## Release Overview

This release note covers Aruba Instant On application software versions and mobile app versions for the management of Instant On Access Points (APs).

The Aruba Instant On application is available as a mobile app and a web application. The software and app versions are built from 1.1.0 and 1.0.1 respectively, the first major release of the Aruba Instant On application.

## What's New in This Release

This edition of the release notes introduces the Aruba Instant On mobile app and web application version 1.3.1, which includes the following:

- Bug fixes and stability improvements

## Known Issues

This section describes the known issues observed in Aruba Instant On 1.3.1.

**Table 3:** *Known Issue in Instant On 1.3.1*

Bug ID	Description
SMB-2450	When an application category is being blocked, clients currently using the application may still be allowed access until their session expires.

## Features Introduced in Previous Releases

The following section lists the features and enhancements introduced in the previous Aruba Instant On software and mobile app releases.

### Mobile App and Web Application

#### Version 1.3.0

This edition of the release notes introduces the Aruba Instant On mobile app and web application version 1.3.0, which includes the following:

- Support for the Aruba Instant On mobile app and web application in two new languages — Korean and Traditional Chinese.
- Possibility to block specific application categories on a network.
- Instant On devices can now be deployed as a Wi-Fi router to the Internet when it connects directly to a modem.
- Additional help and troubleshooting information is included during the initial setup of a site.
- Additional visibility and monitoring information over device connectivity and Ethernet port activity.
- New options added in the Guest Portal — Facebook Wi-Fi, third-party External Captive Portal integration).
- Instant On APs add their names in DHCP requests, allowing easier management of the network infrastructure.

## Version 1.2.1

This edition of the release notes introduces the Aruba Instant On mobile app and web application version 1.2.1, which includes the following:

- Bug fixes and stability improvements.

## Version 1.2.0

This edition of the release notes introduces the Aruba Instant On mobile app and web application version 1.2.0, which includes the following new features and enhancements:

- Multi-language support in the following languages for the Instant On mobile app and web application and also the Online Help.
  - English
  - Chinese (Simplified)
  - French
  - German
  - Italian
  - Japanese
  - Portuguese
  - Spanish (Latin America)
- Possibility to block specific wireless clients from accessing the network.
- Ability to limit client bandwidth usage on the network.
- Internal DHCP for clients on employee networks
- Bug fixes and stability improvements.

## Software

### Version 1.1.1

This edition of the release notes introduces the Aruba Instant On software version 1.1.1, which includes the following:

- 802.11r support and performance improvements when roaming between APs.
- Support for Aruba Instant On AP-17 access points.
- Bug fixes and stability improvement.
