Call for Proposals

[Home](#) > [Present](#) > **Proposals**

Submit your proposals by 14 April

AGU Fall Meeting 2021 is planned to be a hybrid in-person and online meeting that is based on feedback from our virtual #AGU20 and past meetings. We are focused on decreasing our carbon footprint while increasing attendees' flexibility and experiences.

#AGU21 design principles include:

- Accessing all presentations and posters online.
- Recording sessions so they are available for all attendees.
- Expanding open discussion and engagement times.
- Shortening session times (from two hours to 75–90 minutes).
- Accommodating virtual presentations as much as possible.

We encourage proposals (i.e., [general scientific sessions](#), [Union & special sessions](#), [town halls](#) and [scientific workshops](#)) with diverse groups of conveners and session chairs who can work together to broaden participation. General sessions can also be collaborative across AGU sections. When submitting a proposal, the convener can indicate a preference for one or more of the session formats below (e.g., discussion presentations, panel, poster, etc.). After abstracts are received, the **final decisions are made by the [Fall Meeting Program Committee](#)**.

As you prepare your proposal, we also want to ask you to focus on diversifying your conveners and ultimately the presenters once the proposal is approved. When we think about diversity, it's everything from race, geographic region, ethnicity and gender, but also opinion, age and science. As you know, AGU has made diversity and inclusion a foundational element to everything we do. All conveners have an

