

Bladder management: Using data to drive improvements

Join BD to explore a hospital's CAUTI Prevention Plan, where we'll identify organizational gaps and set actionable goals. Gain insights into strategies and best practices to enhance patient care through effective prevention measures.

Donna Boatwright

Process Improvement Coordinator
Clinical Quality Improvement Department

Objectives:

- Discover how the BD® Zero-In™ Lifecycle Assessment can streamline processes and boost efficiency.
- Learn to pinpoint gaps and establish goals for enhanced patient care with CAUTI prevention strategies.
- Uncover how BD's training, assessments, and educational resources can help you meet your organizational objectives.

Offering two options for our attendees.

Session 1: Wednesday, December 4 at 6 pm EST

Session 2: Wednesday, January 8 at 3 pm EST
