President’s Welcome

Dear Colleagues,

Bienvenido!

On behalf of the board of directors, it is my pleasure to welcome you to the Academy for Eating Disorders (AED) 2009 Cancun International Conference on Eating Disorders. Our 2009 Conference Committee and its co-chairs, Debbie Franko, PhD, FAED (USA) and Sloane Madden, MBBS, FRANZCP (Australia) have put together a world-class program centered on the theme, “Cultivating Global Perspectives.”

The AED is very honored to open the conference with welcome remarks by the Mexican Minister of Health, the Honorable Dr. José Angel Córdova Villalobos. Later that morning, Dr. Nora Volkow will deliver her highly anticipated keynote address, “Common Brain Mechanisms in Addiction and Obesity.” A native of Mexico, Dr. Volkow is current director of the National Institute on Drug Abuse at the National Institutes of Health in the United States and a pioneer in the areas of neuroimager, addiction, and the neurobiology of obesity. We are pleased to welcome Dr. Volkow and look forward to what is sure to be an illuminating keynote address.

In addition, the Program Committee has prepared three outstanding plenaries that will provide important global perspectives on the stigmatization of eating disorders, new models and metaphors for understanding the culture-gene interaction and innovative ideas on the treatment of eating disorders. The first-rate slate of workshops, paper sessions, poster sessions and special interest group panels and meetings will offer further opportunities for conference attendees to learn and discuss leading-edge information about eating disorders research, treatment and prevention.

It will be difficult to pick and choose from this array of exciting offerings, but be sure to set aside time to attend the AED Global Think Tank IV session, “Are We There Yet? On the Road to Bridging Research and Practice” at noon on Friday. This unique interactive session offers a rare opportunity for our professional community to come together to openly discuss the causes and the impact of the research-practice divide and to problem-solve ways to address the divide. The AED is dedicated to taking the lead in addressing this critical issue. We hope you will join us in our effort to advance a research-practice partnership to ensure the highest quality eating disorders treatment, research and prevention worldwide.

Following the Global Think Tank on Friday, the Program Committee has thoughtfully kept the remainder of the afternoon free of conference events to allow everyone time to explore the beauty and history of this wonderful locale. Arrangements have been made with a local tour company to accommodate our conference participants. Information about tour reservations and area attractions is available in your conference packets. The conference will close Saturday evening with our annual AED reception and dance party, an excellent time for all to relax with colleagues, enjoy a delicious buffet and dance or chat ‘til the wee hours.

A warm welcome to all conference participants and many thanks to our 2009 conference co-chairs and Program Committee and to our valued exhibitors and sponsors for supporting the AED’s commitment to providing state-of-the-art professional education and training.

Sincerely,
Judith Banker, MA, LLP, FAED
President

About the Academy for Eating Disorders

The Academy for Eating Disorders is an international, transdisciplinary, non-profit membership organization for professionals and advocates engaged in research, treatment and prevention of eating disorders. The Academy is home to more than 1,400 members. Approximately 25 percent of these professionals reside outside of the United States.

AED provides members and the field at large with a variety of services, resources and educational programs, including the invaluable support of a community of dedicated colleagues.

Since the organization was founded in 1994, the International Conference on Eating Disorders (ICED) has been AED’s flagship activity and the highlight of the AED year. The ICED is the primary gathering place for professionals and advocates engaged in research, treatment and prevention of eating disorders. Each year, ICED attendees, faculty, supporters and exhibitors create a unique, inspiring and intensive environment for education, training, collaboration and dialogue.

Eating disorders are characterized by a persistent pattern of aberrant eating or dieting behavior. These patterns of eating behavior are associated with significant emotional, physical and relational distress.

Specific Goals of the Academy for Eating Disorders

- Promote the effective treatment and care of patients with eating disorders and associated disorders
- Develop and advance initiatives for the prevention of eating disorders
- Disseminate knowledge regarding eating disorders to members of the Academy, other professionals and the general public
- Stimulate and support research in the field
- Promote multidisciplinary expertise within the Academy’s membership
- Advocate for the field on behalf of patients, the public and eating disorder professionals
- Assist in the development of guidelines for training, practice and professional conduct within the field
- Identify and reward outstanding achievement and service in the field

Mary R. Rouse, MD
Janet Treasure, FRCPsych

NIMH Student / Early Career Investigator Travel Fellowship Recipients
Thanks to a grant from the National Institute of Mental Health and the National Institute of Child Health and Human Development (awarded to Ruth Striegel-Moore, PhD, FAED, and Cynthia Bulik, PhD, FAED), and funds raised by the Academy, the Academy awards the Early Career Investigator Travel Fellowships. Eligible recipients are United States citizens or residents who are in training (NIMH funding) or AED members worldwide who currently are in training or less than three years out of training (AED). Additionally, eligibility requires evidence of academic excellence. These awards support attendance at the AED/EDRS Teaching Day and the AED 2009 International Conference.

Join AED Now!
We invite you to join AED and be a part of this important organization.

AED provides a forum for mental health professionals to share scientific advances, exchange ideas, foster new research and provide professional and public education on the issues surrounding eating disorders. A membership application is included in this book on page 60.

Join the Academy for Eating Disorders and register for the ICED at the member rate. See the dues table on page to determine your membership fee. Join AED Now!

The recipient for the 2008 publication year is:
Kristin N. Javaras, DPhil

2005 Marian Tanofsky-Kraff, PhD
2006 Gabrielle Van Son, MA
2007 Jessica Baker, MS

AED Student Research Grant
This award is to support innovative and cutting-edge research conducted by student members of AED.

The 2009 research grant recipients are:
Kristen M. Culbert, MA, Lansing, MI, USA
Jocelyn Dellava, PhD, Chapel Hill, NC, USA

Continuing Education Credit

Meeting Objectives
As a result of this meeting, participants will be able to:

- Describe common brain mechanisms and environmental factors that underlie addiction and obesity and apply this knowledge to inform treatment development in eating disorders and obesity.
- Recognize the impact of stigma on patients with mental illness and identify the role of stigma in eating disorders, overweight and obesity.
- Apply successful interventions in depression and other mental illnesses to address stigma with patients.
- Explain how theories and research from behavioral, genetic and socio-cultural perspectives on eating disorders can be integrated and translated into new etiological models for eating disorders.
- Evaluate three new treatments for eating disorders: brief guided self-help treatment for recurrent binge eating, cognitive remediation for anorexia nervosa and parent to parent consultations in family therapy for adolescent anorexia nervosa.

Physicians
Continuing Medical Education Accreditation
This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the University of New Mexico Office of Continuing Medical Education and the Academy for Eating Disorders. The University of New Mexico Office of Continuing Medical Education is accredited by the ACCME to provide continuing medical education for physicians. Course Director, Joel Yager, MD, FAED, University of New Mexico.

Credit Designation
The University of New Mexico Office of Continuing Medical Education designates this educational activity for a maximum of 19.75 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

This activity has been reviewed and is acceptable for up to 20 Elective credit(s) by the American Academy of Family Physicians.

Non-Physicians
The conference is co-sponsored by the Academy for Eating Disorders and The Institute for Continuing Education. Continuing education is offered as listed below. The conference offers 19.75 contact hours, with total hours
subject to change. Credit is awarded on a session-by-session basis, with full attendance required at the sessions attended. Application forms will be available on site. If you have questions regarding continuing education, or for a listing of learning objectives, please contact: The Institute at: +1-251-990-5030; FAX: +1-251-990-2665.

Psychology: The Institute for Continuing Education is an organization approved by the American Psychological Association (APA) to sponsor continuing education for psychologists. The Institute for Continuing Education maintains responsibility for this program and its content.

Counseling: The Institute for Continuing Education is an NBCCA approved continuing education provider and a co-sponsor of this event. The Institute for Continuing Education may award NBCC approved clock hours for programs that meet NBCC requirements. The Institute for Continuing Education maintains responsibility for the content of this program. NBCC Provider No. 5643.

Social Work: The Institute for Continuing Education is approved as a provider for social work continuing education by the Association of Social Work Boards (ASWB), through the Approved Continuing Education (ACE) program. The Institute for Continuing Education maintains responsibility for the program. ASWB Provider No. 1007. Licensed social workers should contact their individual state jurisdiction to review current continuing education requirements for license renewal.

Marriage-Family Therapy: The Institute for Continuing Education is recognized as a provider of continuing education by the Illinois Board of Marriage and Family Therapy, Provider No. 168-000108.

Drug-Alcohol: The Institute for Continuing Education is approved by the National Association of Alcohol and Drug Abuse Counselors (NAADAC) to provide continuing education for alcohol and drug abuse counselors. NAADAC Provider No. 00243.

Nursing: The Institute for Continuing Education is an approved provider of continuing education in nursing by the California Board of Nursing, Provider CEP 12646. Nurses are responsible for contacting their state board to determine if credit issued through an approved provider of the CA Board of Nursing is accepted by their state board.

CE Disclaimer: It is the responsibility of the attendee to check with their state licensing/certification board to determine if continuing education credit offered by The Institute for Continuing Education will meet their state’s regulations.

Additional Accreditations
These additional accreditations may also be available, although they do not fall under the umbrella of credits offered by The Institute for Continuing Education.

Dieticians:
AED will submit an application to the Commission on Dietetic Registration for CPEUs for registered dieticians and dietetic technicians.

Continuing Education Registration and Requirements
A certificate fee of $30 for members and $45 for nonmembers is required. Check the appropriate box on the registration form. You also may pay on site. However, you may not register for credits after May 2. Credit is awarded on a session-by-session basis, with full attendance required at each session. One certificate will be issued for all activities attended. IMPORTANT! To receive continuing education credit, attendees must:

- Pay the fee ($30 members/$45 nonmembers)
- Sign in and sign out at designated locations
- Complete and return the continuing education evaluation packet

Please Note:
- State licensing bureaus and/or professional associations have their own requirements for licensing, certification and/or recertification. Individuals should contact their state licensing bureaus or professional associations regarding the applicability of the continuing education for their own professional needs.
- Learning objectives and the presentation level for all educational sessions will be available on the AED Web site several months prior to the conference.
- The following activities do not qualify for continuing education credits: poster sessions, committee meetings, Welcome and Conference Goals, SIG meetings, Meet the Experts, Global Think Tank, exhibits and any other non-scientific session.

AED thanks members and friends who have made contributions to the Scholarship Campaign and General Fund. The Scholarship Campaign provides funding to sponsor the research and clinician scholarships for the 2009 International Conference on Eating Disorders. The General Fund provides essential support to AED educational, research, clinical and outreach programs. Thank you to all who have so generously contributed. Special thanks to the Butterfly Foundation and participants in the Combined Federal Campaign program.

Your continued support is vital to AED.
Full Disclosure Policy Affecting CME Activities

As a provider accredited by the Accreditation Council for Continuing Medical Education (ACCME), it is the policy of the University of New Mexico School of Medicine to require the disclosure of the existence of any financial interest or any other relationship a faculty member, scientific program committee member or their families have with the manufacturer(s) of any commercial products or services discussed in an educational presentation. The 2009 ICED presenters and program committee members reported the following:

Carolyn Becker
Consultant: Tri Delta Fraternity

Carmen Bewell
Grant/Research Support: Canadian Institutes of Health Research

Ahmed Boachie
Grant/Research Support: Center for Excellence in Child & Youth Mental Health

It is understood that presentations must give a balanced view of therapeutic options. Faculty use of generic names will contribute to this impartiality. The speaker will make every effort to ensure that data regarding the company’s products (or competing products) are objectively selected and presented, with balanced discussion of prevailing information on the product(s) and/or alternative treatments. The speaker must also make the audience aware of any “off-label” or investigational uses described for any medication discussed.
General Conference Information

Opening Reception and Closing Social Event
A welcome reception for all registrants will take place from 6:00 – 7:30 p.m. on Thursday, April 30 in the CasaMagna Marriott, Maya Ballroom. The closing social event will take place from 7:00 – 10:00 p.m. on Saturday, May 2 at the JW Marriott’s Seaside Garden. Reception type food will be served from 7:00 – 8:00 p.m. Business casual attire is appropriate for both events.

Additional Tickets
If you are interested in purchasing additional opening reception tickets or closing social event tickets, you may do so at the AED registration desk anytime during regular registration hours. Tickets are $65 for the opening reception and $65 for the closing social event.

Optional Box Lunches
AED will provide optional box lunches for the Special Interest Group meetings on Thursday, April 30 and Saturday, May 2. A $20 US fee is required for each lunch. If you registered in advance, a ticket(s) is included in your registration packet. For those who are registering on site, tickets may be purchased at the AED registration desk during regular registration hours.

Current, New and Prospective Member Breakfast
The Current, New and Prospective Member Breakfast will take place from 7:00 – 8:00 a.m. on Friday, May 1 in Tulum F & G (JW Marriott). This breakfast event is available to all registered attendees.

AED Awards Ceremony & Business Meeting
Plan to attend the AED Business Meeting and Awards Ceremony. The meeting will take place from 9:30 – 10:30 a.m. on Saturday, May 2 in Tulum D & E (JW Marriott). This event is available to all registered attendees.

Committee Meeting Rooms
The Tikal (JW Marriott), Acapulco and Vallarta (CasaMagna Marriott) rooms are available for committee or small group meetings at designated times during the conference. Attendees can reserve meeting times by using the sign-up sheet outside the meeting room.

ICED Conference Recordings
Visit the sales desk in the registration area to purchase a CD and/or multimedia CD-ROM of the conference sessions from IntelliQuest Media. Discounts will be extended for on-site orders. You may contact them at +1-866-651-2586 or visit www.intelliquestmedia.com.

AED Bookseller
Gürze Books offers a large selection of eating disorders-related publications. Visit them at the sales desk in the registration area or contact them at +1-760-434-7533.

AED Registration Desk
The registration desk, located in the Tulum Foyer (JW Marriott), will be open:
Wednesday, April 29........................................7:00 a.m. – 10:00 p.m.
Thursday, April 30..........................................7:30 a.m. – 6:00 p.m.
Friday, May 1.........................................................7:00 a.m. – Noon
Saturday, May 2...................................................7:00 a.m. – 2:00 p.m.

Speaker Ready Room
The Speaker Ready Room will be available daily in Boardroom 2 (JW Marriott), as follows:
Wednesday, April 29 ......................................10:00 a.m. – 5:00 p.m.
Thursday, April 30...........................................7:30 a.m. – 5:00 p.m.
Friday, May 1......................................................7:00 a.m. – Noon
Saturday, May 2................................................7:00 a.m. – 2:00 p.m.

Exhibits
Vendor exhibits will be located in the Maya Ballroom (CasaMagna Marriott). Exhibit hours are:
Thursday, April 30.............................................7:30 a.m. – 7:30 p.m.
Friday, May 1......................................................7:00 a.m. – Noon
Saturday, May 2................................................7:00 – 11:00 a.m.