Call for proposals

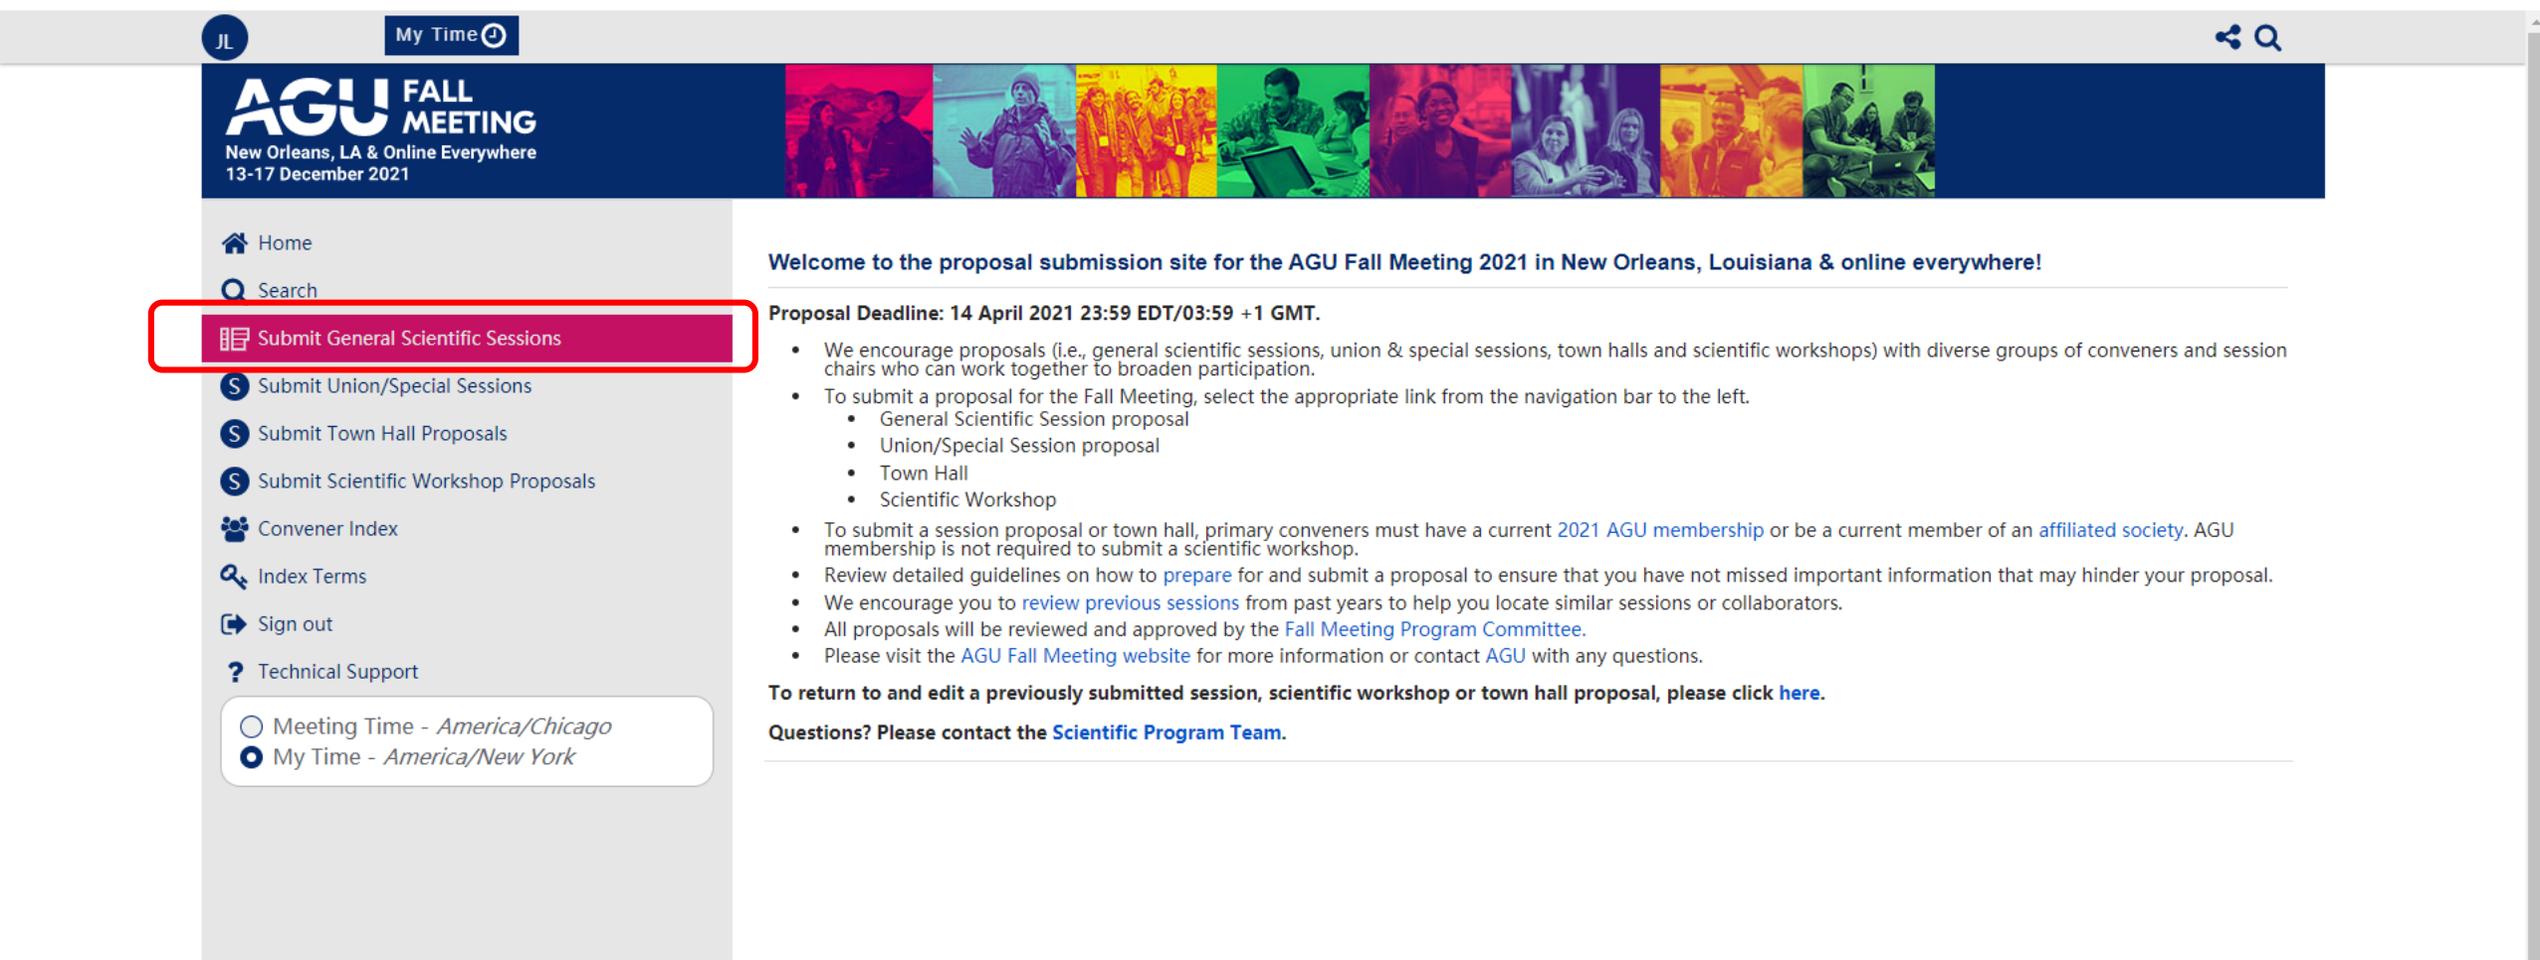

Help shape the discussion for #AGU21 by submitting a proposal by 14 April. Proposals that showcase, promote and accelerate Earth and space sciences to benefit humanity and leverage an online and in-person meeting experience are strongly encouraged.

SUBMIT

Step2:

Select a proposal type (e.g., General Scientific Session)

Welcome to the proposal submission site for the AGU Fall Meeting 2021 in New Orleans, Louisiana & online everywhere!

Proposal Deadline: 14 April 2021 23:59 EDT/03:59 +1 GMT.

- We encourage proposals (i.e., general scientific sessions, union & special sessions, town halls and scientific workshops) with diverse groups of conveners and session chairs who can work together to broaden participation.
- To submit a proposal for the Fall Meeting, select the appropriate link from the navigation bar to the left.
 - General Scientific Session proposal
 - Union/Special Session proposal
 - Town Hall
 - Scientific Workshop
- To submit a session proposal or town hall, primary conveners must have a current [2021 AGU membership](#) or be a current member of an [affiliated society](#). AGU membership is not required to submit a scientific workshop.
- Review detailed guidelines on how to [prepare](#) for and submit a proposal to ensure that you have not missed important information that may hinder your proposal.
- We encourage you to [review previous sessions](#) from past years to help you locate similar sessions or collaborators.
- All proposals will be reviewed and approved by the [Fall Meeting Program Committee](#).
