Learn how to put Catylist to work for you.

The latest technology tools are available in this fully researched database of commercial properties. Users are able to access accurate, comprehensive market data to market their clients' listings and to search for properties that meet the real estate needs of their buyer/lessee clients Data includes parcel data with aerials and boundaries. Data is integrated with Google Earth to enhance imagery.

Learn about the lead generation and listing exposure tools available to you. Catylist is an essential tool for brokers, appraisers, owners, institutional partners, investors and developers, this commercial real estate technology combines an up-to-date, verified database of sale/lease availabilities and comparables with comprehensive information about each commercial property in your market. It tracks market trends and provides quarterly analytics, including a customizable suite of client-ready reporting options