A light breakfast will be served daily and beverages will be available in the exhibit hall during the refreshment breaks each day. A directory of participating organizations is included in this program on page 52.

Solicitations
Solicitations by unauthorized persons are strictly prohibited. Sales and promotional activities are restricted to exhibitors and must take place in their own exhibit booths.

Poster Session
Posters will be presented by authors during the AED International Conference and will be available for viewing throughout the meeting. Poster abstracts can be found in the 2009 ICED Conference Proceedings, distributed with your registration materials.

The poster presentations are located in the Maya Ballroom (CasaMagna Marriott).

Poster Session Schedule

Poster Session I:
Wednesday, April 29
3:00 – 7:00 p.m...........................Poster Set-up
Thursday, April 30
7:30 a.m. – 6:00 p.m................Viewing
Thursday, April 30
6:00 – 7:30 p.m.......................Presentations (presenters must attend)
Thursday, April 30
7:30 – 8:00 p.m.........................Poster Dismantle

Poster Session II:
Friday, May 1
7:00 – 8:00 a.m.......................Poster Set-up
Friday, May 1
8:00 a.m. – Noon..............Viewing
Saturday, May 2
7:00 – 8:00 a.m.......................Presentations (presenters must attend)
Saturday, May 2
8:00 – 11:00 a.m......................Viewing
Saturday, May 2
11:00 – 11:30 a.m...............Poster Dismantle

Presenters are responsible for dismantling posters. Posters left behind at the close of the dismantling period will be disposed of and are not the responsibility of AED or the hotel.
Meet the Experts Session

Saturday, May 2, 8:00 – 9:30 a.m.
Coba (JW Marriott)

Do you have specific questions that you would like to discuss with established experts in your field? Are you looking for consultation on clinical cases, practice issues or ethical dilemmas? Are you interested in developing or evaluating an intervention to treat or prevent eating disorders? Do you want advice on writing a grant application or publishing your work? The Meet the Experts session offers an opportunity for informal discussions on these topics.

Attendance is limited, so sign up early. In order to attend this session, we ask that you sign up at the Meet the Experts table, located in the AED registration area, Tulum Foyer (JW Marriott). Please sign up for this event by Friday at noon, or as long as space is available.

Submit your questions for the experts. If you have a specific question to be addressed by experts, complete a “Meet the Experts Question Form” at the Meet the Experts table and deposit it in the basket on the table. Questions will be reviewed by the experts prior to Saturday’s morning session.

Experts and Topics (subject to last minute changes):

- Eunice Chen & Ulrike Schmidt
  Treatment of AN

- Scott Crow & Daniel le Grange
  Treatment of BN

- Debra Katzman & Richard Kreipe
  Medical Complications

- Steve Wonderlich & Hans Hoek
  DSM-V

- Tracey Wade & Howard Steiger
  Neuroscience and Genetics

- Mike Strober & Alison Field
  Getting Published

- Debbie Franko & Ruth Striegel-Moore
  What Epidemiology can tell us about patients

- Communications Committee
  Working with the Media

Message Board

A message board is available in the registration area during the registration hours. Check the board frequently. There will be no paging during the conference. To contact the Message Center, call the JW Marriott Cancun Resort & Spa at +53-998-848-9600 and ask to be transferred to the AED registration desk.

Meeting Evaluation

The ICED scientific program committee needs your input to enhance future AED meetings. You will receive an online meeting evaluation via e-mail shortly after the 2009 conference. AED greatly appreciates your input.

Special Needs

Notify AED staff members of any special needs by visiting the AED registration desk.

Questions

If you have questions regarding the program or registration, visit the AED registration desk.

Save the Date!

2010 International Conference on Eating Disorders
June 10 – 12, 2010
Clinical Teaching Day
June 9, 2010
Salzburg, Austria
Schedule-at-a-Glance
(Workshops designated with a CSW code indicate a Core Skills Workshop)

Wednesday, April 29

8:00 a.m. – 5:00 p.m. AED Board of Directors Meeting Tulum H (JW)
8:30 a.m. – 1:30 p.m. AED/EDRS Research Training Day Workshop (invitation only) Mexico / Cozumel (CasaMagna)
10:00 a.m. – 5:00 p.m. Registration Tulum Foyer (JW)
1:00 – 5:00 p.m. Clinical Teaching Day Workshops (separate registration fee required)
   A. Family-Based Treatment for Adolescent Eating Disorders Tulum A (JW)
   B. El Manejo Ambulatorio de los Trastornos de la Conducta Alimentaria en el Contexto Hispano (Ambulatory Management of Eating Disorders in a Hispanic Context) Uxmal 1 & 2 (JW)
   C. Cognitive Behavioral Therapy (CBT) for Bulimia Nervosa, EDNOS, and Binge Eating Disorder Tulum B (JW)
   E. Managing the Nutritional Rehabilitation of the Eating Disordered Patient Tulum G (JW)
   F. Management of Risk Associated with Eating Disorders Chichen Itza 1 & 2 (JW)
   G. Trauma, Eating Disorders and Comorbidity: Research, Assessment and Treatment Tulum F (JW)
3:00 – 7:00 p.m. Exhibitor Set-Up Maya Ballroom (CasaMagna)
3:00 – 7:00 p.m. Poster Session I Set-Up Maya Ballroom (CasaMagna)

Thursday, April 30

7:30 a.m. – 6:00 p.m. Registration Tulum Foyer (JW)
7:30 – 8:30 a.m. Special Interest Group (SIG) Chairs Organizational Meeting Coba (JW)
7:30 – 8:30 a.m. Advisory Board Meeting & Breakfast Tikal (JW)
7:30 – 8:30 a.m. Continental Breakfast with Exhibitors Maya Ballroom (CasaMagna)
7:30 a.m. – 7:30 p.m. Poster Viewing Session I / Exhibit Hall Open Maya Ballroom (CasaMagna)
8:30 – 9:00 a.m. Welcome and Conference Goals Tulum A-E (JW)
   Debbie Franko, PhD, FAED and Sloane Madden, MD, FRANZCP
   Scientific Program Committee Co-Chairs
   Presidential Address
   Judith Banker, MA, LLP, FAED, President
   José Angel Córdova Villalobos, MD, Minister of Health, Mexico
9:00 – 10:15 a.m. Keynote Address Tulum A-E (JW)
   Common Brain Mechanisms in Addiction and Obesity Nora D. Volkow, MD, Director National Institute on Drug Abuse, Bethesda, MD, USA
10:15 – 10:45 a.m. Refreshment Break with Exhibitors Maya Ballroom (CasaMagna)
10:45 a.m. – 12:15 p.m. Workshop Session I Maya Ballroom (CasaMagna)
   A. Update on DSM-V Tulum A-G (JW)
   B. Working with Personality Traits and Disorders in People with Eating Disorders: A Dimensional-Trait and Interpersonal-Process Approach Tulum G (JW)
   D. Do Carers Care About Research? How Evidence and Clinical Guidelines Help Caregivers Support Recovery Mexico/Cozumel (CasaMagna)
   E. First Do No Harm: A Model for the Prevention of Eating Disorders and Obesity: the Allure of Body Mass Index vs. Health at Every Size Tulum D (JW)
   F. Exploring the Interface Between Family and Individual Therapy in the Treatment of Early Onset Anorexia Nervosa Chichen Itza 1 & 2 (JW)
   G. Preventing Relapse Across the Eating Disorders: A Transdiagnostic Intervention Targeting Extreme Weight and Shape Concerns Tulum E (JW)
   H. Eating, Feeding and Treating Patients with Eating Disorders: An Integration of Research and Clinical Practice Tulum F (JW)
   I. Maintenance Treatment and Long-Term Support for Eating Disorders: Extending the Reach of Specialized Treatment Centers Uxmal 1 & 2 (JW)
   J. Regulation of Cues for Childhood Obesity: The ROC Intervention Coba (JW)
12:15 – 12:45 p.m. Box Lunch Pick Up (Box lunch available for purchase. See registration form.) Tulum Terrace (JW)
12:15 – 1:30 p.m. Lunch on Your Own Tulum A-C (JW)
12:15 – 1:30 p.m. Special Interest Group (SIG) Annual Meetings (Box lunch available for purchase. See registration form.) Tulum D (JW)
   Athletes Tulum E (JW)
   Body Image Tulum F (JW)
   Trauma & ED Tulum G (JW)
   Family Therapy Tulum A-C (JW)
   Assessment & Diagnosis
Thursday, April 30 (continued)

Inpatient/Residential
Eating & Sleep
Student
Information Technology & ED
Nutrition

Additional SIG meetings will be held on Saturday, May 2 at 8:00 a.m. and 12:30 p.m.

Please see the detailed program for more information.

12:15 – 1:30 p.m.  HLA Chapter Meeting
Tulum H (JW)

2:00 – 4:00 p.m.  Plenary Session I: The Stigmatization of Eating Disorders
Tulum A – E (JW)

Moderators: Ulrike Schmidt, MD, PhD, FAED, Maudsley Hospital, London, UK, and
Josie Geller, PhD, St. Paul’s Hospital, Vancouver, BC, Canada

On Stigma and its Consequences for People with Mental Illnesses
Bruce G Link, PhD, Columbia University, Mailman School of Public Health, New York, NY, USA

Unravelling the Stigma of Depression
Kathleen Griffiths, PhD, Australian National University, Canberra, Australia

Stigma and Eating Disorders or “The Elephant in the Room”
Philippa Hay, MD, PhD, The University of Western Sydney, Sydney, Australia

Global Social and Policy Changes to Address Eating Disorders and Obesity
Kelly Brownell, PhD, Yale University, New Haven, CT, USA

4:00 – 4:30 p.m.  Refreshment Break with Exhibitors
Maya Ballroom (CasaMagna)

4:30 – 6:00 p.m.  Workshop Session II
Tulum A-C (JW)

A. Integrative Cognitive-Affective Therapy for Bulimia Nervosa
Tulum H (JW)

B. The “Therapy” in Nutrition Therapy: Challenges for the Dietitian
Tulum G (JW)

C. Understanding and Working with Social Cognition in Anorexia Nervosa
Mexico/Cozumel (CasaMagna)

D. Anorexia Nervosa in the Desert: Overcoming Geographical Challenges in Service Delivery
for Children and Families

E. Narrowing the Research-Practice Gap in Psychotherapy for Eating Disorders: Identifying Common Ground
Tulum D (JW)

F. Disengagement or Direct Intervention: What is a Parent to Do? CSW
Chichen Itza 1 & 2 (JW)

G. We’re in This Together: Building Collaborative Alliances between Families and Professional Care Givers

H. No Prescription Necessary: Abuse of Over-the-Counter Drugs Among Eating Disordered Patients
Uxmal 1 & 2 (JW)

I. A Sexuality Group for People with Eating Disorders
Coba (JW)

J. Acute and Chronic Changes in Refeeding of Anorexia Nervosa
Tulum F (JW)

6:00 – 7:30 p.m.  Opening Reception / Poster I Presentation & Viewing Session / Exhibit Hall Open
Maya Ballroom (CasaMagna)

7:30 – 8:00 p.m.  Poster I Dismantle
Maya Ballroom (CasaMagna)

Friday, May 1

7:00 – 8:00 a.m.  Current, New and Prospective Member Breakfast
Tulum F & G (JW)

7:00 – 8:00 a.m.  Continental Breakfast with Exhibitors
Maya Ballroom (CasaMagna)

7:00 a.m. – Noon  Poster Session II Set-Up & Viewing / Exhibit Hall Open
Maya Ballroom (CasaMagna)

7:00 a.m. – Noon  Registration
Tulum Foyer (JW)

8:00 – 10:00 a.m.  Plenary Session II: Culture and Genes: Is It Time for New Models and New Metaphors in Thinking About Predispositions, Triggers, and Causal Risk Factors?
Moderator: Anne E. Becker, MD, PhD, ScM, Harvard Medical School, Boston, MA, USA

Sociocultural Models: A Developmental Perspective
Linda Smolak, PhD, Kenyon College, Gambier, OH, USA

Behavior Genetic Models: A Developmental Perspective
Kelly Klump, PhD, FAED, Michigan State University, East Lansing, MI, USA

Highlighting Media and Other Cultural Factors: A Critical Examination of Behavior Genetics and Biopsychiatry
Michael P. Levine, PhD, FAED, Kenyon College, Gambier, OH, USA

Pulling It All Together: Expanded Models and New Metaphors
Tracey Wade, PhD, FAED, Flinders University, Adelaide, Australia

10:00 – 10:30 a.m.  Refreshment Break with Exhibitors
Maya Ballroom (CasaMagna)

10:30 a.m. – Noon  Oral Scientific Paper Session I (brief scientific papers for presentation and discussion)
Listing on page 14

12:15 – 1:45 p.m.  The Future of Eating Disorders Research: The AED/NIMH Travel Fellowship Awards
Tulum D (JW)

12:15 – 1:45 p.m.  AED Global Think Tank IV (formerly AED World Summit Session)
(Tax Box lunches will be available)

Saturday, May 2

7:00 – 8:00 a.m.  Continental Breakfast with Exhibitors
Maya Ballroom (CasaMagna)

7:00 – 8:00 a.m.  Poster Presentation Session II / Exhibit Hall Open
Maya Ballroom (CasaMagna)
### Saturday, May 2 (continued)

Detailed Program
Wednesday, April 29

8:00 a.m. – 5:00 p.m.   Tulum H (JW Marriott)
AED Board of Directors Meeting

8:30 a.m. – 1:30 p.m.   Mexico / Cozumel (CasaMagna Marriott)
AED/EDRS Research Training Day Workshop
(invitation only)

8:30 a.m.
Welcome and Introductions
Ruth Striegel-Moore & Cynthia Bulik

8:35 – 9:15 a.m.
How to Write a Fundable Grant
Cynthia Bulik

9:15 – 9:45 a.m.
Writing the Statistical Methods Section
Ross Crosby

9:45 – 10:15 a.m.
Strategies for Translational Research on Anorexia Nervosa and Bulimia
B. Timothy Walsh

10:15 – 10:30 a.m.
Coffee Break

10:30 – 11:00 a.m.
Cultural Adaptation: Implications for Assessment and Treatment – Mae Lynn Reyes-Rodriguez

11:00 – 11:30 a.m.
What You Really Wanted to Know
Ruth Striegel-Moore

11:30 – 12:00 p.m.
TBA

12:00 – 1:00 p.m.
Luncheon

Teaching Day Faculty:
Cynthia Bulik, PhD
Ross Crosby, PhD
Mae Lynn Reyes-Rodriguez, PhD
Ruth Striegel-Moore, PhD
B. Timothy Walsh, MD

Note: Attendance is by invitation and registration is required.
This program was developed for NIMH/AED/ANZAED Travel Fellows and is supported with co-funding from the National Institute of Mental Health and the National Institute of Child Health and Human Development (R13 MH64468 Striegel-Moore, Principal Investigator; Bulik Co-Principal Investigator) and additional funds from the Academy for Eating Disorders Gala Fund, and the ANZAED.
The organizers gratefully acknowledge the members of the Travel Fellowship Committee for their help in selecting the travel fellows: Drs. Ross Crosby, Debbie Franko, & Mae Lynn Reyes-Rodriguez

10:00 a.m. – 5:00 p.m.   Tulum Foyer (JW Marriott)
Registration

1:00 – 5:00 p.m.
Clinical Teaching Day Workshops
(separate registration fee required)

A. .............................................. Tulum A (JW Marriott)
FAMILY-BASED TREATMENT FOR ADOLESCENT EATING DISORDERS
Daniel le Grange, PhD, FAED, The University of Chicago, Department of Psychiatry and Behavioral Neuroscience, Chicago, IL, USA
Eating disorders most typically onset in adolescence. Yet, no more than half a dozen randomized controlled trials for this age group have been published to date. All of these studies involve parents in treatment in that they are seen as a resource and are actively engaged to resolve their adolescent’s eating disorder. Consequently, this family-based approach (FBT) to the treatment of adolescent eating disorders has come to be regarded as the treatment of choice, especially for adolescents with AN. For this session, a brief background to the development of FBT will be provided before presenting in more detail the rationale and the scientific support of FBT for adolescent eating disorders. Second, the fundamental assumptions of FBT for adolescent eating disorders will be reviewed as well as some of the key treatment targets and strategies. Finally, this session will highlight the similarities and differences of FBT strategies for adolescent AN and BN.

