What we know about Lion Air JT610 & Ethiopian Airlines ET302

Date & Time: March 20th, 2024, 7:00-8:30 pm EST, Zoom
Registration: https://aiaa.zoom.us/webinar/register/WN_dNd-ncanQ8WOOnXYjEVUig

The AIAA New England Section is organizing an expert webinar session. Come and listen to Eric Ohmit on the Boeing 737MAX crash, specifically the MCAS system.

Mr. Ohmit will discuss the findings of the accident reports of the events that led to the tragic Lion Air JT610 and Ethiopian Airlines ET302 737 Max 8 accidents. He will present summaries of the accidents and discuss the operation of the Maneuvering Characteristics Augmentation System (MCAS).

Join us to hear from Eric Ohmit

Mr. Ohmit is a retired Northrop Grumman Fellow, who spent the majority of his 40+ year career working in manned and unmanned aircraft flight control systems at Northrop, Calspan, Moog and Northrop Grumman. He has contributed to a large number of aircraft programs including the B-2, YF-23, F-20, X-35, YF-22, F-22, LCA, JAS-39 Gripen, M-346, V-22, F-35, Global Hawk, X-47B, LEMV, MQ-8B & C, VISTA NF-16D, NT-33, TIFS and other programs. He worked on 2 teams which received Collier Awards (B-2 and X-47B). He is a Niagara Frontier Hall of Fame member and continues to consult in the field of Air Data Systems, Flight Controls and Flight testing.
