Lennox Commercial Technical Training Course Catalogue

Course Title	Description	Platform	Cost
Prodigy 1.0 Unit Controller Basic Navigation	This video provides basic navigation instructions for the Prodigy 1.0 Unit Controller	Video	$9.99
Network Control Panel (NCP) - Technical Overview	This webinar introduces the Network Control Panel (NCP), discusses its programming, set-up, and its configuration to an L-Connection Network System.	Webinar	$9.99
SmartAirflow System	This webinar introduces the Smart Airflow System, its capabilities, unique advantages, and its implementation in the Energence rooftop unit.	Webinar	$9.99
100% Outside Air with Energence - Technical Overview	This webinar will discuss the 100% Outside Air with Energence option by identifying 'When and Where to apply it; How to apply it; How to select it; How to control it; How to program it; and How to wire it.'	Webinar	$9.99
Prodigy 1.0 Basic Setup	This video provides basic setup instructions using the Prodigy 1.0 Unit Controller.	Video	$9.99
Why Specify Energence and How it's a Win for Engineers	This webinar will provide a technical overview of the Energence RTU, discussing the importance of specifying the RTU explain the benefit/win for Engineers.	Webinar	$9.99
Landmark High Efficiency Technical Overview	This course will provide a technical overview of the Landmark High Efficiency RTU.	Webinar	$9.99
Mini-Split systems, Installation and Setup - Technical Overview	This webinar will provide a technical overview of this incredible product and its potential for commercial application.	Webinar	$9.99
Prodigy 2.0 eLearning Guide	This e-learning guide will introduce the Prodigy 2.0 Unit Controller by identifying its user interface, data, set up, service and settings menus.	eCourse	$49.99
Prodigy 1.0 Setup for L-Connection Network Operations REV Alone Mode	This video provides L-Connection Network Operations REV Alone Mode setup and navigation instructions for the Prodigy 1.0 Unit Controller.	Video	$9.99
Energence Ultra High Efficiency Promo	This promotional video provides an in depth look at the features and benefits of the Energence Ultra High Efficiency Packaged Units.	Video	$9.99
What is VRF?	This video introduces VRF features, benefits, and applications.	Video	$0.00
L-Connection Network System - A Technical Overview	This webinar provides a basic overview of the L-Connection Network System, its components, fit, and functionality.	Webinar	$9.99
Raider 6-Ton 14 SEER Technical Overview	This webinar will provide a technical overview of the new Raider 14 SEER roof top unit. A great product built for value without compromise.	Webinar	$9.99
VRF Controls - Technical Overview	This technical overview training help you understand the how a VRF system is controlled and types of controllers that are available.	Webinar	$9.99
General Rooftop Unit Startup Procedures Technical Overview	This webinar will provide a technical overview of general rooftop unit startup procedures and discuss, 'Why is it so important?' Best practices will be shared to help maximize and maintain unit reliability, and efficiency.	Webinar	$9.99
Prodigy 1.0 Programing and Operating Unit in Stand Alone Mode	This video provides programing and operating instructions for Standalone Mode of the Prodigy 1.0 Unit Controller.	Video	$9.99
Prodigy 1.0 Programing for Energence 3 to 5-Ton MSAV Models	This video provides program instructions of Energence 3- to 5-Ton MSAV Models for the Prodigy 1.0 Unit Controller.	Video	$9.99
BACnet for Landmark and Raider – A Technical Overview	This webinar will provide a Technical overview of BACnet for Landmark, and Raider.	Webinar	$9.99

Title	Description	Type	Price
Comparison; Mini-Split and VRF Systems	There are many similarities and many differences between mini-split systems and VRF (variable refrigerant flow) systems. This online module provides a high-level overview of mini-split and VRF systems.	Webinar	$9.99
Landmark - Technical Overview	This webinar provides a technical overview of Landmark® package units; its service and maintenance features.	Webinar	$9.99
Lennox Commercial Thermostats - Technical Overview	This technical training will discuss, identify, and provide an update on Lennox's Commercial Thermostat Portfolio, demonstrate correct install and setup procedures, and help increase sales opportunities.	Webinar	$9.99
Prodigy 1.0 Programing for Energence 7.5 to 25-Ton MSAV Models in Zone Sensor Mode	This video provides program instructions of Energence 7.5- to 25-Ton MSAV Models in Zone Sensor Mode for the Prodigy 1.0 Unit Controller.	Video	$9.99
Prodigy 2.0 Unit Controller (Online Trainer) - A Technical Overview	This webinar introduces the New Prodigy (2.0) board, its features, functionality, and provided helpful information to lock-out your competitors.	Webinar	$9.99
Commercial Applications Training 101: FUNDAMENTALS	This course is designed to help Commercial Sales Professionals acquire essential product knowledge and build confidence in the application of that product knowledge. This course will identify the fundamentals of commercial application through a series of modules: 1) Module 1 will help you gain a better understanding of Lennox as an organization, through its history; 2) Module 2 & 3 will introduce you to HVAC theory, terminology, and key components; 3) Module 4 will introduce you to Lennox Commercial's ever evolving product line.	eCourse	$49.99
Energence Ultra-High-Efficiency 15 & 20 Ton, Technical Overview	This webinar will provide a technical overview of the new Energence ULTRA C-Box roof top unit. An exciting product that's changing the market.	Webinar	$9.99
Raider 3- to 5-ton - A Technical Overview	This webinar introduces the Raider B-Box by identifying the following: What's the Raider B-Box? What's inside it? What does it mean for your contractors? What does it mean for the end user? And, how does it compare?	Webinar	$9.99