B. ...........................................Uxmal 1 & 2 (JW Marriott)
EL MANEJO AMBULATORIO DE LOS TRASTORNOS DE LA CONDUCTA ALIMENTARIA EN EL CONTEXTO HISPANO (AMBULATORY MANAGEMENT OF EATING DISORDERS IN A HISPANIC CONTEXT)
Ovidio Bermudez, MD, FAED, Laureate Psychiatric Clinic & Hospital, Tulsa, OK, USA; Eva Maria Trujillo, MD, FAED, Comenzar De Nuevo, Garza Garcia, Mexico; Rullina Acra, LD/RD, Miami, FL, USA; Juanita Gempeler, Clinical Psychologist, CBT, Equilibrio, Bogota, Colombia; J. Armando Barriguate Melendez, MD, Eating Disorders Clinica Angeles, Mexico City, Mexico
This workshop will present the multidisciplinary approach to eating disorders with a didactic presentation from each member of a clinical team followed by an interactive discussion of how each discipline benefits from that point of view and with ample time for discussion from the participants about their own questions or clinical experiences.
The format will begin with introductions, presentation of two clinical cases, didactic presentations on the medical assessment of eating disorders (Dr. Eva Trujillo), common psychotherapeutic approaches (Dr. Juanita Gempeler and Dr. Armando Barriguate), practical aspects of nutritional counseling
(Dr. Rullina Acra), and working with families. Then we would open up the workshop for clinical discussion and Q & A.

This will be a 4 hour clinical teaching day, with the focus on clinicians with limited or moderate experience in treating eating disorders and important emphasis on the cultural aspects of the Hispanic context which, of course, offers opportunities and challenges to the ambulatory treatment of these patients.

C. .................................................. Tulum B (JW Marriott)
COGNITIVE BEHAVIORAL THERAPY (CBT) FOR BULIMIA NERVOSA, EDNOS, AND BINGE EATING DISORDER
G. Terence Wilson, PhD, Rutgers University, Piscataway, NJ, USA

The workshop is relevant for participants with a limited knowledge of CBT as well as more experienced therapists. Some familiarity with the Fairburn et al. (1993) treatment manual will be assumed. The major focus will then be on an expanded treatment model with broader therapeutic strategies. The latter will include methods for addressing dysfunctional body shape and weight concerns, negative affect, and interpersonal processes. The fundamental role of enhancing motivation in CBT will be highlighted. The workshop features lecture, discussion and role play.

D. .................................................. Tulum C (JW Marriott)
WORKING ACROSS SYSTEMS: TARGETING INTERPERSONAL MAINTAINING FACTORS AND TRAINING THE FAMILY IN THE MANAGEMENT OF EATING DISORDERS
Janet Treasure, PhD, FRCP, FRCPsych, Kings College London, Maudsley Hospital, London, UK

Family members carry a major share of the burden of responsibility for individuals with eating disorders but they lack the skills and resources for this role. This contributes to the difficulty that families have in coping and supporting a member with an eating disorder (Treasure et al., 2005). Family factors contribute to the maintenance of anorexia nervosa. We have developed an educational skills based intervention for carers which is tailored to modify these maintaining processes (Treasure et al., 2007). This includes a variety of resources such as a manual and DVDs and is supplemented by coaching (Treasure et al., 2007).

The aims are to (a) remediate interpersonal maintaining mechanisms (Schmidt & Treasure, 2006) (b) improve communication (c) decrease expressed emotion (over protection and hostility) and (d) increase behavior change skills.

In this workshop we will discuss the theory and evidence base around this model as background. I will demonstrate with interactive work in small groups and with DVDs how we teach these skills to family members. I will also give some feedback with research into this area.

E. .......................................................... Tulum G (JW Marriott)
MANAGING THE NUTRITIONAL REHABILITATION OF THE EATING DISORDERED PATIENT
Leah L. Graves, RD, LD, FAED, Laureate Eating Disorders Program, Tulsa, OK, USA; Reba Sloan, MPH, LRD, FAED Private Practice, Nashville, TN, USA

As all patients with eating pathology struggle to properly fuel themselves, nutritional rehabilitation is a cornerstone of quality eating disorders care. This workshop will provide current information in the management of the nutritional rehabilitation process beyond the basics highlighting challenging issues and populations.

F. .................................................. Chichen Itza 1 & 2 (JW Marriott)
MANAGEMENT OF RISK ASSOCIATED WITH EATING DISORDERS
Frances Connan, PhD MRCPsych, Vincent Square Eating Disorders Service, CNWL NHS Foundation Trust, London, UK; Angelica Claudino, MD, PhD, Sao Paulo, Brazil

- Presentation of the risks associated with eating disorders
- Specific risk, including acute and chronic medical complications, and risk associated with treatment
- Non-specific risk, including self-harm, suicide, substance misuse and risk to children
- Assessment and formulation of risk
- Small group exercise: assessment and formulation of risk using case vignettes
- Risk Management and harm minimization
- Presentation illustrated with case material
- Small group exercise: formulation of an individualized risk management plan using case vignettes
- Review of workshop and clinical discussion

G. .................................................. Tulum F (JW Marriott)
TRAUMA, EATING DISORDERS AND COMORBIDITY: RESEARCH, ASSESSMENT, AND TREATMENT
Tim Brewerton, MD, DFAPA, FAED, Medical University of South Carolina, Charleston, SC, USA; Diann M. Ackard, PhD, FAED, Minneapolis, MN

Population-based estimates indicate that at least one in three women will be the victim of a sexual or physical trauma during their lifetime, whereas greater than one in two women with bulimia nervosa experience such events (Dansky, Brewerton, O’Neil & Kilpatrick, 1997). Traumatic experiences place individuals at heightened risk for the emergence or worsening of a myriad of behavioral and mental health concerns, including affective, anxiety,
substance abuse, dissociative, personality and eating disorders. Increasingly, both the clinical and scientific communities are expressing interest in developing a greater understanding of the relationship between trauma (e.g., the experience of violence of a physical, sexual, or emotional nature), eating disorders, and comorbid psychiatric symptoms and disorders (e.g., anxiety disorders including PTSD, affective disorders, dissociative disorders, substance use disorders). Eating disorders are defined as clinically significant problems in eating behavior that cause impairment in academic, occupational, social, or other functioning. This teaching day workshop will be valuable for scientists and practitioners who seek to integrate current, evidence-based knowledge of trauma, eating disorders, and comorbid psychopathology into clinical practice or research. The presenters will review available research from both female and male adults, adolescents and children, including epidemiological twin, clinical and forensic samples. Taken together, these findings indicate that traumatic experiences are significant yet nonspecific risk factors in the development of eating disorders (especially bulimic symptomatology) and other related psychiatric conditions. The presenters will focus on the etiological role of trauma in light of a biopsychosocial model, and provide instruction on self-report interview-based assessment practices for use in treatment and research settings. Treatment approaches for the traumatized patient with both eating disorder and comorbid psychopathology will be described using an integration of published practice guidelines, phasic treatment with sustained attention to nutritional rehabilitation as a necessary first step, and evidence-based treatments for both eating disorders and PTSD (e.g., dialectic-behavioral therapy, cognitive-behavioral therapy, exposure/response prevention). Although evidence-based treatment is becoming increasingly flexible, patients with comorbid eating disturbances and PTSD often present with a highly complicated clinical picture, and current treatment manuals include limited advice regarding strategies for blending core components of treatments designed for different classes of disorders (i.e., eating disorders and anxiety disorders, eating disorders and substance use disorders) in comorbid cases. General principles useful in treating the complicated, comorbid patient will be demonstrated using case presentations and specific recommendations will be explained. Recommendations will include both evidence-based therapeutic interventions as well as pharmacologic treatments (e.g., antidepressants, anticonvulsants, antipsychotics, and other psychotropic agents) with established efficacy. Workshop participants will have the opportunity to practice learned strategies in small groups and participate in active discussions of key issues to the treatment of these complicated patients.

UPDATE ON DSM-V

B. Walsh, MD, Professor of Psychiatry, Columbia/NYSPI, New York, NY, USA; Evelyn Attia, MD, Clinical Professor of Psychiatry, Columbia University, New York, NY, USA; Anne Becker, MD, FAED, Associate Professor of Medical Anthropology, Harvard Medical School, Boston, MA, USA; Hans Hoek, MD, Professor of Psychiatry, University Medical Center Groningen, The Hague, Netherlands; Richard Kreipe, MD, Professor of Pediatrics, University of Rochester School of Medicine and Dentistry, Rochester, NY, USA; Marsha Marcus, PhD, Professor of Psychiatry and Psychology, University of Pittsburgh School of Medicine, Pittsburgh, PA, USA; Ruth Striegel-Moore, PhD, Professor of Psychology, Wesleyan University, Middletown, CT, USA; Terence Wilson, PhD, Oscar K Buros Professor of Psychology, Rutgers University, Piscataway, NJ, USA; Barbara Wolfe, PhD, Professor, William F. Connell School of Nursing, Boston College, Chestnut Hill, MA, USA; Stephen Wonderlich, PhD, Professor, Department of Clinical Neuroscience, University of North Dakota School of Medicine, Fargo, ND, USA

DSM-V is scheduled to be published in 2012, 18 years after the DSM-IV criteria were published and 12 years after the text was revised in DSM-IV-TR. The DSM-V Task Force and an Eating Disorders Work Group have been appointed and begun work. The Work Group has been asked to review, critique, and suggest revisions to the current diagnostic criteria for the following existing categories: Eating Disorders (Anorexia Nervosa, Bulimia Nervosa, Eating Disorder Not Otherwise Specified (EDNOS) and Feeding and Eating Disorders of Infancy or Early Childhood (Pica, Rumination Disorder, Feeding Disorder of Infancy or Early Childhood). In addition, the Workgroup was asked to consider whether obesity should be included in DSM-V. In its first meetings, the Work Group has noted several issues widely discussed in the field about the existing criteria, including the very high frequency of use of EDNOS in clinical settings. This issue overlaps with the major question of whether Binge Eating Disorder is a valid and useful diagnostic entity. In addition, other “atypical” variants of the recognized eating disorders have been suggested, such as Purging Disorder and Night Eating Syndrome. By the time of the AED meeting, the Work Group will have completed literature reviews and have begun to consider options for change. The purpose of this workshop is for members of the Work Group to provide a brief summary of ideas regarding possible changes in the DSM-IV criteria for eating disorders, to facilitate a dialogue with attendees, and to obtain their feedback.

WORKING WITH PERSONALITY TRAITS AND DISORDERS IN PEOPLE WITH EATING DISORDERS: A DIMENSIONAL-TRAIT AND INTERPERSONAL-PROCESS APPROACH

Howard Steiger, PhD, Director/Professor, Eating Disorders Program, Douglas University Institute/McGill University, Montreal, QB, Canada; Jodie Richardson, BSc, Coordinator of Knowledge Transfer/PhD Candidate, Eating Disorders Program, Douglas University Institute/McGill University, Montreal, QB, Canada

Personality pathology is common in people with eating disorders, and remains one of the most intriguing and challenging aspects of eating-disorder management. This workshop provides a comprehensive, up-to-date review of clinically-relevant findings on the association between eating and personality disturbances, and on shared developmental and constitutional/genetic determinants of eating and personality pathologies. It also provides indications and contraindications for the attempt to “tune” psychotherapy to specific personality traits and disturbances. Emphasizing the impact of personality pathology upon the expression of eating symptoms, response in therapy, and the therapeutic relationship. This will be a “trait” and “interpersonal process” focused analysis. A main section of the workshop addresses clinical technique. Principles are drawn from within and beyond the eating-disorder literature, around which recommended, personality focused treatment techniques (including Dialectical Behavior Therapy, Cognitive-Behavioral Therapy, Interpersonal Psychotherapy, Brief Interpersonal Therapy, and other forms) are structured. Using selected case materials, interventions aimed at specific personality traits and organizations (e.g., perfectionism, self-criticism, impulsivity, compulsivity, affective instability, narcissism, self-destructiveness) will be addressed. Using clinical vignettes, ingredients of “trait-focused” psychotherapeutic techniques are reviewed that aim to minimize ruptures in therapeutic alliance and other impediments to change. Participants are invited to bring case materials from their own practice, for discussion purposes.

THE THERAPEUTIC RELATIONSHIP IN COGNITIVE-BEHAVIOURAL THERAPY FOR THE EATING DISORDERS: NASTY! BRUTISH! SHORT! CSAW

Glenn Waller, DPhil, Professor of Psychology, Institute of Psychiatry, King’s College London, London, United Kingdom

Despite its effectiveness, cognitive-behavioural therapy (CBT) for the eating disorders is routinely presented as overlooking key therapeutic relationship elements that are potentially powerful clinical tools. The therapeutic relationship in CBT is often portrayed (to paraphrase Hobbs) as being ‘nasty, brutish and short’. This workshop will address the active role of the
Thursday, April 30 (continued)

therapeutic relationship in CBT for the eating disorders. It will be argued that the effective relationship-based element in CBT is different to that proposed in some other therapies. The focus is on a relationship that is task-focused, and hence needs to be shaped according to the tasks of therapy that are applicable to the individual patient.

