

KloreSe™

- The ONLY disinfectant with an EPA registered claim against biofilm that's safe/legal to put down the drain
- Cleans & Disinfects
- EPA Lists include B, C, D, E, F, G, H, K, L, N, P and Q
- Proven efficacy against MRSA, HUMAN Norovirus, Listeria, Salmonella and C. diff spores and BioFilm
- Registered in all 50 state

Hypochlorous acid (HOCL) is the most effective disinfectant in the chlorine family available in dilute solution. It is suggested that HOCL is 80+ times more efficacious than sodium hypochlorite

From the US EPA Master label the following are killed at 4306 ppm NADCC in water:

ORGANISM	TYPE	KILL TIME	SOIL LOAD
<i>Clostridium difficile</i>	Endospore Forming Bacteria	4 min	Full
<i>Staphylococcus aureus</i>	Gram Positive bacteria, cocci	4 min	Full
<i>Mycobacterium tuberculosis</i> ②	Gram positive mycobacterium	4 min	Full
<i>Klebsiella pneumoniae</i> ②	Enterobacteriaceae Enteric Gram Negative Bacteria rods	4 min	Full
<i>Salmonella enterica</i>	Enterobacteriaceae Enteric Gram Negative Bacteria rods	4 min	Full
<i>Acinetobacter baumannii</i> ,	Gram Negative rods	4 min	Full
<i>Pseudomonas aeruginosa</i>	Gram Negative rods	4 min	Full
Norovirus	Small unenveloped RNA virus	1 min	Full
Human Immunodeficiency Virus (HIV)	Large Enveloped Virus	1 min	Full
Hepatitis A Virus (HAV)	Large Enveloped Virus	1 min	Full
Hepatitis B Virus (HBV)	Large Enveloped Virus	1 min	Full
Hepatitis C Virus (HCV)	Large Enveloped Virus	1 min	Full

② Requires 5382 ppm of product

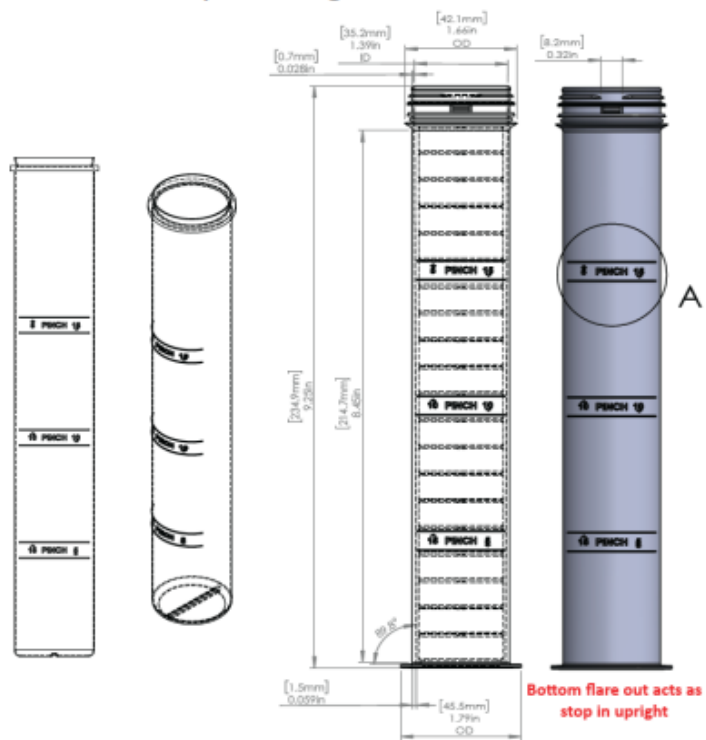

NaDCC: Sodium dichloroisocyanurate

KloreSe™

Klorese Tablet Dispenser

- Touchless Dispensing System
- Secure & Tamper Proof
- Tube Design
- Patents pending x 3

Bottom flare out acts as stop in upright

Quick Foam System

The bacteria within biofilm are as much as 1,000 times more resistant to antibiotics and disinfectants than bacteria found outside of biofilm.

"... consider disinfection of sink drains using an EPA-registered disinfectant with claims against biofilms ..."
- New SHEA guidance
