“SHEAR”
When most people hear that word, they don’t think of changes in wind speed or direction.

AGU SHARING SCIENCE
Helping you share science effectively.
“Since my mother was a teacher, I know how difficult it is to get science in the classroom. Researchers have a great opportunity to augment classroom science.”

—Justin Ridge, member of AGU’s Sharing Science community

Do you want to:

• Inspire the public & next generation of scientists?
• Encourage support for investment in research?
• Raise the profile of your work?

AGU’s Sharing Science program gives you tools, opportunities, and support to effectively communicate science to many audiences, including:

• Journalists
• Policymakers
• Public groups
• Educators & students