Content
This workshop will begin by discussing relationship-level problems that participants have encountered (and solutions that they have developed). Then there will be a discussion of key relationship elements that need to be considered when delivering CBT, including:

- Engaging the patient as the therapist, while the clinician learns to be a coach.
- The clinician’s need to be authoritative rather than authoritarian
- Working with therapy-interfering behaviours without blame
- Focusing on change rather than maintenance (being a boring clinician)
- Considering the degree to which clinicians can become dependent on their relationship with the patient when the therapy is going nowhere
- Maintaining safe boundaries for the patient

Examples of problematic relationship issues in CBT will be presented for participants to discuss, in order to think about how to solve common problems and share solutions (always keeping the CBT on track). The black and white thinking behind the ‘nasty, brutish and short’ assumption (vs. the alternative of ‘nice, humanistic and long’) will be challenged, allowing that the therapeutic relationship in CBT needs to be firm, individual-centered and relatively short if the therapy is to be effective.

D. .....................Mexico/Cozumel (CasaMagna Marriott)
DO CARERS CARE ABOUT RESEARCH? HOW EVIDENCE AND CLINICAL GUIDELINES HELP CAREGIVERS SUPPORT RECOVERY
Laura Collins, MS, Director, F.E.A.S.T., Warrenton, VA, USA; Susan Ringwood, BA, Chief Executive Officer, BEAT, Norwich, United Kingdom; Ulrike Schmidt, PhD, Professor, Maudsley Hospital, London, United Kingdom; Donna Friedman, Ann Arbor, MI, USA

Evidence based recommendations are a popular topic among eating disorder professionals, but how do families and caregivers respond to this type of information? This workshop brings a patient, a carer, an advocate, and a researcher/clinician together to address how current science and research findings have, and have not, improved patient and caregiver support. We will present newly completed research comparing clinician perceptions of caregiver needs with actual expectations and offer perspectives from different countries and health systems. A 25-year sufferer of an eating disorder will describe and evaluate the effectiveness of how differing treatment approaches and interventions have been presented to her by clinicians throughout the course of her treatment, including the more recent emphasis on the use of “evidence-based” practices. A caregiver advocate will describe the continuing confusion among parents about what evidence exists to support different treatment approaches and will offer case vignettes to demonstrate how the science is interpreted in day-to-day family life. The presenters will summarize concrete recommendations from all three stakeholder perspectives for how evidence-based practice can be presented to caregivers effectively, thereby maximizing treatment adherence, and positive outcomes. Attendees will have an opportunity, through role-play and small group discussion, to practice the recommended ways to effectively present evidence-based practice to caregivers.

E. ..........................Tulum D (JW Marriott)
FIRST DO NO HARM: A MODEL FOR THE PREVENTION OF EATING DISORDERS AND OBESITY: THE ALLURE OF BODY MASS INDEX VS. HEALTH AT EVERY SIZE
Margo Maine, PhD, FAED, Psychologist, Maine & Weinstein Specialty Group, West Hartford, CT, USA; Michael Levine, PhD, FAED, Professor, Kenyon College, Gambier, OH, USA; Jennifer O’Dea, PhD, Associate Professor, University of Sydney, Sydney, Australia; Joslyn Smith, BA, Senior Legislative Assistant, American Psychological Association, Washington DC, USA

Despite the public health threat related to the increase of eating disorders across age, gender, race, ethnicity and culture, public health initiatives tend to solely target obesity. Obesity and eating disorders share many risk factors, but misguided interventions will not reduce obesity and may well increase the rate of eating disorders. This workshop presents a comprehensive approach to preventing eating and weight disorders across the spectrum, arguing for a systemic approach to replace the current stigmatizing tendency to identify, isolate, and blame victims. The workshop reviews the current legislative trend to mandate BMI reporting in schools, despite the limitations of the BMI as an accurate measurement of obesity or of health risk. While there are virtually no data on the effectiveness of mandatory BMI reporting, research does suggest the potential to do harm. The notion that BMI reporting helps to decrease rates of obesity assumes that at-risk individuals will begin to diet and thereby lose weight. Dieting, however, is often associated with weight gain attendant to both binge-eating and metabolic changes. Thus, this workshop offers a critical evaluation of the Health At Every Size paradigm, which honors diversity of body types and focuses on healthy behaviors such as: normalizing eating, both amounts and frequency; learning to recognize internal cues of hunger and satiety; developing alternative coping mechanisms for stress reduction and emotional expression; and enjoying moderate physical activity. The workshop illustrates the state of the art of a unified approach to prevent both obesity and eating disorders, reviewing model programs and research findings and pointing to new directions for public health initiatives to address these problems and “do no harm.”
Thursday, April 30 (continued)

F. ............................................. Chichen Itza 1 & 2 (JW Marriott)
EXPLORING THE INTERFACE BETWEEN FAMILY AND INDIVIDUAL THERAPY IN THE TREATMENT OF EARLY ONSET ANOREXIA NERVOSA
Dasha Nicholls, MD, PhD, Consultant Child & Adolescent Psychiatrist, Great Ormond Street Hospital, London, United Kingdom; Hilary Davies, MSc, Family Therapist, London, United Kingdom

Family therapy is generally accepted as the first-line treatment for anorexia nervosa of short duration in children and adolescents. Nevertheless, individual therapy continues to be offered routinely in a number of settings, particularly inpatient units, although the nature of this therapy varies widely. The UK National Institute of Clinical Excellence guidelines support the view that children and young people should be seen alone in addition to within their family context. This workshop will consider the purpose and benefits of working individually with young people at different stages in the treatment process, before exploring how individual therapy can work alongside family therapy in relation to the overall treatment aims. How individual therapy is integrated with other aspects of treatment, in particular family therapy, needs careful consideration if it is to be useful and tensions between the two distinct therapeutic processes avoided. Specific issues that arise include considering where responsibility for managing eating behaviour lies, how confidentiality issues are managed, and team dynamics including the potential for splitting. Developmental differences in approach between children and older adolescents will be highlighted throughout.

G. ........................................................T ulum E (JW Marriott)
PREVENTING RELAPSE ACROSS THE EATING DISORDERS: A TRANSDIAGNOSTIC INTERVENTION TARGETING EXTREME WEIGHT AND SHAPE CONCERNS
Kathryn Trottier, PhD, Staff Psychologist, University Health Network, Toronto, ON, Canada; Traci McFarlane, PhD, Staff Psychologist, University Health Network, Toronto, ON, Canada

Overconcern with weight and shape is the core maladaptive cognitive feature across the eating disorders and this is reflected in current diagnostic criteria. Rates of relapse following behavioral remission are high. Evidence that extreme weight and shape concerns are resistant to our current treatments and predict relapse support the importance of these concerns as a maintaining factor. Body checking and avoidance behaviors are not only a behavioral consequence of overconcern with weight and shape but also serve to maintain these extreme thoughts and beliefs. Body avoidance prevents opportunities to learn new information about the body and that feared outcomes do not come true. Body checking is likely to lead the eating disordered person to draw incorrect conclusions about her/his body owing to selective attention to disliked parts of the body and confirmatory cognitive biases. Participants in this workshop will learn how to apply specific psychoeducational, behavioral, cognitive and mindfulness interventions in order to reduce body checking and avoidance, and decrease the overvaluation of weight and shape. For example, the application of in vivo graded exposure therapy to reduce anxiety and avoidance will be taught. Through gradual, repeated, prolonged and generalized exposure practices, individuals with eating disorders habituate to their negative thoughts and feelings about their bodies and learn that their negative predictions and feared outcomes do not occur. In addition, mindfulness strategies to help these clients distance themselves from their body image distress and take a neutral observer’s stance will also be taught.

H. ........................................................T ulum F (JW Marriott)
EATING, FEEDING AND TREATING PATIENTS WITH EATING DISORDERS: AN INTEGRATION OF RESEARCH AND CLINICAL PRACTICE
Laurel Mayer, MD, Assistant Professor of Clinical Psychiatry, Columbia University/NYSP, New York, NY, USA; Michael Devlin, MD, Associate Professor of Clinical Psychiatry, Columbia University/NYSP, New York, NY, USA; Joanna Steinglass, MD, Assistant Professor of Clinical Psychiatry, Columbia University/NYSP, New York, NY, USA; Evelyn Attia, MD, Professor of Psychiatry, Columbia University/NYSP, New York, NY, USA

By definition, eating behavior is disturbed in patients with eating disorders. The nature of these disturbances is a challenge for researchers to systematically investigate and for clinicians to treat. The goal of this workshop is to engage clinicians and clinical researchers in a dialogue about the relevance of laboratory-based eating behavior studies to clinical practice. Research results from three recent studies will be presented and the relevance to clinical practice will be discussed. Dr. Michael Devlin will present the rationale and development of an adolescent eating behavior laboratory and preliminary data from normal-weight, over-weight and obese teens prior to bariatric surgery. Dr. Laurel Mayer will present findings from a multiple-item laboratory meal study conducted in hospitalized patients with anorexia nervosa (AN) before and after normalizing weight. Dr. Joanna Steinglass will discuss the role of fear and avoidance in AN eating behavior and will present preliminary data regarding the adaptation of exposure therapy interventions for relapse prevention treatment of patients with AN. Dr. Evelyn Attia will discuss how these findings inform clinical practice.
I. Maintenance Treatment and Long-Term Support for Eating Disorders: Extending the Reach of Specialized Treatment Centers

Stephanie Bauer, PhD, Research Fellow, University of Heidelberg, Heidelberg, Germany; Hans Kordy, PhD, Director, University of Heidelberg, Heidelberg, Germany

A number of effective treatments for eating disorders (ED) exist. However, at the end of even the best available treatment, a substantial portion of patients is not symptom-free. In addition, the risk of relapse following successful treatment is high. Finally, a subgroup of patients has to be described as chronically ill and needs specialized care repeatedly throughout the course of their illness. Thus it appears that there is a need for extending the reach of specialized institutions to stabilize treatment gains by providing additional support to patients following their discharge. Such programs have to meet several requirements: 1. Given that ED follow very heterogeneous courses, maintenance and long-term programs have to be flexible enough to meet patients’ individual needs for support in the various stages of their illness, 2. They have to be feasible for both patients and institutions in routine care, and 3. They have to be cost-effective. Interventions based on Information Technology (IT) promise to meet these requirements: They allow to continuously monitor patients’ symptoms, to inform clinicians on their patients’ symptom status and changes over time, and thus to offer timely support of varying intensity at reasonable effort. Over the past years, the Center for Psychotherapy Research has developed and evaluated various forms of IT-enhanced interventions aiming at the optimization of care. In this workshop we will introduce an Internet-based platform developed for the maintenance treatment and long-term support of ED patients. The various online components of the program will be demonstrated and illustrated with clinical examples. Finally, we will discuss how individualized maintenance treatment strategies may optimize healthcare for ED patients taking into account service research and cost-effectiveness considerations.

J. REGULATION OF CUES FOR CHILDHOOD OBESITY; THE ROC INTERVENTION

Kerri Boutelle, PhD, Associate Professor, University of California, San Diego, La Jolla, CA, USA; Nancy Zucker, PhD, Assistant Professor, Duke University, Durham, NC, NC, USA; Carol Peterson, PhD, Assistant Professor, University of Minnesota, Minneapolis, MN, USA

Pediatric obesity affects 1/3 of children in the US, which is associated with significant medical and psychological comorbidities. Environmental challenges make sustained obesity management seemingly insurmountable and necessitate the development of targeted approaches to help children manage the current obesogenic environment. Schachter’s externality theory of obesity suggests that overweight individuals share an enhanced sensitivity to external food cues and decreased sensitivity to feelings of satiety. Focusing on food cue sensitivity and internal hunger cues is an undeveloped area of interventions for children who are food stimulated, potentially helping them navigate perpetual contextual pressures to eat. Eating in the absence of hunger is considered a measure of disinhibited eating in children, has been suggested as pathogonomic of binge eating disorder in children, and can be operationalized via a free access paradigm. This workshop will describe two novel 8-week treatments for children who eat in the absence of hunger and their mothers. The two treatments differentially focus on recognizing internal cues of hunger vs. resisting external cues that elicit craving. The first treatment, entitled “Volcravo”, is based on a cue responsibility and sensitivity training paradigm to decrease children’s responsiveness to foods they crave. The second treatment, entitled “CAAT”, uses appetite awareness training to increase the children’s responsiveness to their own hunger cues. Both treatments are presented in age-appropriate language, using metaphors that are useful to 8-12 year old children and their families, and use in vivo exposure. Both treatments include basic behavioral treatment skills, including stimulus control, coping skills training, and parenting skills. The first pilot trial is underway, and pre and post treatment data will be presented including effects on laboratory measures of eating in the absence of hunger.

Lunch on Your Own

12:15 – 1:30 p.m.

Special Interest Group (SIG) Annual Meetings

The following Special Interest Groups will hold annual meetings. New members are welcome. Additional SIG meetings will be held on Saturday, May 2 from 8:00 – 9:30 a.m. and 12:30 – 1:45 p.m.

Plenary Session I: THE STIGMATIZATION OF EATING DISORDERS
Moderators: Ulrike Schmidt, MD, PhD, FAED, Maudsley Hospital, London, UK and Josie Geller, PhD, St. Paul’s Hospital, Vancouver, BC, Canada

Mental illnesses are highly stigmatized conditions and eating disorders and obesity are no exception. Stigmatizing beliefs about eating disorders and obesity include that these disorders reflect a weakness of character, are self-inflicted, that outcome is poor, that the disorders are incurable and that it is difficult to communicate with people who have these disorders. Stigmatizing beliefs about mental illness are deeply rooted in society and result in poorer outcomes, distress and discrimination for those with mental illness. Health professionals are not exempt from these beliefs. Professor Bruce Link will open this plenary by giving an introduction to the topic and reviewing the current evidence base on stigma in mental health in general. The second speaker, Professor Kathy Griffiths, will focus on ways in which stigmatization of mental disorders can be reduced, using her work on stigma reduction in depression as an exemplar. Professor Philippa Hay will talk about stigmatization of eating disorders and Professor Kelly Brownell will conclude the session by giving a global perspective on legal, economic, marketing and other issues that could simultaneously help with weight stigma, obesity and ED.

