

Committee Requests for Funding

Committees do not have designated budgets. If your committee would like to propose a special project or initiative that requires funding, you may [submit a request](#). Please help us understand how the initiative connects to your committee's charge and supports ASA's strategic plan. We're particularly interested in initiatives that have the potential for sustainability.

Please reach out to your staff liaison if you have questions about funding possibilities or would like to talk through an idea. They will be able to help you explore what might be feasible.

JSM Meetings

Costs are extraordinarily high, due to the fact that we hold the JSM meetings in hotels and the designated convention center. We are not able to provide the AV equipment required for a hybrid meeting. Our recommendation is to not schedule a formal business meeting at JSM rather to use the opportunity for informal networking.

If you have questions, you may also contact Donna LaLonde (donnal@amstat.org).
