January 2022

Support AGU and the Education Section

AGU extends its gratitude to all who donated last year, particularly those who contributed to the Honor an Educator campaign! The teachers who received support through this initiative are featured here—a special shout-out to Chris Bolhuis, Courtney Scott, and Connit Atkisson!

The Education Section welcomes your continued support through 2022! Please click [here](#) to learn more about donating to AGU and the Honor an Educator campaign.

ENGAGE With Eos!

Interested in the latest earth and space science news? Consider subscribing to Eos (it’s free)! Featuring topics in climate, culture, careers, and more, AGU’s Eos newsletter aims to provide perspectives from across the worldwide scientific community.

*Eos* is currently preparing to launch ENGAGE (Eos News: Geoscience And Global Events)—a resource for instructors that integrates Eos news as material in course exercises and lectures.

Click [here](#) to explore Eos, and [here](#) to sign up for notifications about ENGAGE!
Kastens Comments on Fellowship

We extend well-deserved congratulations to all newly elected 2021 AGU Fellows, including the Education Section’s own Kim Kastens! AGU commends your dedication, vision, and commitment to expanding the frontiers of science. Kastens accepted this honor at the AGU Honors Party during Fall Meeting 2021, where she commented on her research into how humans learn about the Earth, and its significance within the American Geophysical Union.

Click here to view the complete list of 2021 Fellows.

Cooperdock Presents the Stout Lecture

The Education Section would like to extend congratulations to USC’s Dr. Emily Cooperdock, the first ever recipient of the Dorothy LaLonde Stout Lecture and Award. Dr. Cooperdock is recognized for her commitment to integrating diversity, equity, and inclusion into her exemplary educational and research pursuits. These pillars of the scientific community were embodied in the work of esteemed educator, leader, and scientist Dorothy LaLonde Stout, for whom the award was named. Dr. Cooperdock presented the Stout Lecture at the AGU 2021 Fall Meeting—a recorded video of the lecture is available here to all attendees of Fall Meeting (the recording can only be viewed with a FM21 login).
Bridge Program Student Applications
Open Now!

The AGU Bridge Program increases opportunities for students from historically marginalized populations to obtain graduate degrees and create a network of peers, mentors, and advisers to support and serve them before, during and after graduate school. If you have a degree closely related to geosciences, please apply to be a part of this great program.

Student applications are open between now and March 31st—click here to learn more and apply!

Navigating NSF

Check out the Earth Science Women’s Network workshop on January 28th to assist early-career and midcareer individuals with navigating the National Science Foundation (NSF) system. AGU Education is a co-sponsor. The workshop will include a short presentation about NSF funding, a panel discussion with NSF officers, and breakout rooms for specialized topics. The workshop is open to all AGU Fall Meeting attendees.