Presentations:
ON STIGMA AND ITS CONSEQUENCES FOR PEOPLE WITH MENTAL ILLNESSES
Bruce G Link, PhD, Columbia University, Mailman School of Public Health, New York, NY, USA

UNRAVELLING THE STIGMA OF DEPRESSION
Kathleen Griffiths, PhD, Australian National University, Canberra, Australia

STIGMA AND EATING DISORDERS OR “THE ELEPHANT IN THE ROOM”
Professor Philippa Hay, MD, PhD, The University of Western Sydney, Sydney, Australia

GLOBAL SOCIAL AND POLICY CHANGES TO ADDRESS EATING DISORDERS AND OBESITY
Kelly Brownell, PhD, Yale University, New Haven, CT, USA

4:00 – 4:30 p.m.
Maya Ballroom (CasaMagna Marriott)
Refreshment Break with Exhibitors

4:30 – 6:00 p.m.
Workshop Session II

................................................... Tulum A-C (JW Marriott)
INTEGRATIVE COGNITIVE-AFFECTIVE THERAPY FOR BULIMIA NERVOSA
Stephen Wonderlich, PhD, Chester Fritz Distinguished University Professor, Department of Clinical Neuroscience, University of North Dakota School of Medicine, Fargo, ND, USA; Carol Peterson, PhD, Research Assoc./Assistant Professor, University of Minnesota, Minneapolis, MN, USA

This workshop will introduce Integrative Cognitive-Affective Therapy (ICAT), a newly developed psychotherapy for bulimic symptoms. The first part of this presentation will describe the etiological/maintenance model of bulimic symptoms that has been used to develop ICAT. The workshop will then provide a detailed review of the four ICAT phases: Phase I, which introduces the importance of emotion and facilitates treatment motivation; Phase II, which implements a structured meal plan for nutritional rehabilitation; Phase III, which focuses on self-directed style, interpersonal patterns, and self-oriented cognition related to self-discrepancy; and Phase IV, which emphasizes relapse prevention strategies. Features central to all phases of ICAT will also be reviewed, including the use of emotion-focused techniques and technology-based assessments. Clinical examples will be provided to illustrate ICAT concepts and psychotherapeutic strategies. Preliminary pilot data supporting the efficacy of ICAT as well as the underlying psychopathology model will also be presented.
Thursday, April 30 (continued)

B. ...................................................... Tulum H (JW Marriott)
THE “THERAPY” IN NUTRITION THERAPY: CHALLENGES FOR THE DIETITIAN
Lisa Hoffman, BASc, BSW, MSW(cand), RD, Dietitian, University Health Network, Toronto General Hospital, Toronto, ON, Canada; Holly Dickinson, BSc, RD, Dietitian, University Health Network, Toronto General Hospital, Toronto, ON, Canada; Tracie Burke, MED(cand), BASc, RD, Dietitian, University Health Network, Toronto General Hospital, Toronto, ON, Canada

Achieving normal eating is one of the most frightening and confusing aspects of recovery from an eating disorder. The purpose of this workshop is to explore the skills and strategies that can be used by dietitians to facilitate clients’ willingness to work toward recovery-focused eating. In today’s society it has become normative to diet, control one’s weight and be overly conscious of eating for health. This workshop will explore the dilemma this creates for clients working toward recovery and look at some ways dietitians can help their clients to develop a healthy and pleasurable relationship with food. Although Nutrition Therapy is a well-established intervention for treating clients with eating disorders, the therapeutic skills required to provide effective treatment are not routinely included in dietitian education programs. From a dietitians perspective, this workshop will focus on the practical application of skills needed to develop a strong therapeutic alliance, work with clients’ ambivalence about change, address misconceptions about eating and body weight, and provide nutritional recommendations that clients both trust and understand. Through the use of case examples and clinical vignettes, this workshop will focus on the therapy involved in providing effective Nutrition Therapy. Audience participation will be encouraged through discussion and problem solving related to questions and challenges that audience members have experienced in their own clinical work. As the emphasis is on therapeutic skills, this workshop may be of interest to dietitians working with eating disorder clients and other professionals that work in a setting that includes nutrition rehabilitation.

C. ....................................................... Tulum G (JW Marriott)
UNDERSTANDING AND WORKING WITH SOCIAL COGNITION IN ANOREXIA NERVOSA
Ulrike Schmidt, MD, PhD, Professor of Eating Disorders, Institute of Psychiatry, London, United Kingdom; Anna Oldershaw, MSc, MS, Institute of Psychiatry, London, United Kingdom; Kate Tchanturia, PhD, Senior Lecturer, Institute of Psychiatry, London, United Kingdom

Social cognition has been defined as “the mental operations underlying social interactions, which include the human ability to perceive the intentions and dispositions of others” (Brothers, 1990). Aspects of social cognition encompass emotion recognition and regulation, and Theory of Mind (ToM), i.e., the ability to represent the mental states of others in terms of their intentions, desires and beliefs, and to use that representation to understand and predict behavior. Social cognition underpins social behavior. In anorexia nervosa (AN), there is considerable evidence to suggest that social functioning is substantially impaired (Schmidt et al., 1995) and that some of these difficulties are present premorbidly. The study of social cognition in AN has recently gathered momentum, building on work in other neurodevelopmental disorders such as autism (Baron-Cohen, 1995) and schizophrenia (Pinkham et al., 2006). Emerging evidence from our group and others suggests that people with AN do indeed show significant impairments in different aspects of social cognition (Tchanturia et al., 2004; Russell et al., in press; Oldershaw et al., submitted; Hambrock et al., submitted) and models of the causation and maintenance of AN incorporating social cognitive impairments are beginning to appear (Schmidt & Treasure, 2006; Zucker et al., 2007). In this workshop we will introduce the topic by briefly covering what social cognition is, and by summarizing the research evidence on social cognitive impairments in anorexia nervosa. The main part of the workshop will look at (1) how social cognitive impairments may contribute to the maintenance of AN, (2) how clinicians can use information about social cognitive impairments to talk to their patients and their carers, and (3) how in our clinical practice we address social cognitive impairments in treatment with people with AN. The format of the workshop will be interactive using videos and role-plays to support learning.

D. ........................... Mexico/Cozumel (CasaMagna Marriott)
ANOREXIA NERVOSA IN THE DESERT: OVERCOMING GEOGRAPHICAL CHALLENGES IN SERVICE DELIVERY FOR CHILDREN AND FAMILIES
Julie McCormack, Master of Science, Specialist Clinical Psychologist, Eating Disorders Program, Princess Margaret Hospital for Children, Perth, Australia; Julie Potts, Bachelor of Science, Program Manager, Eating Disorders Program, Princess Margaret Hospital for Children, Perth, Australia; Hunna Watson, PhD, Research Psychologist, Eating Disorders Program, Princess Margaret Hospital for Children, Perth, Australia; Emily Harper, Master of Science, Clinical Psychologist Registrar, Eating Disorders Program, Princess Margaret Hospital for Children, Perth, Australia

Rural individuals and families with eating disorders experience significant barriers and inequities to treatment relative to their urban counterparts. There is poorer early identification and an increased severity and length of illness, as evidenced by lower BMI at assessment and a higher readmission rates in our clinical setting. This workshop will explore geographical challenges in service provision for health providers, schools and families. The presenters will draw on findings from a clinical audit and research study conducted in Western Australia that investigated patient and health provider experiences, and outcomes of three innovative treatment pathways to address these challenges. The three innovations were the development of an internet group therapy program, rural in reach training and consultation and creative use of step-down day-hospital treatment. Using case examples, we will explore common dilemmas including the maintenance of therapeutic relationships over distance, differences between rural and city cultures, and utilization of technology. Together with the audience we will workshop possibilities to overcome challenges in order to reduce barriers and increase equity of service access in different treatment settings.
Thursday, April 30 (continued)

E. ........................................................ Tulum D (JW Marriott)
NARROWING THE RESEARCH-PRACTICE GAP IN PSYCHOTHERAPY FOR EATING DISORDERS: IDENTIFYING COMMON GROUND
Kristin von Ranson, PhD, Associate Professor of Psychology, University of Calgary, Calgary, AB, Canada; Susann Laverty, PhD, Senior Counselor, University of Calgary, Calgary, AB, Canada
Psychotherapists use a variety of approaches in treating eating disorders. Most common is an eclectic approach, which is consistent with therapists’ paramount desire to tailor treatment to individual client needs (von Ranson & Robinson, 2006). By contrast, clinical trials suggest that cognitive-behavior therapy and interpersonal psychotherapy are most effective in treating many eating disorders (National Institute for Clinical Excellence, 2004). Thus a gap exists between approaches described by researchers as “gold standards” for eating disorders treatment and those in use by front-line psychotherapists. How do we reconcile research and practice perspectives? This workshop will explore contentious issues related to the selection of psychotherapeutic approaches and techniques in an atmosphere of respect for diverse perspectives and to learn from one another. The goals of this workshop are to: (1) discuss the research-practice gap in psychotherapy for eating disorders; (2) re-examine what practices are in the best interests of clients; (3) strengthen best practices in eating disorders research and treatment; and (4), we will describe recent Canadian survey findings describing therapists’ approaches to and motivations for eating disorders treatment, the definition of treatment efficacy used by researchers, and best practices for psychotherapy for eating disorders. Next, we will present participants with controversial questions for discussion, such as: What produces change in eating disorders treatment? How do we know when treatment is working? What key factors should drive clinical decision-making regarding treatment? What problems are there with applying research findings to psychotherapy for eating disorders, or with relying on clinical acumen alone? What roles should clients play in making decisions about their treatment? Finally, we will seek common ground and guide participants in considering how each one can work toward narrowing the research/practice divide.

F. ......................................................... Tulum E (JW Marriott)
DISENGAGEMENT OR DIRECT INTERVENTION: WHAT IS A PARENT TO DO? CSW
Judith Brisman, PhD, Director EDRC, Eating Disorder Resource Center, NYC, NY, USA; Judith Rabino, PhD, Director, American Eating Disorders Center, Lido Beach, NY, USA
Currently there is much controversy regarding the role of parents when a teenager or child has an eating disorder. Approaches veer from encouraging active refeeding to limiting parental intervention. All parents need to be involved with their eating-disordered child or teen— the question is how. This workshop will offer clinical, theoretical and experiential means of considering how the therapist best guides parents with their urgent questions as to what to do next. The workshop will begin with an overview of conceptual paradigms that guide our work, comparing and contrasting the Maudsley strategic approach with interpersonally-informed strategies of parental disengagement from the issues with food. Treatment outcome studies will be reviewed. Interpersonal and relational theory will inform a discussion that considers what kind of parental involvement is best in differing situations, given varying psychological, familial and developmental pictures. Regardless of the type of parental intervention, there are always many specific things families can do to use this point of crisis as an opportunity to allow for better care of everyone in the family— and to specifically set the stage for the possibility of recovery. The eating disorder can be used to consider issues related to communication, boundaries, rights and responsibilities for everyone involved. Case examples will be used throughout and audience discussion and participation will be encouraged. A Powerpoint presentation will highlight theoretical and clinical material.

WE’RE IN THIS TOGETHER: BUILDING COLLABORATIVE ALLIANCES BETWEEN FAMILIES AND PROFESSIONAL CARE GIVERS
Kathryn Westin, MA, President EDC, Emily Program, Bethpage, TN, USA; Doris Smeltzer, MA, MFT, President, Andrea’s Voice Foundation, Napa, CA, USA; Grainne Smith, Dip. Ed., Director, NEEDS Scotland, Aberdeen, United Kingdom; Susan Ringwood, BA Hons, Chief Executive, BEAT, Norwich, United Kingdom
Sponsored by the AED Charter Committee and the AED Patient and Carers’ Task Force.
This workshop aims to explore with professional care givers the power of building alliances with family care givers as resources to reaching treatment goals.

The AED developed the Worldwide Charter for Action on Eating Disorders in 2006 to provide people with eating disorders, and their families and loved ones, with a list of their basic rights and reasonable expectations regarding eating disorder treatment and services. Communication emerged as a key element in each area addressed in the Charter. The core value underlying the Charter is that a partnership among people with eating disorders, their families and the treating team, with rights and responsibilities for all sides, is imperative for any quality eating disorder service or individual healthcare encounter. Effective communication between professional care givers and families leads to more effective treatment and recovery from eating disorders. Drawing on evidence based research and personal experience from around the globe, members of the AED Charter Committee and Patient Carers’ Task Force will present on the importance of open communication, engagement, and working in partnership with treatment teams. The presenters include Susan Ringwood, an internationally known expert on supporting families and carers; Grainne Smith, a carer, presenter and author on effective communication; and Doris Smeltzer, a mother who has spent the past 10 years fighting eating disorders in her daughter’s name. The moderator is Kitty Westin, a carer and activist who has traveled the globe speaking on the importance of advocacy.

The Worldwide Charter for Action on Eating Disorders will be used as a focus for debate.
Thursday, April 30 (continued)

H...............................................................Uxmal 1 & 2 (JW Marriott)
NO PRESCRIPTION NECESSARY: ABUSE OF OVER-THE-COUNTER DRUGS AMONG EATING DISORDERED PATIENTS
Deborah Mangham, MD, Assistant Medical Director, Melrose Institute, St. Louis Park, MN, USA; Ann Vosti, MD, Lead Physician, Partial Hospital Program, Melrose Institute, St. Louis Park, MN, USA; Joel Jahraus, MD, Executive Director, Melrose Institute, St. Louis Park, MN, USA

Many eating disordered patients abuse non prescription substances in an attempt to lose weight. They typically use these drugs in supra therapeutic doses and in potentially toxic combinations. Our purpose is to familiarize the clinician with the constantly changing landscape of over the counter (OTC) drug abuse. Our presentation style will be both didactic and interactive. We will discuss the major categories of OTC drugs that are abused by eating disordered patients; laxatives, diet pills, diuretics and emetics. We will describe the toxic effects of each class individually and in combination. The workshop will include several representative case reports from our practice. Presenters will review the latest trends in OTC drug abuse including new products such as hoodia and orlistat, and products that have been removed from the market such as phenylpropanolamine and ephedra. We will discuss the availability of prescription and non prescription medications via the internet. Our workshop will include a comprehensive literature review highlighting prevalence data, demographic profiles, risk factors, and comorbidities of patients who abuse OTC drugs. We will display some of the products more commonly abused. Interspersed throughout our presentation will be provocative discussion questions for audience interaction and participation.

A SEXUALITY GROUP FOR PEOPLE WITH EATING DISORDERS
Kelli Young, MEd, Occupational Therapist- Psychotherapist, University Health Network-Toronto General Hospital, Toronto, ON, Canada; Debbi Tjeng, MSW, Social Worker- Psychotherapist, University Health Network-Toronto General Hospital, Toronto, ON, Canada

The purpose of this workshop is to present a framework for exploring the topic of sexuality within a group therapy program for individuals with eating disorders. To date, the literature pertaining to the connection between eating disorders and sexuality has been scarce. Furthermore, the subject of sexuality is seldom a focal point in treatment programs. Therapists, like their clients, may feel anxious discussing matters related to sex and sexuality, and they may feel ill-equipped to manage this material therapeutically. The therapeutic factors inherent in a group make it an ideal forum for addressing this important topic. The presenters of this workshop have co-facilitated a “Sexuality Group” in the Eating Disorders Program at the Toronto General Hospital for the past 13 years. Together they will present approaches and methods used in their group that participants can adapt for use in their own practice. Through case discussions and a thorough review of current literature, participants will gain an appreciation for the relevance of addressing sexual attitudes, knowledge, and behaviors in clients with eating disorders. Video-taped interviews will illuminate the particular struggles facing many clients with eating disorders as they attempt to explore their sexual identities and navigate intimate relationships. This workshop will provide participants with the strategies and tools necessary to develop and implement a sexuality group in their own settings. Using fun and interactive methods, the presenters will dispel commonly accepted myths about sex and sexuality. They will also demonstrate techniques, activities, and interventions used in their group and suggest ways in which participants can adapt these for use in their own groups. This workshop will incorporate both didactic and experiential components, allowing ample time for group discussion.

