AAPS Offering Management Training for Pharma Scientists This Month Virtual Workshop Scheduled May 17-18, 2023

Arlington, VA—AAPS is pleased to announce the virtual workshop, “Managing Yourself and Others in the Workplace,” May 17-18, 2023. The program is tailored to scientists working in industry and academic scientific environments who are moving into or already in management.

Consisting of four webinar sessions, topics covered include: giving and receiving constructive feedback; addressing conflict; understanding managers’ responsibilities and their relationship to diversity, equity, and inclusion; and establishing inclusive workplace cultures.

“As Chair of the AAPS Career Development Committee, we understand that continual learning and growth are critical in the ever-evolving pharmaceutical industry,” Yongchao Su, Ph.D., Principal Scientist, Merck, said. “Our career development offerings focus on enhancing managerial and leadership skills and provide an excellent opportunity for individuals to become part of a vibrant community of passionate pharmaceutical scientists. We invite you to join us on this exciting journey of growth and development.”

“At AAPS, we recognize that our members may want to move into leadership positions,” said AAPS Executive Director Tina Morris, Ph.D., said. “This workshop provides an opportunity to build the critical skills needed for managers to build inclusive environments in their workplaces.”

To learn more about the workshop and to register, visit <https://www.aaps.org/managing>.

In addition to the workshop, AAPS offers sessions dedicated to career development at the association’s National Biotechnology Conference and PharmSci 360 conference, as well as webinars throughout the year. AAPS also expects to release an ebook focused on career development strategies for scientists spanning early-career to mid-career professionals later this year. Its annual salary survey – the only one of its kind focused on pharmaceutical scientists – will be released late this summer.

###

American Association of Pharmaceutical Scientists (AAPS) is a 501(c)(3) non-profit association of more than 7,000 scientists and professionals employed in academia, industry, regulatory, and other research related to the pharmaceutical sciences worldwide. Its mission is to advance the capacity of pharmaceutical scientists to develop products and therapies that improve global health, which members pursue through four peer-reviewed journals and a variety of events in person and online. www.aaps.org
