“CYCLING”

When most people hear that word, they don’t think of the flow of nutrients or elements in a system.

Helping you share science effectively.
Do you want to:

• Inspire the public & next generation of scientists?
• Encourage support for investment in research?
• Raise the profile of your work?

AGU’s Sharing Science program gives you tools, opportunities, and support to effectively communicate science to many audiences, including:

• Journalists
• Policymakers
• Public groups
• Educators & students

“I believe the ultimate goal of science is to serve society and an important way to do this is via direct communication with the public.”

—Walt Meier, member of AGU’s Sharing Science community