- Please visit the [AGU Fall Meeting website](#) for more information or contact [AGU](#) with any questions.

To return to and edit a previously submitted session, scientific workshop or town hall proposal, please click [here](#).

Questions? Please contact the [Scientific Program Team](#).

Session Details

To copy and paste the title or description of your proposal into a box below, you might need to use keyboard shortcuts.

- To copy, press CTRL+C (or, on a Mac, Command+C)
- To paste, press CTRL+V (or, on a Mac, Command+V)

In most cases, Greek letters and other special characters will transfer from your word processing software into these boxes if you copy and paste. The Special Character palette (click the Omega symbol in the tool options) is available if you need a special character that you are unable to find in your word processor.

To continue the submission process, click "Save" at the bottom of the page.

To return to this step later, click the "Session Details" link in the Session Control Panel.

Session Title

Enter the title in mixed case. For example: Mark the Dates of the Meeting on Your Calendar

0 characters entered. You may not exceed 300.

← → Ω I x₂ x²

NOTE: There is a minimum of 20 and a maximum of 300 characters including spaces.

Session Description

Session proposals should concisely describe the session's scientific and topical relevance. Sessions can focus on scientific results, their applications, or the impact of Earth and space science on society. Thus, celebratory or memorial sessions will not be considered for AGU meetings.

