(408) 765-9325

Abstract

The last generation has seen a great expansion in statistical and applications. The availability of computer programs capable of performing complex statistical calculations has led to new uses for this field in business, pharmaceuticals, physical and social sciences. What will the next few years bring? What new developments? What new areas of application? How will today's students be affected? This panel of people with diverse backgrounds in statistics will explore these and other questions.

Employment Opportunities

Syva Co.

The Medical Diagnostics Subsidiary of Syntex Co.

Syva is seeking an experienced Biostatistician to participate in the design of experiments for Research and Development in all areas of the company. The Biostatistician will interact with other statisticians to maintain a consistent, company-wide approach, identify problems with current statistical methods, and develop, implement, and review procedures. As needed, the biostatistician will provide statistical training to the user community. He/she will support clinical trials.

Requirements:

M. S. in statistics or equivalent. Three years or more experience in a pharmaceutical or diagnostic environment. Familiarity with SAS or RS1. Excellent verbal and written communication skills.

If interested, send resume to:

Syva Co.

P. O. Box 10058 M.S. 1-105

Palo Alto, Ca. 94303

Failure Analysis Associates, Inc.
A National Engineering & Scientific Service Firm

The company is seeking a Biostatistician to develop quantitative health risk assessments for a variety of occupational, environmental, and consumer product sources. He/she will perform original epidemiological data analysis on national health databases; secondary analysis of published data from epidemiological, toxicological, and environmental studies; provide critical reviews of the design, analysis and interpretation of published research to integrate quantitatively and qualitatively results from multiple sources.

Requirements:

Ph. D. in Biostatistics or equivalent. 2-3 years of experience. Also, experience in design and analysis of epidemiological, toxicological, and environmental experiments is desirable.

To Apply, send or FAX resume to:

Vernetta R. Wilson

Reference #047

Failure Analysis Associates Inc.

P. O. Box 3015

Menlo Park, Ca. 94025

(415)-633-7021

(415)-328-3049 FAX