ACUTE AND CHRONIC CHANGES IN REFEEDING OF ANOREXIA NERVOSA
Simon Clarke, FRACP, Director, Westmead Hospital, Sydney, CT, Australia; Michael Kahn, FRACP, Director, Westmead Hospital, Sydney, CT, Australia

Patients with Anorexia Nervosa (AN) requiring refeeding are often treated inadequately or not at all because of inappropriate fears about the morbidity and mortality of the syndrome. The authors will discuss their experience in managing over 1000 inpatients admitted with AN in particular the new findings related to the syndrome. This should enable more appropriate management of the condition and its sequelae. Recent new theories regarding the aetiology of the refeeding syndrome will enable clinicians to review their treatment of the patients. Discussion will take place regarding the need to manage patients outside recognized eating disorders units.

Our research has highlighted the changes taking place in patients with chronic refeeding over time. Cognitive and emotional changes take place over weeks at different times. There are significant changes in body composition we have discovered which will result in a change in discharge criteria after refeeding. The research into the 4 compartments (fat, water, protein and bone) is unique and should produce a reappraisal of the measures utilized in clinical management.
Friday, May 1

7:00 – 8:00 a.m. Tulum F & G (JW Marriott) Current, New and Prospective Member Breakfast

7:00 – 8:00 a.m. Maya Ballroom (CasaMagna Marriott) Continental Breakfast with Exhibitors

7:00 a.m. – Noon Maya Ballroom (CasaMagna Marriott) Poster Session II Set-Up & Viewing / Exhibit Hall Open

7:00 a.m. – Noon Tulum Foyer (JW Marriott) Registration

8:00 – 10:00 a.m. Tulum A – E (JW Marriott) Plenary Session II: CULTURE AND GENES: IS IT TIME FOR NEW MODELS AND NEW METAPHORS IN THINKING ABOUT PREDISPOSITIONS, TRIGGERS, AND CAUSAL RISK FACTORS?

Moderator: Anne E. Becker, MD, PhD, ScM, Harvard Medical School, Boston, MA, USA
This plenary session will provide a critical examination of biopsychiatric, developmental, and sociocultural models in the context of the types of interlocking evidence necessary to establish a causal risk factor. The time is ripe for this discussion for at least 3 reasons. First, the bodies of research pertaining to the models in question are quite large and of direct relevance to the very meaning of the word “cause” or the phrase “causal risk factor”—and yet they are quite prone to being misunderstood and inappropriately applied. Second, because there remains tension between the biopsychiatric and sociocultural perspectives, a critical examination of both models, particularly from a developmental perspective, is of value in determining whether the clash between these perspectives is necessary or whether there is a synthesis of these models that may ultimately provide the most meaningful explanation of the etiology of the eating disorders. Finally, it is worth examining in detail the ways in which these models have specific implications for treatment and preventive interventions.

Presentations:

**SOCIOCULTURAL MODELS: A DEVELOPMENTAL PERSPECTIVE**
Linda Smolak, PhD, Kenyon College, Gambier, OH, USA

**BEHAVIOR GENETIC MODELS: A DEVELOPMENTAL PERSPECTIVE**
Kelly Klump, PhD, FAED, Michigan State University, East Lansing, MI, USA

HIGHLIGHTING MEDIA AND OTHER CULTURAL FACTORS: A CRITICAL EXAMINATION OF BEHAVIOR GENETICS AND BIOPSYCHIATRY
Michael P. Levine, PhD, FAED, Kenyon College, Gambier, OH, USA

PULLING IT ALL TOGETHER: EXPANDED MODELS AND NEW METAPHORS?
Tracey Wade, PhD, FAED, Flinders University, Adelaide, Australia

10:00 – 10:30 a.m. Maya Ballroom (CasaMagna Marriott) Refreshment Break with Exhibitors

10:30 a.m. – Noon Oral Scientific Paper Session I (Brief scientific papers for presentation and discussion)

A. BED & Obesity I Tulum D (JW Marriott) Chair: Ruth Striegel-Moore, PhD, FAED

10:30 a.m.

P1
THE STABILITY OF EATING PATHOLOGY AND RISK FACTORS FOR LOSS OF CONTROL OVER EATING AMONG OVERWEIGHT YOUTH: A 6-YEAR LONGITUDINAL STUDY
Lien Goossens, Master, PhD Student, Ghent University, Ghent, Belgium; Caroline Braet, PhD, Professor, Ghent University, Ghent, Belgium; Sandra Verbeken, Master, PhD Student, Ghent University, Ghent, Belgium; Veerle Decaluwé, PhD, Lessius University College, Antwerp, Belgium; Guy Bosmans, Master, PhD Student, Ghent University, Ghent, Belgium

10:45 a.m.

P2
TOWARDS DEFINING SUBTYPES IN OVERWEIGHT CHILDREN: DIFFERENCES IN SYMPTOMATOLOGY AND TREATMENT OUTCOMES
Caroline Braet, PhD, Professor, Ghent University, Ghent, Belgium; Wim Beyers, PhD, Professor, Ghent University, Ghent, Belgium

11:00 a.m.

P3
THE EFFECT OF EXPECTANCIES AND MOOD ON OVEREATING IN PATIENTS WITH BINGE EATING DISORDER
Alexandra Dingemans, MSc, Researcher/PhD-Student, Center for Eating Disorders Ursula, Leidschendam, Netherlands; Carolien Martijn, PhD, Assistant Professor, University Maastricht, Maastricht, Netherlands; Eric van Furth, PhD, Director, Center for Eating Disorders Ursula, Leidschendam, Netherlands; Anita Jansen, PhD, Professor, University Maastricht, Maastricht, Netherlands
Friday, May 1 (continued)

11:15 a.m.
P4
AN EXAMINATION OF BODY CHECKING AND BODY AVOIDANCE IN PATIENTS UNDERGOING BARIATRIC SURGERY
Danae Hudson, PhD, Associate Professor of Psychology, Missouri State University, Springfield, MO, USA; Brooke Whisenhunt, PhD, Associate Professor, Missouri State University, Springfield, MO, USA; Nathaniel Barnicle, MA, Graduate Student, Missouri State University, Springfield, MO, USA; Megan Costello, MA, Graduate Student, Missouri State University, Springfield, MO, USA

11:30 a.m.
P5
MINDFULNESS VS. PSYCHOEDUCATION TREATMENT OF BINGE EATING: DIFFERENTIAL OUTCOMES ASSOCIATED WITH BASELINE DIETARY RESTRAINT AND DISINHIBITION
Janna Fikkan, PhD, Postdoctoral Fellow, Duke Integrative Medicine, Durham, NC, USA; Jeffrey Greeson, PhD, Assistant Professor, Duke Integrative Medicine, Durham, NC, USA; Jean Kristeller, PhD, Professor of Psychology, Indiana State University, Terre Haute, IN, USA; Virgil Sheets, PhD, Professor of Psychology, Indiana State University, Terre Haute, IN, USA; Ruth Wolever, PhD, Assistant Professor, Duke Integrative Medicine, Durham, NC, USA

11:45 a.m.
P6
AN EXAMINATION OF BINGE EATING EPISODE DURATION IN INDIVIDUALS WITH BINGE EATING DISORDER
Troy Ertelt, MA, Graduate Research Assistant, University of North Dakota, Grand Forks, ND, USA; Heather Simonich, MA, Clinical Research Coordinator, Neuropsychiatric Research Institute, Fargo, ND, USA; Joanna Marino, MA, Graduate Research Assistant, University of North Dakota, Grand Forks, ND, USA; James Mitchell, MD, President, Neuropsychiatric Research Institute, Fargo, ND, USA; Kathy Lancaster, BA, Clinical Research Coordinator, Neuropsychiatric Research Institute, Fargo, ND, USA; Scott Crow, MD, Professor, University of Minnesota Department of Psychiatry, Minneapolis, MN, USA; Carol Peterson, PhD, Research Associate, Eating Disorders Research Program, Minneapolis, MN, USA

B. Biology/Medical Complications I Tulum H (JW Marriott)
Chair: Howard Steiger, PhD, FAED

10:30 a.m.
P7
WHAT IS DIETARY RESTRAINT? A CLOSER LOOK AT ITS FACTOR STRUCTURE, GENETIC ETIOLOGY, AND ASSOCIATION WITH DISORDERED EATING
Sarah Racine, BS, Graduate Student, Michigan State University, Lansing, MI, USA; Kristen Culbert, MA, Graduate Student, Michigan State University, East Lansing, MI, USA; Christine Larson, PhD, Assistant Professor, University of Wisconsin-Milwaukee, Milwaukee, WI, USA; Kelly Klump, PhD, Associate Professor, Michigan State University, East Lansing, MI, USA

10:45 a.m.
P8
ASSOCIATION BETWEEN THE BRAIN-SPECIFIC TRYPTOPHAN HYDROXYLASE (TPH2) GENE AND COMPULSIVITY IN BULIMIA-SPECTRUM DISORDERS
Patricia Groleau, BA, PhD, Student, McGill University, Douglas Mental Health University Institute, Montreal, QB, Canada; Jodie Richardson, BSc, PhD, Student, McGill University, Montreal, QB, Canada; Howard Steiger, PhD, Director, McGill University, Montreal, QB, Canada; Mimi Israel, MD, Chief Psychiatrist, McGill University, Douglas Institute, Montreal, QB, Canada; Kenneth Bruce, PhD, Associate Professor, McGill University, Montreal, QB, Canada; Heidi Howard, PhD, Post-doc Student, Douglas Mental Health University Institute, Montreal, QB, Canada

11:00 a.m.
P9
GENETIC COVARIATION BETWEEN AGE OF MENARCHE AND DISORDERED EATING
Jessica Baker, MS, Doctoral Student, Virginia Commonwealth University, Richmond, VA, USA; Paul Lichtenstein, PhD, Professor in Genetic Epidemiology, Karolinska Institute, Stockholm, Sweden; Kenneth Kendler, MD, Distinguished Professor, Virginia Commonwealth University, Richmond, VA, USA

11:15 a.m.
P10
SELF-INJURIOUS BEHAVIOR (SIB), IN THE CONTEXT OF IMPULSIVITY, BORDERLINE PERSONALITY DISORDER (BPD) AND SEXUAL ABUSE (SX-AB) IN EATING DISORDERS (ED): PSYCHOLOGICAL AND GENETIC FACTORS
Manfred Fichter, Professor, MD, Roseneck Hospital for Behavioral Medicine affil. with the University of Munich, Prien, Germany
Friday, May 1 (continued)

11:30 a.m.
P11
ASSOCIATION OF GLUCOCORTICOID RECEPTOR GENE POLYMORPHISM BCL1 AND CHILDHOOD ABUSE WITH RISK OF BULIMIA NERVOSA IN WOMEN
Kenneth Bruce, PhD, Assistant Professor McGill University, Montreal, QB, Canada; Howard Steiger, PhD, Director & Professor, Douglas Inst & McGill U, Montreal, QB, Canada; Mimi Israel, MD, Psychiatrist in Chief, Douglas Institute, Montreal, QB, Canada; Ridha Jouber, MD, PhD, Psychiatrist, Douglas Institute, Montreal, QB, Canada; Jodie Richardson, BSc, Doctoral student, Douglas Institute & McGill U, Montreal, QB, Canada; Patricia Groleau, BA, Doctoral student, Douglas Inst & McGill U, Montreal, QB, Canada

11:45 a.m.
P12
FAMILY BASED-ASSOCIATION STUDY BETWEEN EATING DISORDER AND SEROTONINERGIC GENES
Beatriz Camarena, PhD-student, MSc., Instituto Nacional de Psiquiatria Ramon de la Fuente, Mexico City, Mexico

10:30 a.m.
P15
PEER VICTIMIZATION AND EATING DISORDER SYMPTOMS: THE MEDIATING ROLES OF PERFECTIONISM AND FEARS OF HUMILIATION/REJECTION
Sherry Van Blyderveen, PhD., Psychologist & Assistant Professor (Adjunct), Hamilton Health Sciences/McMaster University, Hamilton, ON, Canada; Jessie Miller, PhD., Post-Doctoral Student, McMaster University, Hamilton, ON, Canada

10:45 a.m.
P16
TIMING OF PUBERTAL DEVELOPMENT AND RISK FOR EATING DISORDERS
Fiona McNicholas, FRC Psych, Professor, Lucena Clinic, Dublin 6, Ireland; Edwina Barry, MD, Dr, Lucena Clinic, Dublin 6, Ireland; Ruth Lennon, MSc, MS, Lucena Clinic, Dublin 6, Ireland

11:00 a.m.
P17
PAEDIATRIC HEALTHCARE PROVIDERS AND RESEARCHERS CAN WEIGHT NO LONGER!
Debra Katzman, MD, Professor of Pediatrics, The Hospital for Sick Children, Toronto, ON, Canada; Cathleen Steinegger, MD, Assistant Professor of Pediatrics, The Hospital for Sick Children, Toronto, ON, Canada; Nuray Ö, Kanbur, MD, The Hospital for Sick Children, Toronto, ON, Canada; Deirdre Snelgrove, MA, Research Coordinator, The Hospital for Sick Children, Toronto, ON, Canada; Leora Pinhas, MD, Assistant Professor of Psychiatry, The Hospital for Sick Children, Toronto, ON, Canada

11:15 a.m.
P18
PSYCHIATRIC COMORBIDITY IN CHILDREN AND ADOLESCENTS WITH EATING DISORDERS
Caroline Björck, PhD, Programme director, Clinical neuroscience/Karolinska Institutet, Stockholm, Sweden; Monica Sandberg, MSc, Research Assistant, Clinical neuroscience/Karolinska Institutet, Stockholm, Sweden; Anna-Maria af Sandeberg, MD, Clinical director, Clinical neuroscience/Karolinska Institutet, Stockholm, Sweden

ARE WE THERE YET? ON THE ROAD TO BRIDGING RESEARCH AND PRACTICE
This interactive problem-solving session, re-named the AED Global Working Session, follows-up on the themes raised in Seattle at the (formerly) AED World Summit Session III. The session will begin with a brief overview of the progress made over the past year in bridging research and practice within the AED through the implementation of steps developed at the 2008 Seattle session and initial steps outlined in the AED Road Map for bridging the gap. The remainder of the session will use small and large group discussion to clarify the core philosophical differences that serve as roadblocks to research-practice integration and to examine ways to enhance the effectiveness of our current Road Map in addressing these blocks. Copies of the Road Map will be provided to participants.