Step5: Add conveners

Add, Edit and Remove People Associated with this Session Proposal.

Instructions

- The person submitting the session proposal is the Primary Convener on the proposal and this cannot be changed. If the Primary Convener needs to be changed for any reason, you must contact abstracts@agu.org.
- One of the existing conveners, must be assigned as a 'Primary Liaison' who must be available for any discussions with the Program Committee regarding the session proposal during peak times in May and August. Please assign the Primary Liaison role to an already listed Primary Convener or Convener.
- You can assign multiple roles for one person. Select the blue circle with the white down arrow next to the person's name. Check of the added role(s) and click "OK".
- Click "Add Another Person" to search for and select another convener.
- Need to edit a convener's affiliation or remove someone other than the primary convener? Click the "edit" button to edit, or the "delete" button to remove them from the session.
- Once you are done, click "continue" and you will be taken to review your session's index terms.

Review Submission And Submit

Please **PROOF** what you have entered.

- Your session proposal will be submitted for review exactly as you see it in the proof below. If all of the information included below is correct, click "SUBMIT" at the bottom of the page. Changes **CANNOT** be made after the deadline of **Wednesday, April 14 2021 23:59 EDT/03:59 +1 GMT**.
- Carefully proofread each portion of your session proposal. Make sure there are no typographical errors in the text of the title or body of the proposal. Be particularly careful to make sure that you have included all conveners, that they are in the proper order and that they are associated with the correct affiliation(s). To make any changes, click on the appropriate link in the session control panel to the left.
- You **MUST** submit your proposal in Step 4. "Proof & Submit" in order for it to be considered for the Fall Meeting. If you exit the system without submitting, the proposal will be considered incomplete. Incomplete session submissions will not be accepted or reviewed after the deadline.
- To edit your session proposal, click the appropriate Step in the Session Proposal Control Panel to access the area that requires editing. Make the edit and resubmit the Step.

Tips & Tricks for a Successful General Scientific Session Proposal

These sessions are discussions (covering oral and eLightning), posters and panels.

These session types are based on a hybrid meeting model to reflect the location, not the type, of the session since all will include moderated discussions. If #AGU21 is a fully virtual, or reduced in-person event, all sessions will become discussion sessions, including virtual posters and will include a live virtual discussion/Q&A portion.

As always, our primary goal is to ensure a safe and productive meeting. We are actively watching advice on gathering and travel and working with local, national and international advisory groups. If conditions and advice change and warrant a reduced in-person event, or fully virtual event again, we will inform conveners and the AGU community as soon as possible. We expect to have further updates at least by the time abstracts open for submission in mid-June.

The [Fall Meeting Program Committee](#) will make the final decision on which proposals are accepted for #AGU21.

Submitting Session Proposals

1 Steps for Submitting Session Proposals

Please provide the following information when submitting your session proposal:

- 1. Title:** Session proposals must include an informative title, a maximum of 300 characters not including spaces, and be in title case (e.g., **M**ark the **D**ates for AGU **F**all **M**eeting 2021 on **Y**our **C**alendar).
- 2. Description:** The session description is limited to 150 words and should concisely describe the session's scientific and topical relevance. Sessions can focus on scientific results, their applications or the impact of Earth and space science on society. The description will be used during the review process.
 - Prior to acceptance, the program committee may request that conveners revise the session title and/or description or merge proposals on similar topics. Session descriptions will be posted during the abstract submission phase to assist submitters in identifying an appropriate session and will be published in the final program.
Merged sessions are still only allowed to have four conveners. To ease the merging process, it is recommended to only include two conveners at the time of submission. Conveners can be updated after acceptance if needed.
- 3. Participation:** Sessions may be designated as virtual only or a hybrid mix of virtual and in-person participation. Conveners will be asked to select their preference and acknowledge that all sessions will be available for a virtual audience.
- 4. Index Terms:** Index terms help authors to search for relevant sessions during the abstract submission process. They are equally helpful to attendees when the online program is published. One to four index terms must be provided with the session proposal. View the full list of index terms within our resources for authors.

