Presentation: Protecting Research Subjects and Outcomes: Adding It UP to Create the Perfect Balance – Advanced Site Mgt. Tools

Program Description:

This event will consist of social networking time with lunch provided to registered attendees and a presentation by an experienced Clinical Research Professional about Protecting Research Subjects and their participation through objective trial feasibility.

Upon completion of this Webinar, attendees should be able to:

1. Examine the rationale for detailed protocol analysis to facilitate research and subject protection, including protocol feasibility and safety
2. Evaluate how feasibility and proactive planning can help overall workload distribution to support subject safety, personnel resource allocation, and financial management.
3. Discuss some of the current feasibility and scoring models used in clinical research and how feasibility can adversely affect research patients and the healthcare advances.
4. Demonstrate a Protocol Acuity Rating Scale (P.A.R.S.) tool and give examples of how it can be applied to different types of clinical research studies in clinical research practice.
