

Exploring Containers

Instructions:

1. Gather containers.
2. Sit next to the child and name the shape of the container.
3. Describe the shape of the container to the child by encouraging the child to trace the shape with their finger.
4. Encourage the child to explore with the container. Taking the lid off and placing it back on.

Questions to extend learning:

- What shape is the container?
- What can we place inside the container?
- Can you stack the containers?

Materials:

- Empty Containers of different shapes and size with lids.

What will children learn?

Children will practice exploration, fine motor skills, math concepts such as shapes, language skills as the child describes what they see.