If your proposal is accepted, you may invite up to two authors to submit abstracts to your session once abstract submissions open in June.

AGU's main objectives for allowing invited authors include:

1. Raising the profile of a session.
2. Enticing authors who would not otherwise submit an abstract to a session in an effort to, for example, enhance diversity or interdisciplinary perspectives or feature early-career scientists.

IMPORTANT NOTE: Being an invited author does not guarantee that the person will receive an oral presentation unless it is a Union or special session.

All invited authors may be subject to being scheduled either in an oral OR a poster session. If a session is allocated an oral session the authors in that session and the length of presentations will be determined by the conveners during the scheduling process.

In addition, only those listed as session chairs on the final session (moderating the session during the live in-person or virtual session) are required to register for the Fall Meeting. Listed conveners do not need to register for the meeting if they will not attend the meeting.

Session chairs, invited authors and all speakers must pay a registration fee if they are attending and/or presenting at the meeting.

The proposal submission deadline is:
14 April 2021, 23:59 EDT/03:59 +1 GMT.

Steps to Consider

2 Identify Conveners

Before you submit your proposal, we encourage you to:

- Identify the primary convener who will serve as the main point of contact for the session. This person must be a current 2021 AGU member or a current member of an affiliated society. If you are not a current AGU member, email the [Scientific Program Team](#) for help with submitting your session proposal.
- Each proposal must have between two and four conveners, including the primary convener.
- All individuals listed must have agreed to serve as a convener before submitting the proposal.
- Co-conveners are not required to be AGU members. However, to fully participate in the planning and scheduling process in August, current 2021 membership is required.

Pro tip: Consider an early career scientist and ensure you have a diverse set of conveners.

3 Determine if Session is Collaborative

- Consider collaborative sessions that would list your session as cross-listed, co-organized and co-sponsored. By selecting these options, you indicate opportunities for collaboration or a connection between related sessions and across topics.
- Use our [flow chart](#) to help you decide if a collaborative session makes sense for your proposal.

4 Determine Requested Session Format

- Determine what session format you would like to request, i.e., a discussion (oral or eLightning), poster or panel session.

5 Proofread Your Proposal

When you're ready to submit your proposals:

- You may submit more than one, but ensure the topics are different and across disciplines.
- Proposals that are celebratory or honorary will generally not be considered.
- Proposals that are primarily advertisements of commercial products and services or contain the name of a specific experiment in the title/description will not be considered.
- The [Fall Program Meeting Committee](#) may: move sessions to another or more appropriate AGU section than the one to which it was submitted, request conveners revise the session title and/or description or merge proposals on similar topics.

AGU

FALL MEETING

New Orleans, LA & Online Everywhere
13-17 December 2021

agu.org/fall-meeting | #AGU21

Tips & Tricks for a Successful Union & Special Session Proposal

These sessions are also known as meeting-within-a-meeting or innovative sessions

These sessions should focus on interdisciplinary topics and convergent science themes of interest to a broad membership. Proposals should have a creative format, a combination of any of the formats above and designed and proposed for one session (75–90 mins), half day or a full day.

As always, our primary goal is to ensure a safe and productive meeting. We are actively watching advice on gathering and travel and working with local, national and international advisory groups. If conditions and advice change and warrant a reduced in-person event, or fully virtual event again, we will inform conveners and the AGU community as soon as possible. We expect to have further updates at least by the time abstracts open for submission in mid-June.

The [Fall Meeting Program Committee](#) will make the final decision on which proposals are accepted for #AGU21.

Tips and Tricks for a Successful Union and Special Session Proposal

1 Review tips 1 & 3 from General Scientific Sessions since those also apply here.

General Scientific Sessions Tip #1—Identify the primary convener who will serve as the main point of contact for the session. This person must be a current 2021 AGU member or a current member of an affiliated society. If you are not a current AGU member, email the [Scientific Program Team](#) for help with submitting your session proposal.

