Earth and Planetary Surface Processes

Hi All,

Welcome to the February EPSP newsletter. We're writing to share a few updates with you.

Nominate a Colleague for EPSP and AGU-wide Honors

Nominations for AGU-wide awards are due on 2 March, and Section Awards (including our EPSP Awards) are due 13 March. Please consider nominating your colleagues for some of our awards. You can get more information on how to nominate individuals [here](#). We have also put together a list of [tips for successful nominations](#) that we encourage you to read through while preparing a nomination

Joint JpGU-AGU Meeting

The joint JpGU and AGU meeting is happening 24-29 May in Chiba, Japan. While there are many great and exciting sessions, we want to call particular attention to sessions that are co-sponsored by the Japanese Geomorphological Union (H-GM04, H-TT14, H-TT15, and M-IS05, in addition to M-IS15 on wildfire). Several of these sessions are joint efforts between EPSP and JpGU members. Note that [abstracts are due soon](#) (17 February at 17:00 Japan Standard Time which is 3:00 AM on 17 February Eastern Standard Time).

Resources for International Students and Scholars in the USA

We know that this is a scary and turbulent time for international students and scholars in the USA, or considering coming to the USA. As many US-based universities are undergoing graduate student admissions at the moment, and given potential difficulties in obtaining student visas for newly admitted international

students, we wanted to remind everyone that your institute's international scholars office is often the best place to get information. Many such offices have put together fact sheets, [like this example from the University of Pittsburgh](#), with up to date information on travel bans and visa issuance.

EPSP Connects

Please join us for our next EPSP Connects seminar on 18 February at 08:00 San Francisco / 17:00 Berlin on Zoom. This talk is from Dan Scott (Riverscape Science and Stewardship) and Charlie Shobe (USFS) and is titled "Untangling Influences on Channel Adjustment and Avulsion in Gravel Bed Rivers." [Register for the talk here](#).

EPSP connects is looking for early career colleagues to help run the monthly series. Get in touch with Roberto@psu.edu if interested.

EPSP Student Committee Looking for New Members!

The AGU Earth and Planetary Surface Processes section is looking for motivated individuals to join our [student committee](#). This is a great way for students to get involved in the community, interact with other students from across the world, and more. The student committee currently runs the [early career spotlight](#), the [sticker design competition](#), coordinates a [peer mentoring program](#), and organizes networking events at the AGU Annual Meeting. In the coming year, the student committee is looking to continue their existing efforts and also expand their resources towards more projects related to content creation and diversity & inclusion. However, student committee members are welcomed and encouraged to think of and implement new ways we can better serve our EPSP student community.

If you are interested in joining the student committee, please fill out an [application form here](#). **Applications are open until 1 March** and are evaluated following [this rubric](#). Feel free to reach out to the current student committee chair at emma.rogers.gr@dartmouth.edu if you have questions.

Help with EPSP Social Media (BSKY and Instagram)!

We're looking for a few folks to help us with our website and social media. If you're interested in joining our volunteer team to help out, please e-mail [Susannah Morey](#) for more information.

Stay Connected with EPSP

As a reminder, in addition to this newsletter, we make many EPSP-related

announcements on our Bsky account ([@aguepsp.bsky.social](#)), Instagram account ([agu_epsp](#)), as well via the [Gilbert Club](#) and [IAG Geomorph-List](#) (GEOMORPH-L) community list-servs (which are both great ways to stay up to date with the broader geomorph community as well).

AGU is a global community supporting more than half a million advocates and professionals in the Earth and space sciences.
