Jacqueline Zinn
Emeritus Professor, Fox School of Business and Management
Temple University
“She has been a leading national and international researcher of long-term care organizations and related services for 30 years. Her contributions to understanding key issues in her field have been novel, substantial, and sustained”

“What really sets Jackie’s work apart is her ability to grasp of the nuances of strategic management and organization theory and its connection to health care policy and practice in long term care”

“Our field, despite its importance, presents difficult challenges including unique data requirements, limited funding opportunities, and a theoretical foundation that is somewhat pluralistic. Jackie has been successful at managing all these challenges, and has contributed significantly to our understanding of long term health care organization and its relationship to such key policy problems as quality, efficiency and responses to regulatory and market forces”
JACKIE ZINN’S OTHER CONTRIBUTIONS

- **Service**
  - Co-Editor in Chief of *Health Services Research* (2010-2017)
  - Grant study section member for the National Institutes of Health and the Agency for Healthcare Research and Quality (1995-2018)
  - Board of Commissioners, Accrediting Commission on Education for Health Services Administration (2003-2006)
  - Board member of several not-for-profit organizations in the long-term care field (2003- Present)

- Mentoring of doctoral students and junior faculty
  “I was very fortunate to have Jackie as my mentor during my PhD at Temple. She was the faculty member who introduced me to the research process from data collection to data analysis. She inspired me to become a better writer by applying organizational theory to complex health care issues. She was very patient and supportive, yet firm in her expectations to excel in our research. But it was her passion for long-term care research that attracted me to this field. She was also instrumental in facilitating research connections with other senior colleagues, which proved to be critical in my career development. Furthermore, she was a role model in her service to the HCM Division, which inspired me to become not only an active member but ultimately a leader of the HCM Division.”