General Scientific Sessions Tip #3—Proofread your proposal. You may submit more than one, but ensure the topics are different and across disciplines. Proposals that are celebratory or honorary will generally not be considered. Proposals that are primarily advertisements of commercial products and services or contain the name of a specific experiment in the title/description will be not be considered. The [Fall Meeting Program Committee](#) may: move sessions to another or more appropriate AGU section than the one to which it was submitted, request conveners revise the session title and/or description or merge proposals on similar topics.

2 Align with AGU's Strategic Plan

- List how the session aligns with the [strategic goals and mission of AGU](#) and affiliated organizations.

3 Include Potential Speakers

- Include potential speakers who are of high benefit to the AGU community as well as diverse presenters and conveners.
- Speakers can be confirmed upon proposal acceptance.

4 Optimize In-Person and Virtual Presentations

- Optimize in-person and virtual participation and presentations in a dynamic way and creatively demonstrate the value and potential of remote participation and engagement.

5 Showcase or Connect

- Showcase or connect remote locations, labs and/or field sites as part of the presentation and session.

Important note. Session chairs, invited authors and all speakers must pay a registration fee if they are attending and/or presenting at the meeting.

The proposal submission deadline is **14 April 2021, 23:59 EDT/03:59 +1 GMT.**

AGU FALL
MEETING

New Orleans, LA & Online Everywhere
13–17 December 2021

SCIENCE *is* **SOCIETY**

agu.org/fall-meeting | #AGU21

Tips & Tricks for a Successful Town Hall Proposal

Town Halls, open to all meeting attendees, are best for collecting feedback or raising awareness for individuals from government agencies, academic programs, special projects and other focused interest groups via presentation, roundtable or a panel discussion.

Town Halls will be one-hour in length and focused on topics that do not compete with or duplicate scientific sessions. They should NOT be submitted on topics that would be better suited as a session proposal.

As always, our primary goal is to ensure a safe and productive meeting. We are actively watching advice on gathering and travel and working with local, national and international advisory groups. If conditions and advice change and warrant a reduced in-person event, or fully virtual event again, we will inform conveners and the AGU community as soon as possible. We expect to have further updates at least by the time abstracts open for submission in mid-June.

The [Fall Meeting Program Committee](#) will make the final decision on which proposals are accepted for #AGU21.

Here are the general tips and tricks for a successful Town Hall proposal:

- 1** Submitter MUST be a current 2021 AGU member or a current member of an [affiliated society](#). If you are not a current AGU member, email the [Scientific Program Team](#) for help with submitting your proposal. In addition, all Town Hall participants, presenters and organizers must register to attend Fall Meeting in order to attend the Town Hall.
- 2** Proofread your proposal. You may submit more than one, but ensure the topics are different and across disciplines. The proposal should not compete with or duplicate [scientific sessions](#) and used to primarily to gather input from the AGU community through audience participation. The [Fall Program Meeting Committee](#) may: reject or merge multiple proposals submitted by the same organizer(s) on related topics.
- 3** Describe clear audience engagement/participation options during the one-hour long session using a variety of formats (e.g., presentation, roundtable or panel discussion).

Please provide the following information when submitting your Town Hall proposal:

- 1. Title:** Town Hall proposals must include an informative title, a maximum of 300 characters not including spaces, and be in title case (e.g., Mark the Dates for AGU Fall Meeting 2021 on Your Calendar).
- 2. Description:** The Town Hall description should be not more than 200 words and should concisely describe the target audience and goals. The description will be used during the review process. If accepted, the description may be edited to conform to AGU style and format before being published. Remember, the Town Hall will be one-hour long session, including ample time for audience engagement/participation.
- 3. Participation:** Indicate if you prefer the Town Hall to be designated as virtual only or a hybrid mix of virtual and in-person participation. and acknowledge that all sessions may be virtually available. Town Hall are varied in format and may include a presentation, roundtable or a panel discussion to raise awareness and to collect feedback through audience participation. Town Hall are open to all meeting participants.
- 4. Primary contact and speaker list:** Town Hall proposals must include a primary contact/submitter, including name and affiliation, and a list of proposed moderator and proposed speaker names, if applicable. Search for full name and preferred email address prior to creating a new account. Submitter MUST be a current 2021 AGU member. In addition, all Town Hall participants, presenters and organizers must register to attend Fall Meeting in order to attend the town hall.

