INVESTMENT

Long-term, strategic Expected returns Accountability Ongoing budget priority Dedicated resources

- 1.Use open source tech (like Drupal!)
- 2.Integrate where you can
- 3. Measure

Use open source tech (like Drupal!)

Own your site. No ongoing licensing cost Open community of active developers **Built for content and integration** (And Drupal.org is a nonprofit, too!)

Nonprofits using Drupal

Integrate where you can

Choose platforms (member management, POS, email) with open APIs

Connections > features

Build a connected ecosystem, not a junk

Set goals and key performance indicators (KPIs)

Assign value to non-monetary outcomes Calculate gain and ROI

EXAMPLE 1

- Volunteer value \$50 each
- New dynamic volunteer signup form \$1,200
- Result? 30 more recruits than usual

 $ROI: ((30 \times \$50) - \$1200) / \$1200 = 25\%$

EXAMPLE 2

- Staff cost \$40/hour
- Manual ticketing effort for event 120 hours
- Calendar API integration \$2000
- Automated ticketing effort for event 40 hours

Annual Savings: $((120 \times $40) - ((40 \times $40) + $2000)) = 1200

EXAMPLE 3

- Staff cost to publish an optimized blog \$80
- Gains 15 social shares valued at \$1 each
- Captures 4 email subscribers valued at \$20

Value produced: $$15 + (4 \times $20) = 95

A single post can pay for itself.

POSTING PUBLISHING

POSTING

One-dimensional Blog-y Informational Limited Broadcasting

PUBLISHING

Engaging Cross-medium Editorial/Storytelling Professional Targeting

- 1.Use a system designed for publishing
- 2.Use workflows
- 3.Connect and leverage

Use a system designed for publishing

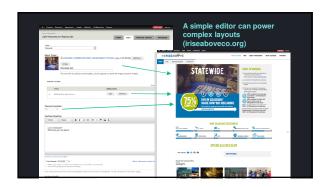

CMSs like Drupal are built for publishing.

Content can be structured and visually rich.

All you need and more out of the box.

Workflows Maintain site integrity and lightens staff demand. Repeatable and streamlined content production. Customized front-end to highlight specific content.

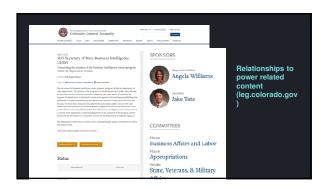

Connect and Leverage

Tag and connect content automatically.

Publish once and distribute content to all the right places.

Spend time creating interesting content, not posting or archiving it!

MAKE IT EASY

MAKE IT EASY, FUN AND INTERESTING

- 1.Get built-in basics with D8
- 2. Give users what they want
- 3. Follow through on your plan

Get built-in basics with Drupal

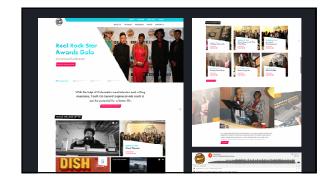

Responsive for users and admins out of the box.

Media management for quality and speed.

Completely unique front-end with a CMS

backend

Built for search

Give users what they want

Plug and play social media / aggregation tools to integrate content.

Less is more. Scannable copy and compelling imagery.

Share stories, not just facts.

Follow through on your growth plan

Assume improvements, not replacements.

Roadmap tools like marketing automation and personalization for nurturing supporters.

Adapt based on the data you are now capturing!
