Go to AHEAD.ORG and sign in. Then select eLearning from the top menu.
Select your account in the upper right corner (click on your name)

You will land on your account page, in the settings area. You can set your profile here and also access information on your account using the upper-level menu items.
Under **My Activity**, you will see your purchases. By selecting each item, you will get information on it. For example, I selected the spring webinars and arrived at a listing of all those I chose. The green banners to the right of each box indicates I have purchased it. However, notice the first webinar has already been presented. Clicking on it I can get to details on that presentation.
Selecting the webinar that has already been presented, takes me to information on it. In addition to the description, I can now access the presentation materials (slides and handouts) and the recording link. I can play the Zoom recording from within the system.

Going back to my account, I can also get receipts for my purchases. Selecting Purchasing from the top menu brings up a list of my purchases, allowing me to select each to open a receipt.
We have not yet implemented the “Certificates” function but hope to do that soon. I encourage you to explore the other tabs to see the information on each.
