

APIC NE Spring 2024 Virtual Conference

Doe Kley RN, MPH, T-CHEST-LTC-CIP, CIC

Doe Kley is an Infection Prevention Fellow within Clorox Healthcare's Clinical and Scientific Affairs team and is passionate about helping glean insights and solutions to tackle the many challenges faced in infection prevention. All relevant conflicts of interest have been mitigated in Rebecca's upcoming presentation. Her role focuses on providing consultative services and developing practice tools using her 20+ years of clinical expertise in acute care infection prevention from working in large healthcare systems, such as Intermountain Healthcare and Kaiser Permanente.

Doe is a registered nurse and received her Master of Public Health from the University of Nevada, as well as a Bachelor of Microbiology from Weber State University. She teaches an infection control course for the Ohio State University (OSU) and is also dual-board certified in infection prevention and epidemiology in both acute and long-term care. Additionally, Doe is certified to train EVS through Association for the Healthcare Environment (AHE) and is currently a member of AHE, the Association for Professionals in Infection Control & Epidemiology (APIC), the Association of periOperative Registered Nurses (AORN), and the Society for Healthcare Epidemiology of America (SHEA). Doe is active on several committees including Test Committee for the Certification Board of Infection Control & Epidemiology (CBIC) and the Advisory Council for the Pearce Foundation Environmental Services Optimization Playbook (EvSOP). She also served on the board of directors for California APIC Coordinating Council (CACC) in 2022.

Rebecca Battjes MPH, CIC, FAPIC

Rebecca Battjes (pronounced “batches”) MPH, CIC, FAPIC is an Infection Prevention Senior Clinical Advisor for Diversey–A Solenis Company. All relevant conflicts of interest have been mitigated in Rebecca’s upcoming presentation.

In this role, Rebecca serves as an infection prevention and control resource and industry liaison to support the improvement of environmental hygiene solutions and the adoption of evidence–based practices.

Prior to joining Diversey in May 2022, Rebecca was the infection prevention & control program manager of a small community hospital and short stay skilled nursing facility. From 2013 to 2021, she was an Infection Preventionist at a large academic medical & level 1 trauma center in the heart of Detroit.

Rebecca earned a Bachelor of Arts degree in English & Spanish literature from Wayne State University in Detroit and a Master of Public Health degree from Benedictine University in Lisle, Illinois. Rebecca achieved board certification in infection control (CIC®) in 2019 and became a fellow on APIC in 2022.

Richard Capperell

Richard Capparell currently serves as APIC's Director of Legislative Affairs overseeing federal and state issues affecting the field of infection prevention and control. In addition to his experience with APIC, Richard has worked in the office of Congressman Paul Kanjorski, Senator Tom Hancock from the Iowa Senate, and worked as paid staff on numerous political campaigns on the state and federal levels.

Andrea S. Greenfield, MSN, RN-BC-CIC; Michelle Jerry, BS & Chloe V. Green, MURP

Andrea Silva Greenfield: Andrea is an infection preventionist at MGH a large academic medical center in Boston, MA. She is responsible for several inpatient and procedural spaces with a focus on assessing and improving adherence to infection prevention and control (IPC) best practices. Andrea serves as an IPC subject matter expert on an innovative virtual reality training program for IPC in clinical settings. This program, developed by MGH in partnership with the CDC, is currently in the pilot phase following the successful design and build of their first training module. Her interest in infection control developed over her thirteen years as a nurse. She holds an undergraduate degree in Biology from Brandeis University and master's degree in nursing from the MGH Institute of Health Professions. In her free time, Andrea enjoys travel and time outdoors with her family.

Michelle Jerry, BS: Michelle is a clinical research coordinator at Massachusetts General Hospital, working on a 5-year CDC-funded project to enhance IPC learning for healthcare personnel. In this role, Michelle conducts literature reviews, contributes to the training design, and conducts and evaluates end-user testing. Michelle graduated from Tufts University with a bachelor's degree in biology. She is interested in the social determinants that make healthcare inaccessible and the impact of technology on advancing access and outcomes. Her previous research focused on HIV/AIDS and substance use in adolescents.

Chloe V. Green, MURP: Chloe is an experienced program and people manager with a background in public health education, infectious disease prevention, quality improvement, and Social Determinants of Health integration into healthcare. Chloe has led multi-site, multi-year SDOH learning and improvement collaboratives, including the national Collaborative to Advance Social Health Integration. Before joining the team at Massachusetts General Hospital as a Senior Program Manager for a 5-year CDC-funded project, Chloe served on the Coronavirus Emergency Response Team at Worcester Polytechnic Institute, managing testing, contact tracing and isolation operations at the university. Chloe has an undergraduate degree in community health from Tufts University and a master's degree in urban and regional planning from UCLA.
