

On the 10th anniversary of Concorde's last flight
Presents

== Supersonic Dreams! ==

Higher – Faster – Further...well at least we are still doing things that are higher and longer ranged, but engineers still dream of supersonic flight available to everyone in business and commercial aviation. The Central Indiana joint professional engineering / historical societies invite you to a look backwards and forwards on civil supersonic flight.

**When: WEDNESDAY 14 November 5:30 – Where: R-R Joint Training Center
2601 West Raymond St. ½ way between Tibbs & Kentucky on Raymond**

Heritage Exhibition open from 4:30 PM to end of event – our SST moving inlet display is working!

Pizza and drinks arrive 5:30

Individual Societies will have their “business meetings” at different tables or corners of the main auditorium

6:00 Introduction of society presidents or representatives with 2 minutes on what they are doing, want to do, etc.

6:15 Main presentation and panel

John Leonard – the XJ-89 and Model 750 supersonic transport / bomber engines by Allison
Concorde flight video and comments

Lynn Snyder – considerations on supersonic flight – things we think about from for propulsion

Steve Heister Phd, Purdue – possible near term supersonic programs – Purdue’s work in this area

7:00 Closing remarks / questions and answers

MAKE A RESERVATION TODAY !!! - you do NOT need to be a member of any of the sponsoring organizations to attend – but we do need a count for Pizza and Cokes!

Reservations –Through your professional society or heritageindy@rolls-royce.com

THERE WILL BE PRIZES! Some with significant historical value!
