I CREATE CHANGE FOR . . . .

_____

About BEAVER WORKS

Beaver Works, a joint center of MIT's School of Engineering and Lincoln Laboratory, runs the Beaver Works Summer Institute (BWSI)—a world-class STEM program where high school students tackle real-world challenges through hands-on projects. From autonomous vehicles to assistive technologies, BWSI inspires students to design and build solutions that make a difference, preparing the next generation of STEM innovators.

Join the CREATE CHALLENGE!

Design & Innovate **Assistive Technology** For Everyone

Register Now!

Learn about disability, practice product design, and create prototypes that empower people in your community.

CREATE CHALLENGE

A virtual program from October to April, empowering **high school** and **college** students to co-create **assistive technologies** alongside individuals with disabilities
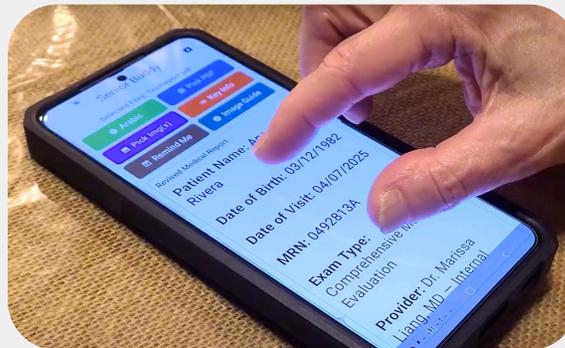

Why Join?

- Free online course