As the primary contact/submitter, you will organize the town hall, invite presenters and develop the Town Hall content.

The organizer will:

- Maintain all Town Hall-related details updated in the online program (description, speakers, etc.).
- Develop Town Hall agenda and order of presenters.
- Work with presenters to gather all presentations and uploading them on time onto the conference system at the convention center or virtual platform.
- Ensure the Town Hall is moderated during the in person or virtual session, making sure the discussion stays focused on the approved topic, stays on time and that the audience is allowed opportunities for discussion and engagement.

Your proposal should have as much information as possible. If the proposal is accepted by the [Fall Meeting Program Committee](#), the submitter will have an opportunity to update the list of participants prior to publication in early October.

In addition, upon acceptance, the submitter will be charged an A/V fee (\$100 USD) to support costs associated with AGU hosting the Town Hall.

Important Note: Session chairs, invited authors and all speakers must pay a registration fee if they are attending and/or presenting at the meeting.

**The proposal submission deadline is
14 April 2021, 23:59 EDT/03:59 +1 GMT.**

Tips & Tricks for a Successful Scientific Workshop Proposal

Free from the format constraints of traditional scientific sessions, these transdisciplinary focused workshops should provide conveners a way to share knowledge and skills while promoting discussion and interaction among the attendees. Workshops should be proposed by a diverse set of leaders who have not traditionally participated at Fall Meeting, but the topic is relevant to the Earth and space sciences community.

As always, our primary goal is to ensure a safe and productive meeting. We are actively watching advice on gathering and travel and working with local, national and international advisory groups. If conditions and advice change and warrant a reduced in-person event, or fully virtual event again, we will inform conveners and the AGU community as soon as possible. We expect to have further updates at least by the time abstracts open for submission in mid-June.

The [Fall Meeting Program Committee](#) will make the final decision on which proposals are accepted for #AGU21.

Here are the general tips and tricks for a successful scientific workshop proposal:

- 1** Determine if your workshop is either half-day or full-day (4 hours and 8 hours respectively for in-person and 3 hours and 6 hours respectively for virtual). All in-person workshops will include breakfast and/or lunch depending on full-day or half-day scheduling.
- 2** There is a limit of 150 attendees per workshop. In addition to paying the registration fee for Fall Meeting, AGU will charge workshop attendees an additional fee to attend each individual workshop. These fees will be posted to the website in the coming months.
- 3** Define at least one learning objective.
- 4** Ensure the proposal meets the criteria outlined below.

The criteria that the [Fall Meeting Program Committee](#) will use when evaluating proposals include:

- The proposed workshop is transdisciplinary in focus.
- The workshop is educational or co-creative in nature. Workshops that are advertisements of commercial products and services will not be considered.
- The workshop proposal encourages analysis and reflection on scientific subject matter that formulate challenge problems and promote discussion, debates and long-term visions for the discipline.
- The proposed workshop is creatively structured to promote discussion and interaction among the attendees.
- There is at least one defined learning objective.
- The proposal was submitted by a community that has not traditionally participated at Fall Meeting but is relevant to the Earth and space sciences community.
- The workshop is organized by a diverse set of leaders versus a single convener. The [Fall Meeting Program Committee](#) recommends three to four.

There is no fee associated with submitting a workshop proposal. In addition, the submitter does not need to be an AGU member.

Unless workshop attendees plan on attending other components of Fall Meeting, organizers, speakers and participants are not required to pay the #AGU21 registration fee.

If you want to re-submit a proposal that was previously accepted and delivered at a past Fall Meeting, you are welcome to do so. However, your proposal will not be automatically accepted. Your proposal will be reviewed by the program committee using the same criteria as in years past with consideration of space availability and other submissions before deciding on acceptance/rejection.

**The proposal submission deadline is
14 April 2021, 23:59 EDT/03:59 +1 GMT.**
