October Greetings to all Biogeosciences Section Affiliates!

We’re planning some special section events for the annual Fall Meeting in NOLA, which is growing near! Please take a look at the information below! As always, feel free to contact us with any questions or section business.

Sincerely,
Ariel, Elise and Laura (anbar@asu.edu, e.pendall@westernsydney.edu.au, lauraw@indiana.edu)

  - **December 13**: AGU Honors Ceremony, Wednesday, 6:00 pm

**Biogeosciences Early Career Mixer @Fall Meeting 2017!!**

We are especially pleased to announce a new section event for early career scientists! Please see the flyer below for date, time, and place! And thanks to the journal *New Phytologist* for contributing to this event!

**Gifts to our section help us serve you better!**

This is the time of year when many are renewing their AGU memberships. When you donate to AGU, please consider designating your gift for our Biogeosciences Section. This enables us to better support student travel awards, scholarship funds, section awards, programming for members, and special projects, such as our new early career mixer. Thank you for your support!

**Seeking a few OSPA helpers**

Our Outstanding Student Presentation Committee, headed by Sue Natali, has its main crew of coordinators in place, but seeks a few volunteers to help during the week before, week of, and week or two after AGU, with sorting and tallying judge’s reports. If you can commit a small amount of time, please contact Sue directly at snatali@whrc.org. Thank you for supporting this career-boosting opportunity for students!
AGU Biogeosciences Early Career Mixer

Catch up with old friends and meet new ones!

6:30 PM TO 8 PM
DECEMBER 14, 2017

Executive Announcements:

- Consider Volunteering for AGU – Tell Us About Your Interests Now
  AGU relies on volunteers to achieve its mission. A variety of opportunities are available over the next few years with a range of time commitments. Diverse perspectives are needed. To help AGU identify opportunities that match your skills and interests, fill out an online profile. Not everyone will be matched, and there's no obligation to accept opportunities offered to you. Sign up now!

- AGU Webinars Launch: The newly launched AGU Webinars channel is a great informational source for the Earth and space sciences. Each week will feature guest speakers from the Earth and space science community presenting topics important to you! Tune in Thursdays at 2 p.m. ET. and visit webinars.agu.org for the schedule of upcoming webinars and to watch past webinars.

The AGU Webinars team is always on the lookout for great topics and speakers. Feel free to send your ideas and feedback to webinars@agu.org.