Poster Session II Viewing

8:00 – 9:30 a.m.
Special Interest Group (SIG) Discussion Panels

A. ........................................................Tulum A (JW Marriott)
PREDICTORS AND RISKS FOR DISORDERED EATING AND BODY DISSATISFACTION IN BALLET AND SPORT
Moderator: Ron A. Thompson, PhD, FAED, Private Practice, Bloomington, Indiana USA
Sponsored by the Athlete Special Interest Group
Sport participation has been associated with both increased and decreased risk of disordered eating. This panel will discuss possible risk, predictive, and protective factors associated with body dissatisfaction and disordered eating in sport and ballet. Specific issues discussed will include age, gender, the intensity of sport participation, the type of participation (higher risk activities such as ballet and gymnastics versus non-lean sport participation), and the effect of revealing attire on female participants in sport and dance.

Presentations:

RISK AND PROTECTIVE FACTORS IN WOMEN’S ARTISTIC GYMNASTICS: THE RELATIONSHIP TO DISORDERED EATING AND NEGATIVE BODY IMAGE
Jennifer Harriger, MS, Doctoral Student, Dept of Psychology, University of New Mexico, NM, USA
The presenter will discuss how characteristics such as perfectionism, athletic identity, self-esteem, objectified body
consciousness, level of training, and pubertal development may either protect or predispose gymnasts to negative body image or eating pathology. Implications for future directions in prevention and treatment of athletes with eating disorders will be discussed.

EATING DISORDERS IN BALLET STUDENTS FROM BUENOS AIRES
Guillermina Rutsztein, PhD, Dept of Psychology, Universidad de Buenos Aires, Argentina
The presenter will discuss a study whose purpose was to assess the degree of body image satisfaction in young ballet students and identify those at high risk for the development of eating disorders. Findings indicated 17.7% of 107 female ballet students (aged 13 to 18) were judged to be at risk for developing an eating disorder. The factors of age, education level, socio-economic status, current weight, ideal weight, and psychometric data (EDI-2, FS Figure Scale) will be discussed relative to study findings.

WEIGHING IN FOR THE TEAM: THE IMPACT OF EARLY ADOLESCENT WEIGHT TRAJECTORIES AND SPORTS INVOLVEMENT ON LATE ADOLESCENT DISORDERED EATING AND BODY DISSATISFACTION
Kristen, Fay, MA, Eating and Weight Disorders Clinic, Boston, MA, USA
The presenter will discuss a study using a group-based modeling strategy to examine relations among weight trajectories and sports involvement in early to late adolescence on disordered eating attitudes and body dissatisfaction in late adolescence. Empirically derived weight status trajectories across early to middle adolescence for girls and boys will be discussed as predictors of late adolescent eating disorder outcomes. The type and intensity of sport participation will be examined as moderator variables.

REVEALING ATHLETE UNIFORMS AND THEIR POSSIBLE EFFECTS ON COMPETITIVE THINNESS, BODY DISSATISFACTION, AND DISORDERED EATING IN FEMALE ATHLETES
Roberta Sherman, PhD, FAED, Private Practice, Bloomington, Indiana, USA
The presenter will examine the role of revealing uniforms or attire in competitive thinness, body dissatisfaction, and disordered eating in female athletes. In addition to a review of the literature, examples of revealing attire will be shown to illustrate the differences in uniforms of male and female athletes in the same sports. Recommendations regarding current and future research, as well as recommendations regarding changes in current uniforms will be discussed.

B. ....................................................... Tulum B (JW Marriott)
CAN OBESITY TREATMENT AND PREVENTION BE RECONCILED WITH THE TREATMENT AND PREVENTION OF EATING AND BODY IMAGE DISORDERS?
Michael Levine, PhD, FAED, Kenyon College, Gambier, OH, USA
Co-sponsored by the Body Image SIG, Health at Every Size SIG and the Prevention SIG
This session will include a moderated panel discussion focusing on the apparent conflict between attempts to treat and prevent eating disorders and attempts to treat and prevent obesity. The focus will include such questions as: do obesity interventions inherently stigmatize individuals who are fat? Can obesity prevention and treatment co-exist with proactive body image programming? Are there iatrogenic effects on eating disturbance that result from obesity prevention and/or treatment? How do we balance the needs of many obese persons with the needs of a smaller subset of individuals with eating disorders? The main aim of this panel is to explore the significant controversy in this area, which has repeatedly sparked lengthy email debates on a variety of listservs.

Specific presentations will not be made. Rather, speakers will speak briefly about their area of expertise and their overall view on the controversy. This will be followed by discussion points facilitated by moderator and fielding of audience questions, group and audience discussion. The panel will work to identify future research goals that might better inform this dialectic.

Panelists:
Sigrún Danielsdóttir, Cand.Psych, Landspitali University Hospital, Reykjavik, Iceland
Drew Anderson, PhD, SUNY Albany, Albany, NY, USA
Leslie J. Heinberg, PhD. Clinic Lerner College of Medicine of Case Western Reserve University, Cleveland, OH, USA
Deb Burgard, PhD., Private Practice, Los Altos, CA, USA
Saturday, May 2 (continued)

C. ........................................................ Tulum C (JW Marriott)
A SMILE SO WIDE TO HIDE THE DISEASE: A CLINICAL & BEHAVIORAL APPROACH TO THE ORAL AND DENTAL ASPECTS OF EATING DISORDERS
Moderator: Ovidio Bermudez, MD Medical Director, ED Program
Laureate Psychiatric Clinic and Hospital, Tulsa, OK

Sponsored by the Medical Care SIG
Eating disorders are clear and present threats particularly to women’s and in an increasing frequency to men’s health. However, there have been marked advances in our knowledge and understanding of these disorders over time. One important benefit of our growing knowledge is understanding the need for a multi-disciplinary and coordinated approach to treatment. Dental professionals can make important contributions as members of the eating disorder treatment team, such as early recognition and diagnosis and treatment of the oral manifestations of eating disorders. It is also clear that this kind of collaboration between the mental health/medical care providers and the dental professionals requires a high level of knowledge sharing among different fields of expertise. Thus, the aim of this session, which is specifically designed for non-dental professionals, is to provide an overview of general oral and dental aspects of eating disorders in order to create a better understanding of its oral implications and to incorporate different treatment strategies.

Presentations:

AN OVERVIEW OF COMMON ORAL AND DENTAL FINDINGS AND TREATMENT STRATEGIES FOR EATING DISORDERS
Yigit Sirin DDS, PhD Istanbul University, Faculty of Dentistry, Department of Oral Surgery, Istanbul, Turkey

This presentation will provide information on the following subjects: common oral and dental findings and treatment options, oral hygiene habits of eating disorder patients and the impact of eating disorders to oral health, the role of dental professional in early recognition of eating disorders, how do the dental professional help your diagnosis? The story of St. Sophronius and things you should know: false knowledge among dental professionals and pitfalls of the dental literature about eating disorders.

DENTAL ANXIETY AND FEAR OF DENTISTRY IN EATING DISORDER PATIENTS
Basak Yucel MD, PhD Istanbul University, Faculty of Medicine, Department of Psychiatry, Istanbul, Turkey

Do you cringe at the thought of sitting in the dental chair? Are you afraid of the sound of the dental drill? Well, if you do, you are not alone. Dental fear is ranked fifth among the most common fears. Primary reason for people to avoid dental treatment is the fear of pain. The fear and anxiety may result in complete avoidance which triggers the deterioration of the teeth and it can lead to lifelong problems. What to do if you are also suffering from a disorder that is already destroying your oral health? The aim of this presentation is to provide information on fearful dental behaviour of eating disorder patients and their sociodemographic background.

WHEN THERE’S SIGNIFICANT PAIN AND NO GAIN: TREATING THE RESISTANT AND REFRACTORY PATIENT WITH COMORBID TRAUMA AND EATING DISORDER
Moderators: Laura J. Weisberg, PhD (Co-Chair, Psychodynamic Psychotherapy SIG; Duke University Medical Center, Durham, NC, USA) and Diann M. Ackard, PhD (Co-Chair, Trauma and Eating Disorders SIG; Private Practice, Golden Valley, MN, USA; and Department of Epidemiology and Community Health, School of Public Health, University of Minnesota, Minneapolis, MN, USA)
Co-Sponsored by the Psychodynamic Psychotherapy SIG and Trauma and Eating Disorders SIG

This international panel will tackle difficult and complex issues associated with the resistant, refractory eating disordered patient who also has a history of trauma. Dr. Josie Geller will discuss motivational issues and offer effective methods for promoting change among this patient population. Dr. Yael Latzer will present an integrative approach, drawing upon a number of different empirically validated treatments, to treating Night Eating Syndrome in patients with bulimia nervosa or binge eating disorder who have experienced trauma. Dr. Timothy Brewerton will present the integration of knowledge from the eating disorder and traumatology fields on the challenges facing therapists who work with this population – - challenges including legal issues, countertransference, and vicarious traumatization. Dr. Robert Palmer will present clinical case material from “extreme” cases providing an opportunity to discuss the experience of working with this challenging subgroup of patients.

ADDRESSING MOTIVATIONAL ISSUES IN TREATING INDIVIDUALS WITH AN EATING DISORDER AND TRAUMA HISTORY
Josie Geller, PhD, Director of Research, Eating Disorders Program at Providence Health; Associate Professor, Department of Psychiatry, University of British Columbia, Canada; and Senior Scholar, Michael Smith Foundation for Health Research

Dr. Geller will discuss motivational issues in the care of individuals with eating disorder and trauma history. Critical to promoting change in this group is a trusting therapeutic alliance and a treatment plan that takes into account the function of eating disorder symptoms, personal barriers to recovery, and locus of control for change. The pace and timing of treatment, as well as the relative benefits of integrated vs. sequential approaches, will also be addressed.
TREATING PATIENTS WITH COMORBID EATING DISORDERS AND TRAUMA: FOCUS ON BULIMIA NERVOSA AND BINGE EATING DISORDER WITH NIGHT EATING SYNDROME

Yael Latzer, PhD, Faculty of Social Welfare and Health Sciences, Haifa University, Haifa, Israel

Dr. Latzer will present an integrative approach to the treatment of Night Eating Syndrome in bulimic and binge eating patients who have experienced trauma. This approach, developed with her colleagues O. Tzischinsky and M. Givon, emphasizes an individualized approach that incorporates elements drawn from several therapeutic models including CBT, IPT, family based treatment, EMDR, psychodynamic psychotherapy, and psychopharmacology. The treatment is based in an understanding of the syndrome as a means of coping with the emotional sequelae of the traumatic experiences.

CHALLENGES TO THERAPISTS IN THE LONG-TERM PSYCHOTHERAPY OF TRAUMATIZED EATING DISORDER PATIENTS

Timothy D. Brewerton, MD, DFAPA, FAED, Clinical Professor of Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, SC, USA

The treatment of eating disorders is a challenging undertaking for any health professional but when trauma and its sequelae enter the picture it often becomes even more daunting if not overwhelming for therapists. The fields of eating disorders and traumatology have both made impressive gains in the last several years, and this presentation will seek to integrate the best of both worlds from a clinical perspective. Regardless of theoretical orientation therapists are faced with a host of challenging issues in working with these patients, including increased comorbidity, resistance and refractoriness to treatment, potential legal issues, and a host of transference and countertransference issues, such as repetition-compulsion or reenactment of prior traumas and/or neglect, the wish to rescue, as well as vicarious traumatization and abandonment of the patient.

DILEMMAS, DITHERING, DEATH AND DOWNRIGHT PANIC

Robert Palmer, FRCPsych, Eating Disorders Service, Leicestershire Partnership NHS Trust, Brandon Mental Health Unit, Leicester General Hospital, Leicester, UK; and Editor, European Eating Disorders Review

Professor Bob Palmer will present and discuss some of the clinical dilemmas facing clinicians involved with “extreme” cases describing interventions and approaches that seemed to be effective and those that clearly were not. And ponder why?

8:00 – 9:30 a.m.  
Meet the Experts  

8:00 – 9:30 a.m.  
Special Interest Group (SIG) Annual Meetings  
The following Special Interest Groups will hold annual meetings. New members are welcome. Additional SIG meetings will be held on Thursday, April 30 from 12:15 – 1:45 p.m. and Saturday, May 2 from 12:30 – 1:45 p.m.

Workshop Session III

A.................................. Mexico/Cozumel (CasaMagna Marriott)
DOING THE MAUDSLEY APPROACH WITH HISPANIC FAMILIES : MAUDSLEY EN ESPAÑOL
Tomas Silber, MD, Medical Director, ED Program, CNMC, Children’s National Medical Center, Washington, DC, USA

This workshop will be conducted in Spanish. It is intended for Spanish speaking professionals (physicians, pediatricians, therapists etc.) who either are not familiar with, or have not practiced the Maudsley Method, and would like to learn more about it, or even desire to actually begin to employ the approach with Latino families. It will start with a didactic component describing the method, the theory underlying its application, and the evidence supporting it (randomized clinical trials). This will be followed by role playing and practical discussions on how to select families, detect contraindications to its application, empower parents, support re-feeding efforts and transition control of eating to the adolescent. The workshop is intended to be interactive and problem solving, eg: what to do when other members of a multidisciplinary treatment team are not familiar with or are even opposed to the method. It will also include an analysis of the reasons for this change in the treatment paradigm for Anorexia Nervosa and review a neurobiological hypothesis about why this treatment, by rapidly abolishing semistarvation, works so well. The workshop will end focusing on why the Maudsley approach blends naturally with the usual practices in the Hispanic culture, such as parental monitoring and supervision, filial respect, collaboration by the extended family, and recognition of expertise.
Saturday, May 2 (continued)

B. .................................................. Uxmal 1 & 2 (JW Marriott)
THE ROLE OF VOICE: A FORCE IN INDIVIDUAL RECOVERY AND SOCIETAL CHANGE
Cynthia Bulik, PhD, William R. and Jeanne H. Jordaan Distinguished Professor of Eating Disorders, University of North Carolina, Chapel Hill, Chapel Hill, NC, USA; Aimee Liu, MFA, Faculty, Goddard College, Beverly Hills, CA, USA; Susan Ringwood, BA, FRSA, Chief Executive Officer, Beat, Norwich, Norfolk, United Kingdom; Marvy Rieder, BA, FRSA, Founder/President, marVie Foundation, Blaricum, Netherlands

The individual and the collective voice are powerful instruments for change, personal and societal. Eating disorders are fraught with stigma, secrecy, and complexity, which drive sufferers and their families into shame-filled isolation. Shame and isolation also breed silence, which encourages governments, industry, and the global community to ignore the seriousness of eating disorders as an issue.

