AIA Sustainability & Resilience

Why Sustainability & Resilience?

“The creation and operation of the built environment requires an investment of the earth’s resources. Architects must be environmentally responsible and advocate for the sustainable use of those resources.”

Education of Architects

Practice-Focused Research

Local Member Actions

Policy & Advocacy

Communications

Partnerships

Growing the 2030 Commitment!

US SIGNATORIES

FOUR GOALS

HOW YOU CAN HELP

Recruit 600 new signatories.

Host 2030 Commitment education sessions – we’re working on new grab-and-go presentations!

Increase share of signatories who report annually to 60%.

Learn from AIA Chicago, AIA East Bay, AIA Philadelphia and others to host 2030 Roundtables.

Increase share of energy-modeled GSF to 70%.

Promote AIA+2030 AIAU series and the *Architect’s Guide to Building Performance*.

Make demonstrable changes to drive zero net carbon design.

Request access to the new DDx today to see how we’re making operational energy & embodied carbon easy to track!

National & local working together

State Disaster Coordinator network

Safety Assessment Programs

COTE Committees and 2030 Working Groups at local components

Sustainability education programs outreach

Project partners (Materials Matter and AIA+2030)
