaceutics or biotechnology. “Biotechnology is a vibrant and growing focus area for AAPS members. We’re fortunate that our members bring that expertise back to AAPS and we’re able to share it with their colleagues through our innovative products and services,” expresses AAPS Executive Director Walter T. Marlowe, MBA, CAE.

In 2018, AAPS launched a new annual event: AAPS PharmSci 360. This conference divides scientific programming equally between chemical and biomolecular compounds to reach the growing and evolving biotechnology sector.

The 2019 PharmSci 360 conference, Nov. 3–6 in San Antonio, TX, will also showcase chemical and biomolecular entities. Registration is now open for this event at www.aapspharmsci360.org.

The full list of Biotechnology Award winners can be found online, and GHP’s press release for the Biotechnology Awards is available. AAPS is honored to be recognized as the “Best Pharmaceutical Sciences Organisation 2019 – North America” by GHP Magazine.