This interactive workshop, presented by the members of the AED Advisory Board, addresses the range of voices needed to strengthen and empower individual recovery, to improve eating disorder research, treatment and prevention, and to increase public awareness about the seriousness of eating disorders. AED Advisory Board Chair Susan Ringwood and members Cynthia Bulik, Aimee Liu and Marvy Rieder will discuss their own initiatives to raise individual and collective voices as agents for change. Aimee Liu, author of the highly regarded book Gaining: The Truth About Eating Disorders will discuss “the existential voice” and the use of individual expression as a pathway to recovery based on letters she has received from her readers; Cynthia Bulik, widely published researcher/clinician and author, will describe the “scientific voice” and how research can be used to bring resonance to the voice of personal recovery and political advocacy; model and activist Marvy Rieder will describe “the activist voice” and how one individual, by integrating education and awareness programs within the fashion industry, can effect social change from the inside out; and Beat Executive Director Susan Ringwood, will describe “the chorus” — the unified voice of many — and how organizations and key stakeholders can advance improvements in prevention, treatment, and research by joining forces.

Through guided discussion participants will explore ways in which they can assist in bringing about change in their own therapeutic and community settings by applying these paradigms to identify and strengthen the effective use of their own voices.

C. .................................................. Tulum C (JW Marriott)
REFLECTIONS BODY IMAGE PROGRAM: PARTNERING WITH SORORITIES IN EATING DISORDERS PREVENTION AND ADVOCACY
Carolyn Becker, PhD, Associate Professor, Trinity University, San Antonio, TX, USA; Susan Woda, MPA, Senior Director of Operations, Delta Delta Delta Fraternity, Arlington, TX, USA

Researchers have made marked progress in developing eating disorder (ED) prevention programs. The ultimate impact of such programs (e.g., true dissemination), however, will depend on partnerships with key social systems. Reflections: Body Image Program is a peer-led, 2-session, dissonance-based intervention that encourages sorority members to actively challenge the thin-ideal standard of female beauty. Reflections, which has been endorsed by the AED, was created by blending the latest ED prevention science with a participatory approach that actively engaged sorority members and leaders in the creation and expansion of the program. By April 2009, local sorority members will have contributed over 14,000 unpaid hours to the creation, testing, and ongoing management of this program at Trinity University, and the Delta Delta Delta Fraternity will have invested thousands of hours and hundreds of thousands of dollars in an effort to disseminate and expand Reflections, making it available to any sorority chapter nationwide. Additionally, Tri Delta has engaged other key partners (e.g., AED, NEDA, NOW & Seventeen Magazine) in an advocacy effort aimed at reducing fat talk among women of all ages. To date, four other national sororities, including Delta Gamma and Pi Beta Phi, have agreed to implement Reflections in one or more chapters, and multiple universities have expressed interest in the program. In this workshop we will review the history of Reflections and discuss why we believe that both an evidence-based and participatory approach was critical to the development and expansion of Reflections. The goal is for participants to learn from our experience to facilitate the development of new atypical partnerships that can impact EDs. We also will briefly review results from studies supporting the efficacy and effectiveness of Reflections, and will explain how interested workshop participants can become involved with Reflections, both at the programmatic and research level.

D. .................................................. Tulum G (JW Marriott)
A DESCRIPTION AND EXAMINATION OF A PARTIAL HOSPITALIZATION PROGRAM FOR ADULTS WITH EATING DISORDERS
Mimi Israel, MD, Psychiatrist, Associate Professor, Douglas Institute, McGill, Montreal, QB, Canada; Kenneth Bruce, PhD, Psychologist, Douglas Institute, McGill, Montreal, QB, Canada; Christiane Jolicoeur, BSc, Occupational Therapist, Douglas Institute, McGill, Montreal, QB, Canada

Consensus guidelines suggest that specialized treatment for eating disorders (EDs) should be delivered via a stepped-care approach offering graded-intensity outpatient treatments, and inpatient programs. The guidelines also highlight the lack of empirical literature on stepped-care for EDs, or on the absolute
and relative effectiveness of intensive outpatient treatments for EDs, particularly for Anorexia Nervosa. This workshop will review existing literature on partial hospitalization and day treatments and provide a detailed clinician-oriented description of the intensive outpatient treatments currently used for adults by the Douglas Institute Eating Disorders Program in Montreal. We will also examine the impact on patient care of the introduction of partial hospitalization into an already existing stepped-care program consisting of outpatient, day program, and full-hospitalization treatment modalities. In this regard, we will present treatment outcome data collected (in over 400 patients) for each service prior to, and since, the introduction of partial hospitalization in January 2004. Included here will be a description of pretreatment patient characteristics (demographics, ED diagnoses and symptoms, co-morbidity, medication use) as well as treatment-induced improvements in eating- and general psychiatric symptoms, motivation for change, and psychosocial adaptation. Data relating to patient satisfaction and treatment completion will also be discussed, and the impact of the introduction of partial hospitalization on inpatient services (e.g., length and number of admissions) highlighted. The workshop will provide specific information on the structure and function of a partial-hospitalization program for those who may be considering introducing such a program into their treatment facility. It will also offer an opportunity for brainstorming between professionals who run similar programs in order to share innovative ideas and generate future research directions.

**E..........................................................Tulum F (JW Marriott)**

**HEALTHY EXERCISE: NOT LOSING YOUR BALANCE**

Ron Thompson, PhD, FAED, Psychologist, Bloomington Center for Counseling and Human Development, Bloomington, IN, USA; Roberta Sherman, PhD, FAED, Psychologist, Bloomington Center for Counseling and Human Development, Bloomington, IN, USA

This workshop will define and discuss healthy exercise, and compare and contrast it with “unbalanced” exercise. It will examine the concept of balance in exercise, as well as how to find and maintain a healthy balance, not only in exercise but also in the relationship between exercise and eating. The consequences of unhealthy or unbalanced exercise will be contrasted with the benefits of healthy exercise, and the myth of more exercise is better will be challenged regarding health, sport performance, and immune function. Practical treatment recommendations for regaining exercise balance will be offered. Other topics to be discussed will include but not be limited to: identification of exercise problems using both quantitative and qualitative factors, difficulties associated with identifying unhealthy exercise, when exercise is in need of intervention, when exercise is part of an eating disorder, and special issues related to males and exercise.

**F..........................................................Chichen Itza 1 & 2 (JW Marriott)**

**BRIDGING THE CLINICAL-RESEARCH GAP: USING AN EFFECTIVENESS DESIGN TO TEST CBT EFFICACY FINDINGS IN A FEMINIST-RELATIONAL INTENSIVE OUTPATIENT PROGRAM**

Michael Lowe, PhD, Professor, Department of Psychology, Drexel University, Philadelphia, PA, USA; Amy Neeren, PhD, Visiting Assistant Professor, Department of Psychology, Haverford College/Haverford, PA, USA; Douglas Bunnell, PhD, VP, Director of Outpatient Clinical Services, The Renfrew Center, Wilton, CT, USA

Controlled research with selected bulimic samples indicates that we have increasingly effective treatments for patients with bulimia nervosa (BN). Many clinicians, however, are reluctant to adopt evidenced based treatments, often claiming that protocols for CBT, in particular, do not address the realities of clinical practice. This widely recognized gap between research and practice is a persistent hindrance to the development of truly effective treatments. This workshop reports on the development of a NIMH-funded treatment study conducted in a large, for profit, outpatient clinical setting. The study introduces a group based CBT intervention into an ongoing intensive outpatient program. The existing treatment protocols were grounded in relational and psychodynamic principles and the program treated adolescents and adults with a variety of eating disorder and psychiatric diagnoses. The study introduced a more formal approach to symptom management involving cognitive restructuring, psychoeducation on the role of dietary restriction, and the use of food challenge experiences inside and outside of the treatment sessions. The primary investigators regularly observed the treatment groups and reported feedback on adherence to the protocols in regular meetings. The workshop will address several themes that emerged over the course of the study including the conflicts between psychodynamic/relational and CBT approaches, the potential conflicts between research and clinical objectives, and issues concerning staff motivation to adhere to research protocols. Practicing therapists may be minimally familiar with empirically supported treatments and this may limit the feasibility of using existing staff to deliver new treatments in which they have not been formally trained.

Audience members will have the opportunity to discuss challenges of conducting research in community-based clinical settings and incorporating empirically-based findings into existing treatments.
This workshop will cover: definition, classification, aspects of psychological and biological literature with some medical aspects of the conditions.

The learning objectives are:

- To learn about current issues in diagnosis of eating disturbances in childhood and early adolescence
- To learn about classification of eating disorders in this age group
- To learn about aspects of assessment and how it differs from the older adolescent and adults

Significant differences exist in the presentation of childhood and early adolescence eating disorders and disturbances. The workshop participants will learn this by reviewing some background literature in the area, by learning about different classification modalities, including ICD-10, DSM-IVR, and GOS (Great Ormond Street) criteria. This presentation will be supported by current evidence-based literature in the area. From the medical point of view, reference will be made to limitation in classification as it relates to linear growth, pubertal development and the use of normative data that may not be applicable to this population.

In terms of classification and diagnosis, the audience will be introduced to the EDE and its child version and the different eating disturbances such as Food avoidance emotional disorder (FAED), selective eating, pervasive refusal syndrome, restrictive eating as described in the literature mostly by UK authors. Lastly, treatment differences will be covered, with particular attention to the treatment approach initially conceptualized at the Maudsley Institute in England and now manualized by authors in the U.S.

**EATING DISORDERS IN CHILDREN AND ADOLESCENTS: A PEDIATRIC PERSPECTIVE CSW**

Jorge Pinzon, MD, Alberta Children’s Hospital / Calgary Eating Disorders Program, Calgary, AB, Canada

**THE USE OF MEDICAL CHECKLISTS IN ORGANIZING MULTIDISCIPLINARY EATING DISORDER TREATMENT**

Scott Crow, MD, Professor, University of Minnesota, Minneapolis, MN, USA; Julie Lesser, MD, Physician, Park Nicollet Clinic – Meadowbrook, St. Louis Park, MN, USA; Joel Jahraus, MD, Physician, Park Nicollet Clinic – Meadowbrook, St. Louis Park, MN, USA; Deborah Mangham, MD, Physician, Park Nicollet Clinic – Meadowbrook, St. Louis Park, MN, USA

The goal of this workshop is to describe the implementation of medical checklist systems in the treatment of people with eating disorders. Eating disorder treatment is typically complex and multidisciplinary, addressing a wide variety of factors and involving multiple care providers from multiple disciplines. Also, the experience level of care providers often varies from highly expert to relatively inexperienced. In such a complex treatment with multiple parts, there is always the risk that some parts will be overlooked, potentially compromising or delaying effective treatment. The use of checklists has received recent attention in the provision of complex treatments in other medical settings, such as intensive care units. Experience with the application of the checklist approach to eating disorders treatment will be discussed. Examples will include using the checklist across levels of care and tracking adherence to evidence-based protocols including family-based treatment, cognitive behavioral therapy and dialectical behavioral therapy. We will discuss the use of the checklists in tracking outcomes and in individualizing care. Advantages of this approach and challenges encountered in its implementation will be discussed. Recommendations for checklist approaches will be provided.
Half a century after the first description of Binge Eating Disorder (BED) by Stunkard, the optimal therapy for BED remains an open question. BED seems to respond to some degree to most treatments that have been tested, if the results focus on binge eating behaviour, while substantial weight loss remains elusive. This workshop will focus on two different therapeutic approaches to BED. One presentation will focus on the use of a cognitive behavioral treatment for BED that has been validated in two randomized trials. This manual based approach relies heavily on readings and homework assignments, and can be delivered in a treatment package over three months. The therapy can be used in group and individual formats. A second presentation will suggest a general strategy to deal with cognitive and emotional mechanisms responsible for the eating behaviour (escape from awareness, blocking of emotion, emotional eating, disinhibition) and a specific strategy to deal with the other problematic areas in these patients (e.g. self-esteem, relationships). These techniques and instruments are derived from a cognitive-behavioral approach (food diary, cognitive restructuring, etc.) but also include other elements specifically developed to address these targets. Ample time will be provided for participants to engage in a guided discussion on both approaches.

3:45 – 4:00 p.m. Tulum Terrace (JW Marriott)

Alexian Brothers Behavioral Health Hospital
Booth Number: 110
1650 Moon Lake Blvd.
Hoffman Estates, IL 60169
Phone: +1-847-755-8058
E-mail: krissy.weik@abbhh.net
Web site: www.abbhh.org

Alexian Brothers Behavioral Health Hospital (ABBHH) is a freestanding, multi-specialty behavioral health hospital in Chicago’s northwest suburbs. One area of specialization is Eating Disorders. The clinically based treatment program is a group-based, skills-based program using the Self-Regulatory Model. Patients are instructed how to recognize eating disorders/self-destructive patterns and identify and use alternative coping skills to interrupt the unhealthy patterns. ABBHH is JCAHO and DASA accredited and meets the highest standards for mental health and substance abuse treatment.

Beau Cote Centre for Eating Disorders
Booth Number: 303

CRC Health Group’s Eating Disorders Programs set the standard of excellence in the treatment of eating disorders through providing quality care and a choice of providers. Our unique and intimate facilities, located throughout the United States, provide individuals with a variety of treatment options focusing on their individual needs. Our residential facilities are located in home-like settings with scenic and peaceful surroundings. Programs are designed to be collaborative and patient-driven with an emphasis on self-responsibility and self-awareness utilizing skills based treatment for life-time recovery.

We firmly believe that successful recovery can only be measured by how well our residents return to their daily lives upon discharge from treatment. We provide a system of services that support and encourage the lowest possible relapse rates, promoting healthy lifestyle choices and the tools necessary for long term recovery.

Payment Information (Please see the AED dues chart to find the dues amount for your membership type and nation of residence.)

Membership year is January 1 through December 31. Dues are billed on a calendar year, not anniversary. Dues are not prorated. Journal subscribers will receive back issues for the months prior to the join date of that membership year.

AED is pleased to introduce an “Introductory Membership” category, available to new members to the AED. The Introductory Membership is a one-year reduced rate to members who are new to the AED, or those coming back to the AED after a hiatus of 5 years or longer. Introductory Members will be able to access the International Journal of Eating Disorders and AED Forum Newsletter, be able to hold office positions and vote on AED issues, and be eligible for reduced conference registration fees. Please see the 2009 Dues Table for the fee schedule for this new membership category.

Based on past dues increases, members who renew for 2 or 3 years could save as much as 15% by locking in their rate. Pay now and avoid future dues increases. Yes! Sign me up for: ❑ 1 year ❑ 2 years ❑ 3 years

Dues Table

In order to reflect the international nature of our organization’s mission and membership, AED used a tiered dues structure with dues levels based on economic indicators which the World Bank applies in order to evaluate all nations. This structure recognizes the impact of varying economic conditions on the relative cost of AED membership to each individual.

The table below shows a listing of dues according to a member’s nation of residence and membership category selected:

<table>
<thead>
<tr>
<th>Nations designated by the World Bank as “low income” or “lower middle income”</th>
</tr>
</thead>
